Irvine Unified School District Mission Statement

Our mission is to enable all students to become contributing members of society empowered with the skills, knowledge, and values necessary to meet the challenges of a changing world, by providing the highest quality educational experience we can envision.

University High School Mission Statement

Our mission is to enable each student to become a contributing member of society with an appreciation for complexity and ambiguity, empowered with the knowledge, skills, and values necessary to meet the challenges of a changing world by providing the highest quality educational experience we can envision.

University High School Vision Statement

University High School will provide students with the means to acquire knowledge and develop habits of mind to prepare them for the world they will inherit. To this end, we foster skills in:

Critical thinking /Problem solving

Communications and Interpretation

Artistic Creation and Aesthetics

National and International Awareness

Personal and Social Development

Interrelationships of Science, Technology, Mathematics and Society

University High School Core Values

University High School's learning environment is based upon a set of values shared among students, teachers, administrators, support staff and parents. These values become the unifying vision that guides our learning community.

Organization, Leadership, Vision and Purpose: *The stakeholders*

- Encourage open communication.
- Share governance through a decision-making process.
- Balance academic freedom with agreed-upon practices and policies.
- Implement and follow school policies consistently.

Curriculum: *The stakeholders*

- Develop critical thinking skills.
- Apply learning both inside and outside the school environment.
- Articulate and collaborate between and among levels and across curriculum.
- Meet and exceed state standards.
- Evaluate and revise the curriculum to meet student needs.

Instruction: *The stakeholders*

- Innovate and experiment.
- Foster autonomy within a collaborative culture.
- Coach students to think, to problem solve, and to exercise responsibility for their learning.
- Accommodate a variety of learning styles.
- Analyze student performance results to inform and guide instruction.

Assessment: *The stakeholders*

- Encourage reflection and self-evaluation.
- Design assessments to reflect state standards
- Implement multiple types and sources of assessments to accommodate all students and learning types.
- Use benchmarks and common assessments to guide instruction.

School Culture: *The stakeholders*

- Pursue excellence.
- Practice ethical behavior.
- Embrace and respect the diversity of all cultures and individuals.
- Cultivate individual talents and interests.
- Encourage students to share meaningful life experiences and outside knowledge with their learning communities.
- Empower and inspire students to use classroom learning to ignite student passion for meaningful social, political, intellectual, and creative activity.
- Balance mental and physical health.

Expected School Wide Learning Results

Teachers at University High School work towards incorporating the six performance areas (ESLRs) into their curriculum and daily instruction, such that, by graduation, students should be able to demonstrate skills in the following areas:

1. Critical Thinking/Problem Solving <i>A demonstrated ability to deal with complex, real-life problems logically</i> These traits address the challenges of assessing and using information to make thoughtful decisions. • question • think critically • find, select, apply information • problem solve	4. National and International Awareness <i>A demonstrated knowledge of national and international issues</i> These traits deal with thoughtful human interactions that foster harmony and understanding. • consider and understand the perspectives of others • participate in discussions of school, community and world issues • act in a socially responsible manner
2. Communications and Interpretation <i>A demonstrated ability to communicate in the English language and also in an additional language</i> These traits relate to conveying and receiving information. • read and listen for meaning • speak, and write clearly • demonstrate basic proficiency in a language other than English • demonstrate a basic understanding of numbers, and mathematical symbols	5. Personal and Social Development <i>A demonstrated ability to handle real-life problems in finance, fitness, day-to-day living, and community service</i> These traits direct personal skills and assets towards successful human interactions and make a person able to harness his/her talents for a productive life. • participate and work cooperatively in groups • demonstrate intellectual independence • adhere to the Trojan Code of Conduct, which includes honesty, respectfulness and accepting of differences • be physically fit • serve the school and/or community • manage time • conduct career exploration
3. Artistic Expression and Aesthetics <i>A demonstrated ability to produce an artistic performance or creative product that reflects the student's understanding of the arts</i> These traits deal with the appreciation and expression of creativity through images, sounds, movements, and words as a means of understanding culture. • acquire knowledge and skills necessary to express themselves in an artistic manner • express themselves creatively using various artistic media • make aesthetic judgments based on criteria • identify the importance of art in diverse cultures	6. Interrelationship of Science Mathematics, Technology, and Society <i>A demonstrated ability to recognize the interrelationships of science, mathematics, and technology as they relate to everyday experiences in the world around us</i> These traits enable the student to make decisions in a complex technological society. • draw conclusions using inductive and deductive reasoning • use the scientific method • demonstrate the use of current technology • demonstrate technological literacy including the ethical issues and impact of technology on society • understand and interpret scientific articles, graphs, and calculations

Support Programs

Long-block schedule two days per week: The school's bell schedule includes a weekly long block period of instruction for each class. The long block period provides teachers the opportunity to structure activities that take more than a typical period to give students time to move deeply into an activity and construct meaning without interruption. Every discipline has particular kinds of activities that benefit from a longer block.

Office Hours: Two office hour periods are built into the weekly schedule. This time is used to meet individual student needs and provide teachers with time to meet with students outside the classroom period. Office hours provide many opportunities to make the work of our students more meaningful and thoughtful, as well as providing alternative ways of assessing student knowledge, including:

Group and individual remediation
Make-up exams
Oral performances
Practice for presentations
Post-writing conferences
Physical fitness

Library research
Individual work or work with peers
Work in the computer lab
Recitals
Attend a Speaker Series event

Mandatory Office Hours: Students missing multiple assignments in multiple classes are invited to attend Office Hours in the same classroom with the same staff member for each Office Hours period. In this time students are required to complete missing work and assessments. Students have access to computers to check on class progress or work on their assignments.

Assigned Office Hours: Students who have low or failing grades and are not utilizing the Office Hours Program may be assigned to specific office hours and monitored by both the counselor and administration. This intervention is designed to focus students for those two 45 minute periods each week to better utilize their time to make up work, get help, and stay on track in specific classes.

Homeroom: All students are assigned to a fifteen minute homeroom period that meets most Fridays. Homerooms are linked to each student's third period class. The homeroom provides opportunities for students to connect with peers and adults in a supportive environment. The homeroom period also provides opportunities for students to participate in classroom activities, including activities organized by the ASB (Associated Study Body), attend assemblies and pep rallies, meet with counselors, and listen to school announcements.

IMPACT: This is a student leadership program that provides upper classmen mentors for our incoming freshmen. The program develops leadership skills in upperclassmen and provides opportunities for incoming freshmen to establish an early connection to University High School. IMPACT student leaders are selected through an application and interview process and participate in leadership training workshops. Freshmen meet with their mentors for their first meeting during the registration day, followed with mentor connections during selected Homerooms.

Flexible scheduling: Students may broaden their high school experience with enrollment in performing arts and service courses. In addition to a six period day, periods 1 through 6, students may request a 7th course in these areas. Prerequisites, limits on course enrollment numbers, scheduling constraints, and commitment to attending a zero period apply.

Peer Tutoring: Teachers and student peer tutors are available to assist students in several subject areas during the after school tutorial. This after school program is open Monday through Thursday, for one hour after school.

Disco: One teacher meets with a small group of students during this afterschool program focusing on motivation and guidance to assist the student in his or her academic progress. Enrollment is by invitation only from counselors and requires parent permission and student commitment to participate.

Library: The library is home to many of our students on a daily basis. After school, from Monday through Thursdays, during most weeks, the library is open for one hour as a quiet place for students to work on homework, complete group projects or do library research.

MyIUSD.org: The Irvine Unified District provides parents and students with access to student attendance, grades and class grade books. Both students and parents are encouraged to log in on a regular basis and keep track of assignments and grades and student attendance

Canvas: Teachers utilize Canvas software to communicate curricular information, such as course syllabi, calendars, assignments, and educational links.

Counseling Services

The mission of the University High School Counseling Department is to provide all students with a comprehensive, developmental guidance and counseling program centered on academic, career and personal/social knowledge, attitudes and skills necessary to become responsible adults in a changing world. Some of the many support services provided are listed below. Counselor appointments are scheduled through the counseling office. Counselors are available on a walk-in basis for students who are in need of emergency counselor support during the school day. Included in the support provided by counselors are:

- New and continuing student enrollment
- High school educational planning and graduation status checks
- Personal, social and emotional support
- Grade level parent coffee presentations and evening informational sessions
- Referrals to school interventions and community resources
- Collaboration with students, parents, and teachers
- College entrance testing information
- Scholarship and financial aid information
- College/University letters of recommendation
- Career awareness and planning
- Advisement of college and university entrance requirements

Naviance

With the generous support of the Irvine Public Schools Foundation, Irvine students, parents and their counselors have access to the Naviance Family Connection, assisting students with academic, career, college and personal planning. Students have access to their individual accounts and are able to keep track of their preparation for post-secondary education programs, including college and university attendance and career planning.

9th Grade Program

Ninth graders are enrolled in freshmen classes based on middle school teacher recommendation. In the fall semester, parents are invited to our Freshmen Parent Coffee, co-sponsored by our PTSA. During this informative meeting parents are provided strategies to help their students through high school. At each progress report counselors review student progress and work with teachers, administrators and parents to implement support strategies, such as Student Review Team meetings, referrals to the district Progress Success program, and summer school course recommendations. During the spring semester, counselors host another Freshmen Parent Coffee and also visit classrooms to provide curricular lessons related to graduation requirements, transcripts, college requirements, summer school and tenth grade course selection.

10th Grade Program

In the fall semester, parents are invited to our annual Sophomore Parent Coffee. Counselors continue to monitor student progress and identify support programs and summer school recommendations for students to meet the graduation requirements. In conjunction with the College and Career Center Coordinator, students participate in college and career exploration and complete a career inventory. Career and college planning becomes the focus of the sophomore conference meetings beginning each December with each student and his or her parents/guardians. The tenth grade conference also is an opportunity to develop the student's academic plan and to discuss post high school options.

11th Grade Program

During the spring semester, juniors meet with their counselors in small groups to review graduation and college requirements, testing dates and course selection. Parents are invited to our annual Junior Parent Coffee, co-sponsored by the PTSA, informing parents about graduation, the college and university application process, college requirements and post high school options. Throughout the year counselors monitor student progress in meeting high school graduation and the students' college and university goals.

12th Grade Program

Monitoring student progress to meet high school graduation and college requirements continues through the twelfth grade year and includes transcript and graduation checks provided to students and parents early in the fall semester. Parents are invited to the annual Senior Parent Coffee providing information on assisting their students through the senior year and preparing for their student's post-high school program. Counselors meet with seniors in groups to review graduation status, college admissions, and other post-secondary options. Individual student meetings are held with students requesting letters of recommendations. Throughout the year, counselors monitor student progress towards graduation and the students' college/university or career goals.

Early Graduation

Students may request to graduate early (at the end of the 7th semester). In order for the request to be considered, the student must meet with his/her counselor by the end of their junior year, to create a plan that will include completion of all high school graduation credits (215), course requirements, and an Early Graduation Contract.

Life After High School Guidebooks

This guidebook has been created by a joint effort of IUSD high school counselors and is provided to students during their tenth grade planning conference. This book is also available through an online link from the school's web page. Valuable information and web links in this publication are designed to assist students and families as they plan for college and career after high school.

Academic Program

1. Course Enrollment Expectations

Because many colleges and universities are increasing their admissions requirements, and leaders of business and industry are concerned about the academic preparation of people entering the work force, the faculty and administration at University High School requires all students in grades 9-11 to enroll in six courses during each year of high school. Seniors, whose plans allow them to meet graduation requirements with room to spare, may enroll in five classes, four of which must be on campus.

There is an opportunity for all students to attend periods 0 – 6. The guidelines for enrolling in a seventh course are:

- The student commits to attending an early start, zero period class, and
- Students must maintain satisfactory attendance, consistent with their overall attendance record, to remain in zero period, and
- The seventh course must be selected from the courses listed below which include open elective and school service courses.

Drama (all levels)	String Orchestra	Wind Symphony	Advanced Video Production
Dance Production	Concert Orchestra	Wind Ensemble	Directed Studies
Choir	Philharmonic Orchestra	Technical Theater (all levels)	
Madrigals	Symphony Orchestra	ASB	
Canta Bella	Concert Band	Journalism (all levels)	
Marching Band	Symphonic Band	Photojournalism	

Please note that enrollment in 0 period or in these classes is not guaranteed. Prerequisites, limits on course enrollment numbers, and scheduling constraints apply.

University High School does not discriminate in enrollment in or access to any programs and activities. Admission to these programs is based on age appropriateness, class space, interest, aptitude, and prerequisite coursework (where applicable). The lack of English skills shall not be a barrier to admission to or participation in the High School's activities and programs. BP 5145.5

The Irvine Unified School District Governing Board desires to ensure equal opportunities for all students in admission and access to the district's educational programs, guidance and counseling programs, athletic programs, testing procedures, and other activities. District programs and activities shall be free from discrimination, harassment, intimidation, and bullying of any student based on the student's actual or perceived characteristics such as race or ethnicity, color, ancestry, national origin, nationality, ethnic group identification, age, religion, actual or potential parental, family, or marital status, or the exclusion of any person because of pregnancy or related condition, physical or mental disability, sex, sexual orientation, gender, gender identity or expression, or genetic information; the perception of one or more of such characteristics; or association with a person or group with one or more of these actual or perceived characteristics. This policy shall apply to all acts related to school activity or to school attendance occurring within a district school. (Education Code 234.1) BP 5145.5

2. Units of Credit/Variable Credit

University High School awards credit for a grade of "D" or better at the rate of 5 credits per class per semester.

Exceptions:

- Physical Education: a student who is unable to participate at least 70% of the time will earn credit for work accomplished on a variable credit basis.
- Community Experience: 40 hours of work plus specified related instruction = 1 credit; maximum of 5 credits per semester, 20 credits for graduation. (Juniors and Seniors only)
- ROP: 18 hours on-the-job training plus related instruction = 1 credit; maximum 10 credits per semester.
- Other courses which award variable credit: Special Day/Speech Language courses and Student Assistant courses.
- Students who enroll after the first day of each semester will receive partial credit based on their days of enrollment.

3. Attendance

The staff at University High School believes that regular attendance is essential to learning in the classroom. To this end an attendance policy has been established to affect improved attendance with persistent attendance infractions resulting in detentions, assignment to Saturday Schools, and referral to the district's Student Attendance Review Board (SARB). Parents and students have access to student attendance records through the district's on-line parent portal, MyIUSD.org. Parents are notified when excessive absences accumulate. The attendance office, counselors, and administrators, as well as the classroom teacher, are all willing to work with parents to improve student attendance.

Parents/Guardians must report their student's absences directly to the 24-hour attendance line. To leave a message, call 949-936-7601. Absences not reported within 3 days will be considered truant, and will result in follow-up with the Attendance

Dean and possible assignment to Saturday School. A student who must leave school early for an appointment (medical, dental, court, etc.) must obtain an early dismissal pass from the attendance office before leaving school. When checking-in late, students must check-in at the attendance office in order to receive a tardy pass to class. The attendance record cannot be changed after 3 days. Parents may view their student's daily attendance through a secure web-based access <https://my.iusd.org/abi>

4. Level Changes for a Course in a schedule

Last day to change a course level is the last day of week 4. (Example: from Honors or AP to College Prep)

Moving up is **different** than leveling down: A level change into an Honors or AP course requires a teacher recommendation. A level change into a CP course may be initiated by an administrator, teacher, or counselor and must have a teacher recommendation. In both situations, the change is contingent upon space availability. The student's grade will transfer with the student to the new class.

5. Adding Courses to a schedule

Semester Course: A student may add a course up to the last day of week 2 in a semester if space is available.

Quarter Course: A student may add at any time if space is available.

Students may be responsible to make up all work assigned from the 1st day of class as determined by the teacher. Arrangements for time allowed for make-up work is to be arranged with the teacher.

6. Withdrawal from Courses and Level Changes

Semester course:

A student may drop a course without penalty up to the last day of week 4 in a semester.

If a student withdraws from a course between weeks 4 and 7 of a semester, they will receive a Withdraw Pass/Fail grade on their transcript. (Grades: W/P – Pass; W/F = Fail). If a student withdraws from a course after week 7, they will receive an F grade on the transcript.

Quarter course:

A student may drop a course without penalty up to the last day of week 2 in a semester. If a student withdraws from a course after week 3, they will receive a Withdraw F (W/F) grade on the transcript.

7. Schedule Changes

Prior to schedule distribution, sufficient time is planned for students to make changes and adjustments to their schedules if necessary. The school will consider schedule changes for very specific reasons (i.e. balancing classes, changes to the master schedule, or the student is placed in the wrong class or level). Once the semester begins, schedules are considered to be final.

Changes will not be made for teacher preference. If a student alleges a conflict with a teacher, consideration for a change may be given only if a parent conference has occurred with the administrator, teacher and student working as a team to determine the best outcome for the student. Changes will only be made if space is available in other classes. This may necessitate multiple period, teacher, or class changes.

8. Repeating Courses

When a student repeats a course to improve his/her grade, credit for that course is only awarded once. If the course repeated originally earned a D or an F grade, and earns a repeated grade of C or better, the repeated grade is used in calculating the GPA. If a student repeats a course in which he/she received a C or better, the original and repeated grades are averaged for GPA calculation. In both cases the original grade remains on the transcript.

Courses in Pageantry or Colorguard, Pep Squad, Performing Arts, Physical Education, and special programs such as Leadership, Advanced Journalism and Yearbook, may be repeated for credit.

9. Concurrent Instruction

Concurrent Courses (including summer enrollment)

Students must obtain counselor permission to determine eligibility within two weeks of the start of a course. Current 9th grade students will not be approved for any college classes. In addition, students in any grade level will not be approved for courses which supplant the high school curriculum (e.g. English, World Language, Political Science, Math), unless the student does not have room in his or her schedule to take the required class. Whether the student has room in the schedule will be determined by the student's assigned counselor. Courses cannot be used for advancement into either a CP, Honors or AP level course.

To enroll in a Community College course the student must meet the prerequisites and complete a request form specific to the college and prior to enrollment in a course. The California Education Code provisions limit the number of eligible students that can be approved by the high school (Ca.Ed.Code 48800). Recommendation for summer session requires the students to meet all of the following:

Courses taken at a local community college that are required for high school graduation may be added to the UHS transcript, depending on prior approval. Courses taken to meet CSU or UC requirements will not be added to the UHS transcript as students need to report those transcripts directly to the four year college with their application.

Courses for enrichment, e.g. courses not otherwise offered by UHS, may be approved by the counselor based on student eligibility, but enrichment courses will not be placed on the high school transcript, per IUSD policy. Students should plan to send their non-UHS transcripts to the college or university to which they apply.

For units earned through concurrent instruction, at a college or university, no honors or advanced placement designation shall be made on the IUSD transcript. Grades may be transferred from Western Association of Schools and Colleges (WASC) or California Department of Education (CDE) accredited institutions only.

Physical Education (PE) transferable credit

<u>Community Course</u>	<u>High School Course</u>
PE credits	HS Credits
2.5	8.0
2.0	6.5
1.5	5.0
1.0	3.0
0.5	1.5

Determining transferable credit (not PE courses)

<u>College Course</u>	<u>High School Course</u>
Units (qtr or semester)	HS Credits
2.5 – 5.0	5.0
2.0	4.0
1.5	3.0
1.0	2.0
0.5	1.5

Online Courses

The course must be approved by the US Dept. of Ed., WASC or ASC accrediting agencies. Prior approval from an administrator or counselor is required. A maximum of 10 credits per year with a maximum of 40 total credits are accepted. A Pass grade will be awarded. Courses cannot supplant UHS curriculum and cannot be used for advancement into either a CP, Honors or AP level course.

Religious Credit

No credit for religious training, independent study or otherwise, will be awarded for students during the period of their enrollment in Irvine Unified School District.

Private Foreign Language

Units of elective credit shall be awarded based on the time spent in class. Pass/Fail grades will be awarded. The program of instruction must be on the approved IUSD list of foreign language programs. A maximum of 10 credits may be earned in this manner. Completion of the Private Instruction form obtaining prior approval from an assistant principal is required. Forms are available in the Records Office. Appropriate transcript entries shall be made. However, the course title used shall not appear on the University of California approved course list.

IUSD Alternative Education Programs

San Joaquin High School

All concurrent independent study enrollments through the district's independent study program or blended learning programs require prior approval from a counselor or administrator.

Adult School Concurrent Satellite Credit Recovery Program.

Enrollment in the Irvine Adult School Concurrent Satellite Credit Recovery classes requires permission from the student's counselor and administrator.

10. Grading Procedures

Grading Options

All courses at UHS are graded on an A to D scale for the earning of credits. The grade of F receives no credit.

Note these exceptions:

Pass/Fail Courses: (Student Assistant, Private Instruction, Community Experience, and Off-Campus Independent Study)

A student receives a grade of Pass (P) by meeting the minimum standards established by the teacher. A Pass evaluation is not computed in the student Grade Point Average. A Failure results in 0 grade points and is part of the Grade Point Average.

Reporting Periods

Progress Reports: Grade issued for those students earning a C- or lower in one or more classes at the end of the fifth week of each nine-week period. A progress report grade of D- or F indicates that the student is in danger of failing a course.

Quarter Grade Reports: Mid-term grades are issued during each semester. These progress grades show student status in the class at that time. These grade reports carry unit credit only in the case of quarter classes.

Semester Grade Reports: Final grades are issued at the end of each semester. These grades are recorded on the student's academic record and transcript.

Progress and Grade reports can be viewed on the district's secure web based parent portal <https://my.iusd.org/>

Grade Correction Policy

When grades are given for any course, the grade given to each student shall be the grade determined by the teacher of the course. The determination of the student's grade by the teacher, in the absence of error, shall be final. Teacher errors or data entry errors shall be corrected using the proper form, which are obtainable by teachers from the records office.

Grade Point Average

Grade Point Average (GPA) is a term that is used to indicate the average of a student's grades. The Principal's Honor Roll is designed to honor those University High School students who, at the end of each semester, have earned a 3.5 or above academic grade point average, and are enrolled in six classes.

Academic GPA: For selection of school honors including principal's honor roll, all grades except P.E./Athletics or any "P" grades from grades 9 through 12 are used.

Total GPA: All grades including P.E./Athletics from grades 9 through 12.

10-12 Academic GPA: UC/Cal State Eligibility Grade point average at University High School is computed as follows:

A = 4 points B = 3 points C = 2 points D = 1 points F = 0 points

Bonus points for AP and Honors courses (designated in this book by a ‡ symbol) use a calculation of a GPA for a given semester that reflect a grade point average using the typical 5-4-3 averaging system.

A = 5 points B = 4 points C = 3 points D = 1 points F = 0 points

Incomplete Grade (I)

A grade of incomplete is given by a teacher only when a student misses a final examination or does not turn in compulsory work due to illness or an excused reason beyond the student's control. The student must complete the course work to remove the incomplete. The student has nine weeks following the incomplete to complete the required work. If the course work is not completed in the allotted time during the nine weeks after which it is assigned, the incomplete is converted to a Failure (F).

11. Academic Honesty Policy

Students are expected to demonstrate honesty and integrity while in completing all assignments and assessments at University High School. Each student is expected to do his or her own work. This includes test taking, homework, class assignments, and the creation of original essays, compositions, term papers, artistic projects and scientific research. Sharing work with another student during a test, on in-class essays or other assignment, or on homework is considered cheating. If submitted work is not a true reflection of a student's own effort, thought, and ability, then the student has manifested unacceptable academic behavior. Any behavior which can be defined as cheating represents a violation of mutual trust and respect essential to education at University High School. (Academic Honesty Policy. B.P. 6010)

Consequences for violating the Academic Honesty Policy

The school and district have instituted a three tier sequence for Academic Honesty Violations, incorporating an education component in the administrative disciplinary actions. Students should be aware that consequences for this behavior may lead to being dropped from a class with an F grade on the transcript.

FIRST VIOLATION:

- The student is referred to the Assistant Principal and his/her parent is informed of the violation by the teacher.
- The student may receive a "0" on the assignment or assessment.
- Student is assigned to attend a Saturday School or participates in the alternative educational program.
- Alternative Program: In lieu of a Saturday School assignment, the student will complete a written assignment.

SECOND VIOLATION (DURING ANY CLASS OR TERM):

- The student is referred to the Assistant Principal and his/her parent is informed of the violation by the teacher.
- The student may receive a "0" on the assignment or assessment.
- Student is assigned to attend a 4 Hour Saturday School.
- Student is dropped from the class with an "F" grade or participates in the alternative educational program.
- Alternative Program: In lieu of being dropped from the class with an F grade, the student completes a written assignment.

THIRD AND SUBSEQUENT VIOLATION (DURING ANY CLASS OR TERM):

- The student is referred to the Assistant Principal and his/her parent is informed of the violation by the teacher.
- **Student dropped from the class with an "F" grade**

Definitions

Cheating: The use of notes, documents or answers during a test, or the copying of one student's completed assignments or answers by another; allowing another to do the same, or having access to information such as formulas, calculations, or notes. Giving or receiving limited help in trouble-shooting a part of an assignment is not normally considered cheating. However, allowing another student to write any part of an assignment, copying another's file or assignment, and excessive collaboration on assignments: all these are considered cheating (unless specifically approved otherwise). The student providing such assistance is considered to be cheating as well. Students should never allow another student to look at his/her assignment nor to borrow an electronic file.

Plagiarism: The use of another's words, ideas, or creative productions without assigning credit to the original source. To plagiarize is to take ideas or words of another person and pass them off as one's own. In short, it is stealing something intangible rather than an object. Obviously, it is not necessary to state the source of well-known or easily verifiable facts. But students are expected to acknowledge the sources of ideas and expressions they use in their written work, whether those expressions are quoted directly or paraphrased. To provide adequate documentation is not only an indication of academic honesty, but also a courtesy which enables the reader to consult your sources with ease. Failure to do so constitutes plagiarism.

12. Athletic and Extracurricular Eligibility

California Interscholastic Federation eligibility policies will govern the participation of all students participating in athletics in the Irvine Unified School District.

Students participating in any school sponsored activity which requires extensive time outside of the regular school day shall comply with eligibility requirements, including:

Athletic Team Sports
Associated Student Body (ASB)
Pep Squad
Color Guard
Performing Arts productions (including Drama, Orchestra, Band, and Dance competitions and performances).

Requirements:

- Participation
- Previous Quarter GPA >2.0
- Pass 4 classes in the previous quarter (20 credits)
- Current enrollment in at least 4 classes

Participants who do not maintain the required GPA and pass 4 classes are placed on academic probation for the subsequent quarter. Students on academic probation will work with school staff to monitor progress and provide guidance and support. Two consecutive quarters of failure to meet the GPA requirement for participation will result in ineligibility for the subsequent quarter. Ineligible status will continue until eligibility requirements are met. Students participating in athletics should be aware that changing schools without changing primary residences may jeopardize athletic eligibility.

During the four high school years, no student will be placed on academic probation more than once. Students not passing 4 classes are not eligible for academic probation and are ineligible from participation. BP 6145.2 Policy Adopted: 3/17/83, Revised: 8/27/2002

Notice of Non-discrimination in Athletics:

IUSD does not discriminate in enrollment in or access to any athletics program available. Admission to these programs is based on age appropriateness, team roster space, aptitude and meeting academic and behavioral eligibility requirements. The lack of English skills shall not be a barrier to admission to or participation in the District's activities and programs. IUSD's facilities and equipment provided for students are comparable and equitable to both sexes without disparity or imbalance, consistent with his or her gender identity, irrespective of the gender listed on the pupil's record. For additional information see www.iusd.org (Board Policy 5145.5)

13. Graduation Requirements

Detailed information about graduation requirements are reviewed during 10th grade counselor conferences. These meetings focus on post high school goals and course planning to ensure a path is set to meet all graduation requirements.

Credits

Students must complete a total of 215 credits.
Each semester course passed earns 5 credits.

Each quarter course passed earns 2.5 credits.

Graduation Course Requirements

Students must complete the following course work:

English.....40 Credits

Math..... 20 Credits

Must include Algebra 1/Math 1

Science 20 Credits

Life Science (10 credits)/Physical Science (10 credits)

Social Science30 Credits

Global Perspectives (10 Credits)

United States History (10 Credits)

Political Science/Economics (10 Credits)

- A full year of Virtual Enterprise also will satisfy the Economics requirement

World Language or Visual/Performing Arts or Career Technical Education Course 10 Credits

Health5 Credits

Physical Education20 Credits

Elective Credits70 Credits

Total215 Credits

14. Participation in Graduation

A student may participate in the Commencement Ceremony provided he/she meets all graduation requirements prior to the commencement ceremony and meets all requirements of any behavior contract established with an administrator.

The student may still earn a University High School Diploma if the following condition is met: a contract outlining a plan for the completion of completed graduation requirements is signed by the counselor, parent, student and principal. This student may not participate in the commencement ceremony.

All appropriate transcripts must be submitted to the Records Clerk at a date determined by the students administrator in order to earn a University High School diploma.

15. Honors at Graduation

Summa Cum Laude: Seniors with an academic GPA of 4.4 and above at the end of seven semesters will graduate with "highest distinction." At Commencement these students will wear silver cords. A student must have four semesters of letter grades to be eligible.

Magna Cum Laude: Seniors with an academic GPA of between 4.0 and 4.39 at the end of seven semesters will graduate with "great distinction." At Commencement these students will wear blue cords. A student must have four semesters of letter grades to be eligible.

Cum Laude: Seniors with an academic GPA of between 3.75 and 3.99 at the end of seven semesters will graduate with "distinction." At Commencement these students will wear navy blue cords. A student must have four semesters of letter grades to be eligible.

16. California Scholarship Federation

The California Scholarship Foundation is a scholastic scholarship institution in the state of California with a chapter at University High School. Membership is based on scholarship in academic subjects and citizenship. Members fulfill the academic requirements for CSF membership and participate in chapter activities.

To become a member of this organization the student must submit an application during each semester the student is eligible and earn sufficient points from a pre-approved course list. Visit the CSF web site or contact the faculty advisor for more information about membership and deadlines to apply. <http://www.csf-cjsf.org>

17. Community Service

The benefits of a community service experience for high school students are well known and include not only significant contributions to the community, but also personal growth rewards that cannot be achieved in other ways. Many high school students, whether community service is a formal part of their program or not, make special note of volunteer experiences on their college applications. This background is well received by college admissions officers for students who have made substantial contributions of time and talent to charitable organizations.

Irvine Unified School District recognizes graduates who voluntarily engage in at least 25 hours of community service during the school year in any given year prior to graduation. Service will be noted on student transcripts as "community service" for each

year that a student completes 25 hours. This notation does not list hours served, nor does it specify the nature of the volunteer work.

To receive a notation on the transcript for the current year, completed Community Service forms must be received by the College and Career Center four weeks before the end of the school year.

18. College and Career Resources

The College and Career Center at University High School provides students and parents with a wealth of resources relative to both career pursuits and college admission. The Career Center offers many valuable resources to help select colleges or career pathways. Students are encouraged to use the center on a regular basis to acquire knowledge that will be essential in making informed decisions about their future.

19. Coastline Regional Occupational Program (ROP)

The Coastline Regional Occupational Program (ROP) provides practical, hands-on career exploration and career guidance to high school students. Career pathways offering a wide variety of career preparation courses are available to students who are at least sixteen years of age or in their junior and senior years.

ROP courses may give students an edge in obtaining entrance into a variety of occupational settings and/or related college/university majors. Examples of the value of the ROP experience for a university/college bound student may be evidenced in a variety of ways, i.e., letters of recommendation from professionals in the field, employability in a career-related area during the university/college years, experience to make appropriate career decisions, etc.

See the ROP Coordinator or your counselor for additional information and current listings of courses offered and locations. More information is available on the Coastline ROP web site <http://www.coastlinerop.net>

Post High School Information

All information contained herein is for educational purposes only. Every effort has been made to provide accurate third party information, including colleges, universities, schools and agencies. Students and parents should be aware that published dates, requirements and other information may have changed since publication of this course catalog. Students and parents are advised to always obtain current information directly from the college or organization resources.

College Entrance Requirements

Below are listed minimum entrance requirements for the three tax-supported California post-high school institutions. Private schools and programs or conditions within the institutions listed may require more specific criteria. Admission to most colleges and universities is partly dependent on entrance examinations taken in the junior year or during the senior year. Refer to the program web sites for more information.

Community College

The California Community College System serves 2.6 million students at 110 college campuses throughout California. Most community colleges, like four year institutions, provide a large variety of services to assist students in pursuing their educational and career goals. Refer to the official community college web site for specific information for each campus, <http://www.cccco.edu/>. The community college matriculation program includes placement testing in English language arts, college reading, and mathematics. Orientation helps students select classes and understand the transfer process.

Community College Transfer Program

High school graduates may attend a public community college. Community colleges and the universities collaborate to ensure a smooth transition from the community college to the college or university. Students should discuss their plans with a community college counselor. Refer to the Assist web site for more information about transfer options, <http://www.assist.org>

Community College Vocational Program

The community colleges provide a variety of vocational programs lasting from six months to two years. Students earn certificates upon completion of programs.

Five steps to enrolling at the Community College:

1. Apply: Each college has an on-line application process. Some colleges have an early admission program.
2. Testing: Make an appointment for placement testing as soon as the application is submitted, or take advantage of testing opportunities that are offered at our high school.
3. Orientation/advisement: After testing is completed, arrange to complete the orientation program.
4. Registration: You will be given an appointment time line for registration. You may register on that date or any time afterward.
5. Counseling: Make an appointment for counseling to discuss career goals, transfer programs, or to update your program.

A hint for easier registration: Get a jump start on registering for classes by taking a spring or summer school course at the community college (on the campus or on-line) or apply early, a student will be given an earlier registration appointment as a continuing student and avoid the later registration "crush" with all new students. Students who participate in special programs provided by the community colleges may also receive priority registration.

College/University Admissions Testing

Most 4-year colleges and universities in the United States require students to complete a college admissions test as part of the application procedure. These tests are either the ACT or the SAT. The admissions testing requirements for specific colleges and universities should be verified with each institution. The web sites for the California public universities are listed below.

ACT web site: <http://www.act.org>

SAT web site: <http://www.collegeboard.org/>

California State University (requirements):

1. High school diploma
2. Subject Requirement: 15 yearlong college preparatory courses, passed with a "C" or better

English4 years
Mathematics3 years
(Math I, Math II, Math III) All students are encouraged to continue taking mathematics through the senior year)
Social Science2 years
(1 year of US History, or 1 semester of US History and 1 semester of Political Science, and 1 Year of World History)
Science.....2 years
with laboratory (one biological science and one physical science)
Foreign Language2 years
(in one language other than English)
Visual and Performing Arts1 year
Academic Elective.....1 year
(Selected from the above areas)

3. Admissions

Refer to the school web site for information about admissions tests, scholarship and academic eligibility requirements. An interactive eligibility calculator is available at <http://www.csummentor.edu/>.

University of California (requirements):

1. High school diploma.
2. Subject Requirement

To satisfy the subject requirement, students must complete the high school courses listed below with a grade point average defined by the Scholarship Requirement. This sequence of courses is known as the "a-g" requirements. To be acceptable to the University, the courses must appear on a list certified by the high school principal as meeting the University's minimum admissions requirements.

a) History/Social Science: 2 yrs. required

Two years of history/social science, including one year of World History, Cultures or Geography; and one year of US History or one-half year of US History and one-half year of American Government/Civics.

b) English: 4 years required

Four years of college preparatory English. Students may only use 1 year of ESL/ELD English. Not more than two semesters of grade 9 English can be used to meet this requirement.

c) Mathematics: 3 years required , 4 years recommended

Three years of college preparatory mathematics that includes the topics covered in Math I, II, and III.

d) Laboratory Science: 2 years required, 3 recommended

Two years of laboratory science, including two of the three fundamental disciplines of Biology, Chemistry and Physics.

e) Languages other than English: 2 years required, 3 recommended.

Two years of the same language other than English.

f) Visual & Performing Arts: 1 year required

One year of same course.

g) College Preparatory Electives : 1 year required

One year (two semesters), in addition to those required in "a-f" above, chosen from the following areas: visual and performing arts, history, social science, English, advanced mathematics, laboratory science, and in languages other than English, a third year in the language used for the "e" requirement or two years of another language.

3. Admissions

Refer to the school web site for information about admissions tests, scholarships, and academic eligibility requirements. For yearlong courses, both semesters are accepted. An interactive eligibility calculator is available on the UC web site under the admissions and freshmen link. <http://www.universityofcalifornia.edu/>

The University High School UC approved course list is available on the Internet and listed in this course catalog.

‡ denotes courses that have been approved for extra honors credit: a=5, b=4, c=3

Independent Colleges and Universities

The hundreds of independent, privately supported institutions in the United States have a wide range of opportunities. Since tuition is paid by the student rather than public tax dollars, the cost to the family may be greater than the cost in a public university. Financial aid may be more available than at a public university. In addition to the typical admission requirements of subjects, grades, and test scores, independent colleges often look more closely at individual students by requiring letters of recommendation and, sometimes, personal interviews.

There are great differences in size, educational purpose, and emphasis among these institutions. Some are large and offer both undergraduate and graduate programs; most are relatively small and offer students a personalized campus community life. Some campuses may stress a particular vocation or religious emphasis. Specific information about the requirements and educational opportunities available at many independent colleges in the United States is available in the College and Career Center and through the school web sites.

Trade and Technical Schools

Over 10,000 private vocational schools offer a variety of career training and choosing a school is no easy matter. Admission requirements for these schools vary, as do tuition costs. Accreditation is an important indicator because an accredited school has passed a thorough examination of its business practices and teaching ability by an accrediting agency. Students are encouraged to compare programs with those offered by the California Community Colleges.

Military Opportunities

Advantages of military service include educational and career training (technical and professional); travel; medical and dental care; guaranteed pay; promotion opportunities; and access to a cadre of trained consultants and counselors, with wide resources and references.

Military Scholarships and Student Aid Programs

If you are willing to serve for a period of time in the U.S. Army, Navy, Air Force, or Marine Corps, you will find that some very generous scholarships and student aid programs are available to you. In some cases, you can receive an education first, and serve an equivalent amount of time in the military after you graduate. There are also programs that permit you to enter the service first, and accumulate money for an education while you complete your enlistment period. All of the military services participate in the Montgomery GI Bill Program supporting academic, vocational, technical, and independent study.

Visit the academy websites for information regarding admission requirements and the application process. In order to be considered for admission, except for the Coast Guard, you will need to obtain a Congressional Nomination. Begin seeking nominations in the spring of your junior year. The academy web sites provide information on how to obtain a nomination.

United States Military Academy Locations:

Air Force Academy: Colorado Springs, CO	www.usafa.af.mil
Coast Guard Academy: New London, CT	www.cga.edu
Merchant Marine Academy: Kings Point, NY	http://www.usmma.edu/
Naval Academy: Annapolis, MD	www.usna.edu
U.S. Military Academy, West Point, NY	www.usma.edu

ROTC scholarships

As a back-up, you should apply for a ROTC scholarship if you are applying to an academy. You must apply to and be accepted by the college of your choice offering ROTC. Contact an academy liaison office and develop plans to meet all academy requirements and timelines for admission.

Athletics and Team Sports

The athletic program is designed for students who wish to participate in interscholastic competition. The goals of the athletic program are as follows:

- To teach the athletic skills of specific sports
- To build student responsibility and self-discipline
- To develop good sportsmanship among students
- To develop in each student a competitive team spirit

League

University High School is a member of The Pacific Coast League and is also a member of the C.I.F. Southern Section. The league includes Beckman High School, Portola High School, Irvine High School, Northwood High School, University High School, and Woodbridge High School.

Notice of Non-discrimination in Athletics

University High School does not discriminate regarding enrollment in or access to any athletics program available. Admission to these programs is based on age appropriateness, team roster space, aptitude and meeting academic and behavioral eligibility requirements. The lack of English skills shall not be a barrier to admission to or participation in the District's activities and programs. IUSD's facilities and equipment provided for students are comparable and equitable to both sexes without disparity or imbalance, consistent with his or her gender identity, irrespective of the gender listed on the pupil's record. For additional information see www.iusd.org (Board Policy 5145.5)

Requirements for Participation

Students must:

1. Have a C (2.0) grade point average and have earned at least 20 units of new work during the quarter grading period preceding participation. For eligibility calculations all courses are treated as 5 unit classes.
2. Maintain a C average during the team's competitive season and all students must be enrolled in at least five classes.
3. Be successful in the team's try-out procedures.
4. Adhere to any and all school and team rules concerning the participation in any sport and meet all requirements for OSS, if enrolled.

Procedures to Participate

Sports are not placed on a student's class schedule until an official roster is submitted by the coach after tryouts. An exception is made if a student has officially participated in a previous season of the athletic team. In the case of returning students, he/she must register for that sport along with other course selections. Sports registration and try-out information will be posted at www.universityhigh.org/athletics and in the athletic office. Students successful in try-outs will be scheduled for the appropriate athletic sport; others will be scheduled in Physical Education.

Athletic Clearance

To participate in summer camp, try-outs or practices, all students must complete the clearance process at www.athleticclearance.com, upload a sports physical (must be dated AFTER May 1st, 2018), and submit the signed Confirmation page from www.athleticclearance.com to the athletics office. For more detailed instructions, please visit www.universityhigh.org/athletics. Students must be cleared prior to any participation in summer camps, try-outs or practices. If a student is cleared for summer camp, they will be cleared for the year.

Time commitment

A student who joins an athletic team is scheduled into one period of athletics during the school day. In addition to this period, the student is required to practice before school or after school with the team and to attend all scheduled events during the team's competitive season. Athletes must participate the entire season and/or quarter in order to receive full credit.

Withdrawal from an athletics course

An athlete may withdraw from an athletic team without penalty if he/she drops the team prior to the date of the first allowable contest as defined by CIF for each athletic season (specified below) or as specified in the CIF Blue book (www.CIFSS.org).

Fall 2018 season:	Friday, September 7, 2018
Winter 2018 season:	Monday, November 12, 2018
Spring 2019 season:	Friday, February 22, 2019

Grade reporting for an athletic team will be based on completion of a season, not a particular quarter. Therefore, if a student were to drop or quit a team after the above dates, this would be reflected as a withdraw fail (W/F) in the student's current quarter grade.

Students in need of PE credit will be placed in OSS if they have previously participated in, and plan to continue to participate in another sport. If this is not the case, they will be placed in an alternative PE class necessitating further changes to their class schedule. Continued enrollment in OSS is based on adhering to the expectations of the class.

Physical Fitness Test

All students, including students enrolled in athletics and PE Private Instruction, are required to take the California Physical Fitness Test and pass five out of the six fitness areas. The test is first given in grade 9, during the spring semester. Students not passing at least 5 out of the 6 fitness areas are required to enroll in a Physical Education course each of the following years and retake the fitness test until the student meets the passing criteria. The six fitness areas tested are:

- Aerobic Capacity
- Abdominal Strength and Endurance
- Upper Body Strength and Endurance
- Body Composition
- Trunk Extensor Strength and Flexibility
- Flexibility

NCAA approved list of courses

Refer to the NCAA web site for specific information about Division 1 and Division II requirements. <http://ncaa.org>
The NCAA requirements for college-bound athletes include the criteria listed below.

1. Complete 16 core courses (10 must be completed before the 7th semester of high school, 7 must be English, Math or Science courses.
2. Minimum GPA of 2.3
3. Meet the competition sliding scale requirement of GPA and ACT/SAT score
4. Graduate from High School

Sports Seasons

The season of a sport is that time period between the first inter- school contest and the final contest for that particular sport. The seasons are Fall- August through November, Winter-November through February, Spring- February through June.

<u>Fall Sports</u>	<u>Try Outs</u>	<u>Winter Sports</u>	<u>Try Outs</u>	<u>Spring Sports</u>	<u>Try Outs</u>
Cross Country, Boys & Girls	Yes	Girls Basketball	Yes	Boys & Girls Track	Yes

Girls Volleyball	Yes	Boys Soccer	Yes	Softball	Yes
Girls Golf	Yes	Girls Soccer	Yes	Baseball	Yes
Boys Water Polo	Yes	Wrestling	No	Boys Golf	Yes
Football	No	Girls Water Polo	Yes	Boys Volleyball	Yes
Pep Squad	Yes			Boys Lacrosse	Yes
				Girls Lacrosse	Yes
				Pep Squad	Yes

Athletic Team Sports: Boys and Girls (each team sport is described below)

Credits: 2.5 units per quarter

(Fulfills PE requirement)

Grade Level: 9-12

Length: 1 or 2 quarters

Prerequisites: vary by sport

Successful completion includes meeting the time commitment stated above as well as full participation in the physical activities during the time the sport is in season. At the completion of a sport, students with on-campus coaches will remain with the team in related activities. Students with off-campus coaches will transfer to off season sports.

Baseball

Competition is offered on the Frosh/soph, Junior Varsity, and Varsity levels. Athletes will have an opportunity to play in competitive situations in both single game and tournament play. Fundamentals and team play will be stressed.

Basketball: Boys and Girls

Competitive opportunities are offered for both Boys and Girls teams on the freshmen, Frosh/soph, Junior Varsity and Varsity levels. Athletes will have the opportunity to compete in tournaments and single games. Team play in all situations will be stressed on both offense and defense.

Cross Country: Boys and Girls

Competitive opportunities are offered on the Frosh/soph, Junior Varsity, and Varsity levels. Athletes will be given the opportunity to compete in both dual and invitational meets. Runners will be expected to train under a well-structured program to prepare them to safely compete in long distance races.

Football

Competitive opportunities are offered with freshmen, Junior Varsity and Varsity teams. Athletes will be trained in the proper fundamentals of receiving, passing, running, blocking and tackling. Off-season weight training and agilities will be heavily stressed of all players in the program.

Golf: Boys and Girl

Golf is offered on the Varsity level only. Players will compete in tournament as well as dual single matches.

Off Season Football

All participants in the off-season football class must participate in spring practice. Failure to do so will result in a W-F grade. The off-season football class is structured to prepare participants for the up-coming football season. This class is only for students who are playing football next season.

Lacrosse: Boys and Girls

Competitive opportunities are offered for both Boys and Girls teams on the Junior Varsity and Varsity levels Athletes will have the opportunity to compete in tournaments and

single games. Fundamentals and team play will be stressed on both offense and defense.

PEP Squad

The Pep Squad is chosen through competitive tryouts in the spring semester. The students perform at athletic contests, assemblies and community events. The purpose of the Pep Squad is to foster positive attitudes toward all competitive sports, support our athletes, and bring pride and school spirit to the school.

Soccer: Boys and Girls

Competitive opportunities are offered for both Boys and Girls teams on the Frosh/soph, Junior Varsity and Varsity levels. Athletes will have the opportunity to compete in tournaments and single games. Fundamentals and team play will be stressed on both offense and defense.

Softball

Competitive opportunities are offered on the Junior Varsity and Varsity levels. Opportunities will be given to athletes to compete in both tournament and single games.

Swimming: Boys and Girls

Competition is offered on the Junior Varsity and Varsity levels. Athletes will compete in relay and dual meets. A great deal of training will be required for successful competition which may include more than one practice per day.

Tennis: Boys and Girls

Competitive opportunities are offered on the Frosh/soph, Junior Varsity and Varsity levels. They will have an opportunity to compete in individual and team tournament play as well as dual match competition.

Track and Field: Boys and Girls

Competitive opportunities are offered for both Boys and Girls teams on the Frosh/soph, Junior Varsity and Varsity levels. Athletes will have the opportunity to compete in invitational in both individual and team events as well as compete in team dual meets. There are no limits placed on the number of athletes who may compete and all are welcome who try out.

Volleyball: Boys and Girls

Competitive opportunities are offered on the Frosh/soph, Junior Varsity and Varsity levels. Athletes will be given the opportunity to compete in pool play tournaments as well as single game matches.

Wrestling

Competitive opportunities are offered on the Frosh/soph, Junior Varsity and Varsity levels. Athletes may compete in individual and team tournaments as well as dual meet matches. Due to the high degree of training and weight control required for this sport, athletes will be required to follow strict training methods.

Water Polo: Boys and Girls

Athletes will have the opportunity to compete on the Frosh/soph and Varsity levels. Players may be able to compete at the Novice or Junior Varsity levels if the number of players warrants that level. Athletes will compete in both tournament and single game competition. Training may include more than one practice per day.

Off-Season Sports (OSS)

This class is offered only to athletes who have either been granted permission by their coach or have participated on a team at University High school the previous season. This class prepares and develops an athlete's condition prior to and following their athletic team season. Emphasis is placed on the development of cardiovascular endurance, agility, flexibility, and strength. Three (3) unexcused non-suited or lack of participation will result in the student being dropped from the class. These standards are higher than a regular PE class as this class is a privilege for athletes to either remain in shape for the upcoming season or stay in shape after their season has ended. If a student is medically unable to meet the expectations of the class, they will be transferred to another class.

All Athletes in OSS must have completed their athletic packet within the 2nd week of the start of the grading period and have a signed parent/athlete contract or they will be dropped from OSS.

Business and Career Technical Education

Business and Career Technical Education courses prepare students for college or university and community college degrees, certificate programs, or employment in one of California's fifteen industry sectors. CTE courses offer students an opportunity to attain the skills needed for successful entry into challenging jobs. These courses assist students in exploring potential careers and developing the skills in specific industry sectors as well as foundation skills needed to be successful in any career, including career planning and management, leadership and teamwork.. The University of California has approved many CTE courses as meeting the a-g requirements.

Business and Career Technical Education course offerings include courses leading to careers in the industry sectors of; Arts, Media and Entertainment; Transportation; and Finance and Business. The Irvine Unified School District works in collaboration with the Coastline Regional Occupation Program (ROP) to support many of the CTE courses offered on our campus. Coastline ROP offers additional course options after school and during the summer at various campuses in the county. The ROP Coordinator can assist students in enrolling in these courses.

Career Technical Education courses qualify for high school graduation as meeting the 10 credits in World Language, or Visual/Performing Arts or Career Technical Education Course.

Age Criteria for enrolling in an ROP (Coastline Regional Occupation Program) course:

Students must be 16 years old or 15 years old as long as the student meets the prerequisites and receives career counseling.

Business and Career Technical Education Course offerings

See additional course offerings through the Visual and Performing Arts Department.

Course Title	UC a-g	Bonus Pt ‡	Length Year Semester	Prerequisites	Grade Low	Grade High
Introduction Auto (ROP)			S	None. Meet the ROP age criteria	10	12
Advanced Auto (ROP)			S	Introductory Automotive and teacher permission, and meet the ROP age criteria	10	12
Virtual Enterprise (ROP)	g		Y	Teacher permission and meet ROP age criteria	11	12
Music Technology (ROP)	f		Y	Teacher permission and meet ROP age criteria	11	12
Intro to Engineering Design	g		Y	None.	9	12
Principles of Engineering	g		Y	Completion of Math I Recommended.	9	12
Advanced Engineering	g		Y	Completion of Intro to Engineering or Principles of Engineering	10	12

Introductory Automotive

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 semester

Prerequisites: Meet the ROP age criteria

This course is recommended for students with an interest in the operation of the automobile or for those who wish to pursue the automotive field as a career. The student will be introduced to the design, function, and operation of the various systems within the automobile. About 50 percent of the course will be lecture-demonstration, and 50 percent will be practical lab experience. Mathematics to be stressed will include: metric and English measurements, engine volume/displacement computations and interpretation of horsepower and torque output charts.

Upon completion of the course, the student will be able to:

- Perform a minor electrical engine tune-up; Know the engine and its systems: ignition, power train, suspension, and braking
- Identify engine parts and describe the operation
- Perform minor servicing on the automobile
- Troubleshoot problems of the automobile.

Advanced Automotive

Credits: 5 units per semester

Grade Level: 10-12

Length: Spring Semester/ and Year long

Prerequisites: Introductory Automotive and teacher permission, and meet the ROP age criteria

This course is designed for the advanced occupationally oriented student. The course provides training and inspection for students who wish to enter the automotive industry.

Upon completion of the course, the student will be able to:

- Service brake systems
- Service ignition systems
- Service lubrication systems
- Service engine systems
- Service light body repair
- Service drive line systems
- Train for vocational and occupational employment
- Train for a school to work transition.

Virtual Enterprise (ROP)

Credit: 5 units per semester

Grade level: 11-12

Length: 1 year

Prerequisites: Meet the ROP age criteria

In this course, students will create and operate a virtual business modeled under the US Network of Virtual Enterprises, International. A "Virtual Enterprise" is a simulated business that is set up and run by students to prepare them for working in a real business environment. With the guidance of a teacher ("consultant") and real-world business partners, the students determine the nature of their business, its products and services, its management and structure, and engage in the daily operations of running a business. Emphasis is placed on using current business software, communications, and the Internet for business transactions. Students will participate in trade fair competitions organized through California Virtual Enterprise network. Additionally, the Virtual Enterprise course establishes classroom/ business norms from the Career Technical Education standards. They include skills in Communication, Career Planning and Management, Technology, Problem Solving and Critical Thinking, Responsibility, Ethics, Leadership and Teamwork. Students in Virtual Enterprise will apply academic knowledge to solve business problems and prepare for their future employment opportunities.

Students who complete the full year of this course may use credit earned to fulfil Economics requirement for graduation.

Music Technology

Credit: 5 units per semester

Grade level: 11-12

Length: fall semester or year

Prerequisites: Ability to play piano or guitar and teacher permission.

This is a practical course using computer software and electronic instruments to transform an idea into a sound. Students will explore music in the media arts including TV, film, advertisements, games. Students will use both their musical and technological creativity to create music compositions. Using sequencer and editing software, students will record audio or MIDI (Musical Instrument Digital Interface) musical compositions.

Upon completion of this course, students will be able to:

- Demonstrate an understanding of industry standards for producing music technology
- Record original work using electronic instruments
- Use sequencing software to create a music composition for a variety of projects
- Demonstrate an understanding of the processes of synthesizing
- Produce master tapes and CDs; produce live sound using mixing boards/effects producers
- Demonstrate that the parameters of music can be controlled using MIDI
- Understand copyright laws related to the music industry

Create an electronic compositions specific for different media (i.e. Movie trailer, advertisement, school broadcast news, etc.).

Introduction to Engineering Design

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Concurrent enrollments in Math 1 recommended

Introduction to Engineering (IED) is a high school level course that is appropriate for 9th to 12th grade students who are interested in design and engineering. The major focus of the course is to expose students to design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation. It gives students the opportunity to develop skills and understanding of course concepts through activity-, project-, and problem-based (APPB) learning. Used in combination with a teaming approach, APPB-learning challenges students to continually hone their interpersonal skills, creative abilities and understanding of the design process. The course assumes no previous knowledge, but students should be concurrently enrolled in college preparatory mathematics. Students will employ engineering and scientific concepts in the solution of engineering design problems. In addition, students use a state of the 3D solid modeling design software package to help them design solutions to solve proposed problems. Students will develop problem-solving skills and apply their knowledge of research and design to create solutions to various challenges that increase in difficulty throughout the course. Students will also learn how to document their work, and communicate their solutions to their peers and members of the professional community. Introduction to Engineering Design™ is one of two foundation courses in the Project Lead The Way® high school pre-engineering program. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology.

Principles of Engineering

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Completion Math 1 recommended

Principles Of Engineering (POE) is a high school-level survey course of engineering. The course exposes students to some of the major concepts that they will encounter in a post-secondary engineering course of study. Students have an opportunity to investigate engineering and high tech careers. POE gives students the opportunity to develop skills and understanding of course concepts through activity-, project-, and problem-based (APPB) learning. Used in combination with a teaming approach, APPB learning challenges students to continually hone their interpersonal skills, creative abilities, and problem solving skills based upon engineering concepts. It also allows students to develop strategies to enable and direct their own learning, which is the ultimate goal of education. To be successful in POE, students should be concurrently enrolled in college preparatory mathematics. Students will employ engineering and scientific concepts in the solution of engineering design problems. Students will develop problem-solving skills and apply their knowledge of research and design to create solutions to various challenges. Students will also learn how to document their work and communicate their solutions to their peers and members of the professional community. Principles Of Engineering is the second of two foundation courses in the Project Lead The Way high school engineering program. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology.

Advanced Engineering

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: Completion of either Introduction To Engineering or Principles of Engineering.

In this class students work in teams on various STEM projects that are offered by the community. Examples of projects include Irvine CubeSat, OC Maker Challenge, C-STEM Linkbots, UCI Rescue Robotics, UCI Race Car Performance Engineering, VEX Robotics, Hydrogen Horizon Automotive Challenge, and others. All projects have deliverables which are due in April/May and involve some kind of culminating activity such as a competition between teams. This class is intended for students who want flexibility and freedom to determine the pace of learning and explore different technologies.

English

English curriculum develops reading, writing, speaking, and listening skills. The integration of literature, the Common Core Standards and the California State Content Standards are the core of the curriculum for all students. Through reading, class discussion, and writing experiences, students will develop in vocabulary, comprehension, and critical thinking skills.

Enrollment in an Honors or Advanced Placement English course requires prerequisite skills indicating the student is prepared for the advanced English course. Refer to the chart below to determine eligibility. In cases where more performance data is needed to help determine which course will promote student success, students may be asked to take a placement test. Placement tests are held in the spring semester for currently enrolled students and during the fall semester registration for transfer students. Refer to the school website for date, time and location.

Successful Honors/AP English Students have the following prerequisite skills:

- The student completes assignments, including reading, on time.
- The student actively engages in class on a regular basis.
- The student seeks and applies constructive criticism to improve performance.
- The student's writing consistently demonstrates understanding of grade level curriculum.
- The student's writing demonstrates control of the English language (syntax, diction, grammar, punctuation, etc.).

Criteria for English Honors/AP Placement

Current Course Enrollment	Criteria	Placement Process
UHS English Honors or AP English course	Student regularly demonstrates prerequisite skills, earns B or higher on summative essays, and has teacher recommendation.	May enroll in Honors English or AP English.
UHS English Honors or AP English course	Student regularly demonstrates prerequisite skills, earns B-'s on summative essays, and has teacher recommendation.	1. The student meets with current Honors/AP English teacher to verify that the student has demonstrated the prerequisite skills identified above for Successful Honors/AP English Students. 2. The student takes a placement exam to determine the course best suited for student success.
UHS CP English course	Student regularly demonstrates prerequisite skills, earns A-'s on summative essays, and has teacher recommendation.	May enroll in Honors English or AP English course.
UHS CP English course	Student regularly demonstrates prerequisite skills, earns A-'s on summative essays, and has teacher recommendation.	1. The student meets with current Honors/AP English teacher to verify that the student has demonstrated the prerequisite skills identified above for Successful Honors/AP English Students. 2. The student takes a placement exam to determine the course best suited for student success.
Students transferring from another school	Most recent Honors/AP English course grade is A. Most recent English course has a strong literary analysis and writing component.	1. The student meets with his/her counselor who verifies that the student has the academic record to be successful in an Honors or AP English course at UHS. 2. The student takes a placement exam to determine the course best suited for student success.

English Program

Student progression through University High School's four year English program is flexible; course of study is based on teacher recommendation and students' prerequisite skills, grades, needs, and goals. Please refer both to course descriptions and the Successful Honors/AP prerequisite skills and criteria for placement when planning a four-year program.

Core Grade-Level Course Options	
Freshmen	Honors English 1 or English 1 CP
Sophomores	Honors English 2 or English 2 CP
Juniors	AP English Language & Composition*, English 3 CP*, or Writing Across the Genres 3 CP yearlong
Seniors	AP English Literature & Composition, English 4 CP, Creative Writing/Graphic Novel, ERWC 4CP, or Career Prep

****Either English Language and Composition or English 3 CP is a required prerequisite for AP English Literature and Composition.***

English Elective Options**						
Freshmen		Sophomores		Juniors		Seniors
Beginning Journalism- yearlong (g)		Beginning Journalism- yearlong (g) or Advanced Journalism- yearlong (g)		Beginning Journalism- yearlong (g) or Advanced Journalism- yearlong (g)		Beginning Journalism- yearlong (g) or Advanced Journalism- yearlong (g)
				Creative Writing- 1 sem. (b)		Creative Writing- 1 sem. (b)
				Graphic Novel- 1 sem. (b)		Graphic Novel- 1 sem. (b)
				Writing Across the Genres 3 CP- 1 sem. (b)		ERWC 4 CP- 1 sem. (b)

*****9th-11th grade students must take semester-long English electives concurrently with a core grade-level English course.***

English Course Offering Prerequisites

Course Title	UC a-g	Bonus Pt ‡	Length Year Semester	Prerequisites	Grade Low	Grade High
English 1 CP	b		Y	9 th grade status	9	9

English 1 CP

Credits: 5 units per semester

Grade Level: 9

Length: 1 year

Prerequisites: 9th grade status

Structured around the study of genres, this literature and writing program asks students to construct meaning in their study of fiction and non-fiction that is relevant to their own lives and to their work in other disciplines. Students respond to their reading in the form of written analysis, group discussion and formal presentation. Student writing takes the form of both explanatory/informative and persuasive essays; the sequence of assignments moves students from the basics of paragraph construction through to the production of substantially more complex multi-paragraph essays. Students are also given the opportunity to develop creative writing skills. The vocabulary program is literature-based but also involves the study of Latin and Greek etymology. The language skills program identifies various skills important to the development of students' sentence-level control in writing.

In terms of standards performance outcomes, the English 1 program focuses primarily on the development of critical thinking/problem solving, communication a interpretation.

Upon completion of this course, a student will be able to:

- Read and study multiple genres of literature (poetry, short stories, novels, drama) with an emphasis on beginning literary analysis
- Learn and practice active reading skills, including, but not limited to, decoding difficult text and annotating works for theme, character, plot, and literary device
- Develop and polish academic writing skills, advancing from single paragraph response to literature to fully-developed essays
- Apply new and developing skills in writing original creative pieces, such as narratives and poetry.
- Increase and implement vocabulary and etymology knowledge.
- Demonstrate level-appropriate correct usage of grammar, spelling, and punctuation rules.
- Think critically and communicate effectively at a level appropriate for students' age/maturity.

Honors English 1

Credits: 5 units per semester

Grade Level: 9

Length: 1 year

Prerequisites: Placement based on performance in 8th

Grade English course and teacher recommendation. Refer to the Criteria for English Honors/AP Placement

Like the English 1 College-Prep program, English 1 Honors is genre-based in focus; however, it offers students a closer and more representative study of world literature, and it challenges them to reach a sophisticated level of critical analysis possible only through rigorous discussion and significantly more complex writing assignments. Additional emphasis is placed on language and vocabulary skill development. In terms of performance outcomes, the English 1 program focuses on the development of critical thinking/problem solving, communication and interpretation.

Upon completion of this course, a student will be able to:

- Read and study multiple genres of literature (poetry, short stories, novels, drama) with an emphasis on beginning literary analysis.
- Learn and practice active reading skills, including, but not limited to, decoding difficult text and annotating works for theme, character, plot, and literary device.
- Develop and polish academic writing skills, advancing from single paragraph response to literature to fully-developed essays. Students will also be introduced to writing of narrative and creative pieces
- Increase and implement vocabulary and etymology knowledge.
- Demonstrate level-appropriate correct usage of grammar, spelling, and punctuation rules.
- Think critically and communicate effectively at a level appropriate for students' age/maturity.

English 2 CP

Credits: 5 units per semester

Grade Level: 10

Length: 1 year

Prerequisites: 10th grade status

This course is structured around the study of American literature and surveys the development of the literature of the United States from its colonial beginning through the 20th Century. The English 2 program focuses on the development of critical thinking/problem solving, communication and interpretation.

Upon completion of this course, a student will be able to:

- Read and study American Literature from a chronological focus, with an emphasis on literary analysis as well as historical comprehension of the American literary experience.
- Practice and improve guided active reading skills,

including, but not limited to annotation of text.

- Develop and polish academic/composition writing skills, with an emphasis on developing rhetorical flexibility. Students will also write more in-depth narrative and creative pieces.
- Increase and implement vocabulary knowledge, including literary terminology.
- Demonstrate level-appropriate correct usage of grammar, spelling, and punctuation rules.
- Think critically and communicate effectively at a level appropriate for students' age/maturity.

Honors English 2

Credits: 5 units per semester

Grade Level: 10

Length: 1 year

Prerequisites: B in English 1 Honors with a B or above essay grade and teacher recommendation; or an A in English 1 CP with A essay grades and teacher recommendation. Refer to the Criteria for English Honors/AP Placement

This accelerated study of American literature surveys the development of the literature of the United States from its colonial beginnings through the 20th Century. The program addresses a high level of development in composition, critical thinking, vocabulary, and mechanical and grammatical skills. Students must independently read and write at a highly proficient level. The English 2 honors program focuses on the development of critical thinking/problem solving, communication and interpretation.

Upon completion of this course, a student will be able to:

- Read and study American Literature from a chronological focus, with an emphasis on literary analysis as well as historical comprehension of the American literary experience.
- Practice and improve guided active reading skills, including, but not limited to annotation of text.
- Develop and polish academic writing skills, with an emphasis on developing rhetorical flexibility. Students will also write more in-depth narrative and creative pieces.
- Increase and implement vocabulary knowledge, including literary terminology.
- Demonstrate level-appropriate correct usage of grammar, spelling, and punctuation rules.
- Think critically and communicate effectively at a level appropriate for students' age/maturity.

English 3 CP

Credits: 5 units per semester

Grade Level: 11

Length: 1 year

Prerequisites: 11th grade status

English 3 surveys British literature, including texts from the Medieval period through the 20th century, with special emphasis on major writers and their work. The English 3 program focuses on the development of critical

thinking/problem solving, communication and interpretation through reading, writing, listening and speaking.

Upon completion of this course, a student will be able to:

- Read and study British Literature from a chronological approach, with an emphasis on literary analysis.
- Practice and improve increasingly independent critical reading skills.
- Develop and polish academic/composition writing skills, with increased sophistication and a focus on various modes of writing.
- Increase and implement vocabulary knowledge, including literary terminology.
- Demonstrate level-appropriate correct usage of grammar, spelling, and punctuation rules
- Think critically and communicate effectively at a level appropriate for students' age/maturity.

AP English Language and Composition

Credits: 5 units per semester

Grade Level: 11

Length: 1 year

Prerequisites: B in English 2 Honors with B or above essays and teacher recommendation; or A in English 2 CP with A essays and teacher recommendation. Refer to the Criteria for English Honors/AP Placement

This course focuses on creating informed citizens, who can read, think and communicate effectively in a variety of contexts. Instruction focuses on developing effective writers, who can apply the taught skills to any high school or college course and real-world activities. This course builds upon argument and research writing skills and presents a survey of British literature from the Renaissance to modern day.

Upon completion of this course, a student will be able to:

- Read challenging fiction and nonfiction independently with understanding of both explicit and implicit meaning.
- Analyze oral and written argument and prose, recognizing, and evaluating the functions of rhetorical strategies, including schemes, tropes, diction, and tone.
- Determine the most appropriate form of written discourse for their subject matter, write in a variety of forms, and incorporate relevant and reasonable evidence/support, appropriately cited as needed, both in fully-processed and on-demand writing.
- Effectively research, vet, paraphrase/quote, and correctly document source materials used as evidence
- Think critically and communicate effectively.

Writing Across the Genres 3 CP

Credits: 5 units per semester

Grade Level: 11

Length: 1 semester or 1 year

Prerequisites: 11th grade status; if taking as a 1 semester English elective, must be taken concurrently with core

grade-level course; if taken both semesters, counts as English 3 CP yearlong course.

In this course, students will read closely and respond to a wide variety of genres: descriptive essays, short stories, dramas, and informational and argumentative essays. In response to the works studied, students will write literacy narratives, personal essays, literary analysis essays in which they synthesize famous interpretations of a work of literature with their own interpretation, and multi-genre projects which require them to write in a variety of genres united by a central theme. The formal writing and creative writing will be integrated throughout the year's curriculum, creating a complementary balance between the rigors of college writing and the creative nature of literature. Though this course, students will develop the habit of reading closely in order to analyze the way authors use literary and stylistic devices to craft meaning.

English 4 CP

Credits: 5 units per semester

Grade Level: 12

Length: 1 year

Prerequisites: 12th grade status

This course is designed to develop and integrate reading, writing, and critical thinking. This course focuses on world literature, both classical and contemporary. It emphasizes critical thinking through discussion and writing activities that respond to the literature that has been independently read.

Upon completion of this course, a student will be able to:

- Read and study World Literature, with an emphasis on making connections between the literature and the students' social, political, and personal environments. Non-fiction is also a valued part of the reading curriculum
- Practice and improve independent critical reading skills, with increasingly complex texts
- Develop and polish academic/composition writing skills, with an emphasis on transitioning students toward college writing expectations, including composition of extended research papers
- Demonstrate level-appropriate correct usage of grammar, spelling, and punctuation rules
- Think critically and communicate effectively at a level appropriate for students' age/maturity.

AP English Literature and Composition

Credits: 5 units per semester

Grade Level: 12

Length: 1 year

Prerequisite: B in AP English Language and Composition with B or above essays and teacher recommendation; or A in English 3 CP with an A essay grade and teacher recommendation. Refer to the Criteria for English Honors/AP Placement

Learning experiences will emphasize development of student proficiency in school-wide performance areas related to college-level literary studies and composition skills. Emphasis of the course is the development and

practice of college-level writing, reading, and analytical skills. As the title suggests, demanding college-level coursework will require extensive reading and analysis of literature, in addition to significant writing in and outside of class.

Upon completion of this course, a student will be able to:

- Explain clearly, cogently, and even elegantly what they understand about literary works and why they interpret them as they do
- Analyze prose style, commenting on the function of diction, syntax, narrative method or rhetorical strategy, and tone
- Analyze a poem, commenting on the theme and the effects of diction, image, and form in enhancing sound and meaning
- Explain and apply critical theories that have shaped the way in which literature has been viewed over time
- Write polished analytical and persuasive papers.
- Write essay exams, answering a previously unseen question in a limited time period while maintaining organization, supporting evidence, and mechanical correctness
- Demonstrate improved reading comprehension and an increased literary as well as general vocabulary
- Demonstrate the ability to speak articulately about complex issues in both formal and informal situations

Creative Writing in the Digital Age

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 semester

Prerequisite: for *incoming 11th graders*, concurrent enrollment in core grade-level course; for *incoming 12th graders*, either concurrent enrollment in core grade-level course if taken as a semester elective or **if taken with History and Theory of the Graphic Novel**, counts as English 4 CP yearlong course.

Students in this course will participate in several workshops to help develop their personal expression and explore their creativity. The course focuses on four creative writing genres: poetry, flash fiction, creative nonfiction, and the 10-minute play. For each genre, students will be instructed in the fundamentals, analyze and discuss models, participate in workshops, and produce and publish their own creative writing through a variety of digital mediums (multimedia narratives, videos, podcasts, etc.). Examples of student products can be viewed at uhslibrary.com/creativevoices.

Upon completion of this course, a student will be able to:

- Identify, analyze and produce successful elements of fiction
- Develop skills in writing with originality, creativity, and clarity
- Experience writing as a tool for intellectual exploration and creative expression

- Experience being part of a writing community that provides and receives constructive feedback
- Produce and electronically publish one creative piece in each genre

History and Theory of the Graphic Novel

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 semester

Prerequisite: for *incoming 11th graders*, concurrent enrollment in core grade-level course; for *incoming 12th graders*, either concurrent enrollment in core grade-level course if taken as a semester elective or if taken with **Creative Writing in the Digital Age**, counts as English 4 CP yearlong course.

The purpose of this course is to track the trajectory of the graphic novel from its inception as the serialized comic books of the 1940s and 50s, to the avant-garde work of R. Crumb in the 1960s and 70s, and to more recent experimental works by novelists such as Art Spiegelman (*Maus I and II*) and Alan Moore (*The Watchmen*). Attention will be paid to the Japanese pioneers of the craft, such as Osama Tezuka, whose influence on American graphic novel writing has been immense. We will also explore how the graphic novel is adapted for the screen (e.g., Frank Miller's *300*). Methodologically, this course will attempt to situate the graphic novel as a blending of popular culture and lofty aesthetics. We will also attempt to understand the graphic novel according to the economic, socio-cultural, and political climates surrounding their publication. Most significantly, we may look at the graphic novel as culturally important—that is to say, as works that are intentionally provocative as a means of intervening in cultural conversations, both social and political (e.g., *Persepolis* and its depiction of modern day Iran). Accordingly, we will explore the graphic novel as a scaffold on which we can build on the mastery of skills outlined in the Common Core.

ERWC 4 CP: Expository Reading & Writing Course

Credits: 5 units per semester

Grade Level: 12

Length: 1 semester or 1 year

Prerequisites: 12th grade status; if taking as a 1 semester English elective, must be taken concurrently with core grade-level course; if taken both semesters, counts as English 4 CP yearlong course.

This course is a college preparatory study of rhetorical, analytical, argumentative and research-based reading and writing conducted through the Expository Reading and Writing Course curriculum (ERWC) outlined by the California State University System. Students will learn to annotate fictional and informational texts and identify and apply key components of language for each genre of writing. Students will also be exposed to a range of texts, including articles from credible news sources and contemporary literature. Reading, writing and speaking

skills in this course are structured to prepare students for the California Community Colleges and CA State University expectations.

The ERWC aligns with the English-Language Arts Standards, addresses critical reading and writing problems identified by the CSU English Placement Test Committee, and prepares students to meet the expectations of college and university faculty. Students who score conditionally exempt on their EAP testing in junior year and complete this course are exempt from the CSU English Placement Test.

Beginning Journalism

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year, but may be taken as a fall or spring course

Prerequisites: ≥ C in previous English class or teacher recommendation

Students passing the course with a B or better automatically gain permission to take the Advanced Journalism (school newspaper) course. Additionally, priority for school newspaper editor positions is given to students who have taken Beginning Journalism.

The course will introduce the student to journalism and the greater field of mass communications. Students will learn about digital citizenship and media literacy, communications law, and other contemporary mass media issues.

Additionally, students will develop news writing skills, and learn about basic principles in journalism ethics, professionalism, and legal issues. A good grasp of basic English grammar and writing is necessary as these skills will be extensively applied in written assignments and required for online IUSD Canvas discussion responses.

The University High School Newspaper can be viewed at uhs.swordandshield.com.

Advanced Journalism (Sword and Shield newspaper)

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year, but may be taken in just fall or spring

Prerequisites: for incoming 10th graders, ≥ B in Beginning Journalism; for incoming 11th-12th graders ≥ B in previous English class or permission from Journalism teacher.

Students completing Beginning Journalism will have priority of enrollment. All other students will be enrolled on a space-available basis.

This course will give the student, as staff member, the experience of writing for the student-run school newspaper and online news site. The class features a workshop environment, and assignments and deadlines are unique for each student. The ability to work with a high level of independence and individual responsibility is required. All students will apply interpersonal and problem-solving skills

on a regular basis as they function as members of an organization. Select students will have the opportunity to perform various other functions such as editing, photography, artwork, and business management.

The University High School Newspaper can be viewed at uhs.swordandshield.com.

ELD 1: English Language Development

Credits: 5 units per semester Grade Level: 9-12

Length: 1 year (student double enroll in this course)

Prerequisites: CELDT test placement Beginning English Language Development (ELD) is a class designed to meet the needs of students arriving in the U.S. with little or no English language skills.

Initially, emphasis is placed on acquisition of English through listening/comprehension and speaking activities. Progressively, reading comprehension and writing skills are developed. Learning experiences will emphasize development of student proficiency in communication and interpretation in the English language. Upon completion of this course, the successful student will be able to meet English language development standards at the high beginning level for: 1. Listening and speaking; 2. Reading and comprehension; 3. Writing strategies and conventions; 4. Literary response and analysis

ELD 2: English Language Development

Credits: 5 units per semester Grade Level: 9-12

Length: 1 year (student double-enrolled in this course)

Prerequisites: ELD 1 or CELDT test placement

This course requires that the LEP student has already acquired the basic skills of listening comprehension, speaking, reading, and writing. The course continues the acquisition of these skills with more emphasis on generating oral and written English correctly in structure and grammar. Learning experiences will emphasize development of student proficiency in communication and interpretation in the English language.

Upon completion of this course, the student will be able to meet English language development standards at the Intermediate level for

- Listening and speaking
- Reading and comprehension
- Writing strategies and conventions
- Literary response and analysis

ELD 1 English

Credits: 5 units per semester Grade Level: 9-12

Length: 1 year

Prerequisites: Concurrent Enrollment in ELD 1

This course is designed for the English Language Learner

and coincides with the curriculum and instruction in the ELD Science and ELD Social Science course. Vocabulary and writing skills are supported through the ELD 1 course. This curriculum is linked to the California Standards for English and includes instruction in literature and writing. Students respond to their reading in the form of written analysis, group discussions and formal presentation. Vocabulary and writing relates to fiction and non-fiction literature and includes literary analysis.

Upon completion of this course, a student will be able to:

- Read and study fiction and non-fiction literature
- Decode difficult text and annotate works for theme, plot, and character
- Develop writing skills, advancing to multi paragraph essay
- Understand correct sentence structure and grammar usage
- Understand vocabulary and usage in the context of an introductory English literature course.

ELD 2 English**Credits:** 5 units per semester**Grade Level:** 9-12**Length:** 1 year**Prerequisites:** Concurrent Enrollment in ELD 2

This course is designed for the English Language Learner. Vocabulary and writing skills are supported through the ELD 2 course. This curriculum is linked to the California Standards for English and includes instruction in literature and writing. Students respond to their reading in the form of written analysis, group discussions and formal presentation. Vocabulary and writing relates to fiction and non-fiction literature and includes literary analysis.

Upon completion of this course, a student will be able to:

- Read and study fiction and non-fiction literature
- Decode difficult text and annotate works for theme, plot, and character
- Develop writing skills, advancing to multi paragraph essay
- Understand correct sentence structure and grammar usage
- Understand vocabulary and usage in the context of an introductory English literature course.

English 1 Sheltered**Credits:** 5 units per semester**Grade Level:** 9-12**Length:** 1 year**Prerequisites:** CELDT test placement

This course is comparable to the college-preparatory English 1 program in content, yet it addresses the particular needs of the LEP student, providing him/her with the necessary skills to transition from ELD into regular English courses. This is a comprehensive course, designed to increase the student's knowledge of the English language, to develop his/her writing, reading, speaking, and listening skills, and to expand his/her awareness and appreciation of different literary genres through exposure to appropriate world literature.

Upon completion of this course, a student will be able to:

- Write fully developed paragraphs and analytical essays
- Demonstrate strong writing mechanics, including grammar & punctuation
- Organize and deliver a short speech in front of his peers
- Comprehend and interpret core literature
- Identify primary literary genres and apply basic literary terms to literature studied

- Utilize vocabulary and contextual clues in reading and writing
- Increase vocabulary by using context clues
- Demonstrate proficiency on the reading/writing portion of the state High School Exit Exam.

English 2 Sheltered**Credits:** 5 units per semester**Grade Level:** 10-12**Length:** 1 year**Prerequisites:** English 1 (Sheltered) and CELDT test placement

This course is comparable to the college-preparatory English 2 program in content, yet it addresses the particular needs of the LEP student, providing him/her with the necessary skills to transition from ELD into regular English courses. This is a comprehensive course, which includes all the major components of the English language arts: reading, writing, listening, and speaking. The course surveys the literature of the United States from its colonial beginnings through the 20th century.

Upon completion of the course the student will be able to:

- Express ideas orally and in writing with clarity and creativity
- Write fully developed compositions, employing expository, narrative, descriptive and poetic techniques
- Demonstrate increased vocabulary development and accuracy of usage
- Apply rules of grammar, spelling, punctuation, and usage
- Demonstrate an awareness, understanding, and appreciation of American literature, its authors, major literary periods, and genres
- Expand critical reading and thinking skills
- Write with clarity using thesis statements and topic sentences
- Write fully developed compositions, employing expository, narrative, descriptive and persuasive techniques
- Demonstrate increased vocabulary development and accuracy of usage
- Consistently apply rules of grammar, spelling, punctuation, and usage
- Demonstrate an awareness, understanding, and appreciation of contemporary issues
- Employ critical reading and thinking skills.

Health Education

Health

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 semester in person or in a Blended Learning Environment; Summer Session is available.

Prerequisites: 11th or 12th grade status; students in 12th grade have priority enrollment status over students.

The goal of Health education is to provide students with the knowledge necessary to achieve and maintain optimal health and wellness throughout their lifetimes.

Units of study include mental & emotional health, including depression awareness and suicide prevention, alcohol, tobacco and drugs, human growth and development, * principles of nutrition, and the role of exercise to achieve cardiovascular fitness. Other educational components of the high school level course include anti-harassment, anti-discrimination, and anti-bullying lessons with the intention to build respect for all. A district final exam is administered prior to completion of the course.

*California state law, the California Healthy Youth Act, requires that comprehensive sexual health education and HIV prevention education be provided to students at least once in high school. Instruction must be medically accurate, age-appropriate and inclusive of all students. Parent Consent is required for this portion of the class.

Mathematics

The mathematics curriculum is designed to offer a variety of learning experiences commensurate with the student's abilities, needs and academic pursuits. A scientific calculator is recommended for all math courses. For the courses listed below, a graphing calculator (i.e. TI84) graphing will be used within the instruction.

Math III
Enhanced Math III
Pre-Calculus
Functions, Statistics and Trigonometry (FST)

Honors Pre-Calculus
AP Statistics
AP Calculus AB
AP Calculus BC

Criteria for Honors and AP Mathematics courses

The student

- Is recommended for an Honors or AP math course by his/her previous math teacher
- Appreciates and applies constructive criticism to improve his or her conceptual understanding.
- Demonstrates enthusiasm for math problems, discussion and other classroom activities.
- Has a desire for learning the meanings behind the material and not exclusively motivated by the grade desired.
- Understands that the Honors/AP course is graded with a higher expectation for accuracy.
- Is organized and manages time well, completing assignments and preparing for assessments.
- Takes pride in his/her work and has an attention to detail, both on written assignments and projects.
- Can work both independently and in groups, contributing as an active team member.
- Is an active learner and demonstrates enthusiasm for math discussions related to the course work.
- Enjoys exploring math concepts and discoveries beyond the classroom and textbook.
- Is intrinsically motivated to be in an advanced math course.

Mathematics Suggested Course Sequences

- The UHS math program follows the IUSD Secondary Mathematics pathway for Integrated Mathematics
- Enhanced, Honors, Advanced Placement and College Prep Course are available to all students meeting course prerequisites.

Mathematics Course Offerings

All math courses require recommendation from current math teacher in addition to meeting the prerequisites.

Course Title	UC a-g	Bonus Pt ‡	Length Year Semester	Prerequisites	Grade Low	Grade High
Math IAB			Y	Teacher recommendation.	9	12
Math I CD	c		Y	Pass Math 1AB.	10	12
Math I	c		Y	Placement is based on performance in 8 th grade or former accredited high school course.	9	12
Math II	c		Y	≥ C- in Math I or Math ICD, 70% on EOC, Teacher Appraisal: (2 of 3 needed for recommendation). 9th grade enrollment requires recommendation from Middle School teacher.	9	12
Enhanced Math II	c		Y	≥ 90% in Math I, 85% on EOC, Teacher Appraisal (2 of 3 needed for recommendation) 9th grade enrollment requires recommendation from Middle School teacher.	9	12
Math III	c		Y	≥ C- in Math II, 70% on EOC, Teacher Appraisal (2 of 3 needed for recommendation).	10	12
Enhanced Math III	c	‡	Y	≥ 80% in Enhanced Math II, 85% on EOC, Teacher Appraisal (2 of 3 needed for recommendation) Enrollment from Math II requires a summer bridge course with ≥ B, 85% on EOC, Teacher Appraisal (2 of 3 needed for recommendation)	10	12
Functions, Statistics and Trigonometry (FST)	c			> C- in Math III	10	12
Pre-Calculus	c		Y	≥ B- in Math III, ≥ B in FST or ≥ C grade in Enhanced Math III	10	12
Business Math	g		Y	Passing grade in Math II or higher-level math course	11	12

AP Calculus AB	c	‡	Y	≥ C in Enhanced Math III (both semesters) ≥ B- in Pre-Calculus or ≥ C- in Honors Pre-Calculus (both semesters) <i>Refer to criteria for Honors/AP courses</i>	10	12

AP Calculus BC	c	‡	Y	≥ B in Enhanced Math III (both semesters) ≥ A in Pre-Calculus (both semesters) with completion of summer assignment ≥ B in Honors Pre-Calculus (both semesters) <i>Refer to criteria for Honors/AP courses</i>	10	12
AP Computer Science	g	‡	Y	≥ B- in Math III (both semesters), Enhanced Math II (both semesters) or Pre-Calculus (and higher-level math courses)	11	12

Math IAB – Math ICD

Credits: 5 units per semester

Grade Level: 9-12

Length: 2 years

Prerequisites: Teacher recommendation

The first year of this two-year course is designed to strengthen and build upon students' prior understanding of mathematics, with a focus on linear algebra and statistics; the second year will expand on linear algebra through the study of exponential functions, as well as develop an understanding of congruence through transformations and algebra. This course is aligned with the Common Core state standards. Passing this two-year course will satisfy the Math I requirement for graduation.

Skills and Assessment:

- Students will connect concepts to the real world using mathematical modeling
- reason quantitatively and use units to solve problems
- explain and justify the processes they use in solving problems
- communicate mathematical understanding and problem solving through the use of multiple representations such as diagrams, models, tables, graphs and symbols
- develop and extend strategies to transition from knowledge of concepts and skills to theoretical reasoning and application of concepts
- demonstrate mastery of concepts and skills through various assessments in the form of homework, quizzes, tests and performance tasks
- use appropriate technology to enhance learning and understanding.

Math I

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites:

Placement is based on performance in 8th grade or former accredited high school course.

Math I is the first course in the college preparatory math sequence. It is a study of real numbers and their properties; linear and exponential functions; equations and expressions; statistics; transformations and congruence. This course is aligned with the Common Core state standards. Passing this course is a requirement for graduation.

Skills and Assessment:

- Students will connect concepts to the real world using

mathematical modeling; reason quantitatively and use units to solve problems

- explain and justify the processes they use in solving problems
- communicate mathematical understanding and problem solving through the use of multiple representations such as diagrams, models, tables, graphs and symbols
- develop and extend strategies to transition from knowledge of concepts and skills to theoretical reasoning and application of concepts
- demonstrate mastery of concepts and skills through various assessments in the form of homework, quizzes, tests and performance tasks
- use appropriate technology to enhance learning and understanding.

Math II

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites:

≥ C- in Math I or Math ICD, 70% on EOC, Teacher

Appraisal: (2 of 3 needed for recommendation).

9th grade enrollment requires recommendation from Middle School teacher.

The focus of Mathematics II is on quadratic expressions, equations, and functions; comparing their characteristics and behavior to those of linear and exponential relationships from Mathematics I as organized into 9 units of study surrounding the critical focus areas defined by the California Mathematics Content Standards. The need for extending the set of rational numbers arises and real and complex numbers are introduced so that all quadratic equations can be solved. The link between probability and data is explored through conditional probability and counting methods, including their use in making and evaluating decisions. The study of similarity leads to an understanding of right triangle trigonometry and connects to quadratics through Pythagorean relationships. Circles, with their quadratic algebraic representations, round out the course. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

Enhanced Math II

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites:

Grade 10-12: $\geq 90\%$ in Math I, $\geq 85\%$ on EOC, Teacher Appraisal (2 of 3 needed for recommendation)
 9th grade enrollment also requires recommendation from Middle School teacher

The focus of Enhanced Math II is the same as Math II with an added 3 week statistics unit from Math III. It also includes added time to the probability unit to include 4 (+) standards that include: Applying the general multiplication rule in a uniform probability model and interpret the answer in terms of the model, use permutations and combinations to compute probabilities of compound events and solve problems, use probabilities to make fair decisions, and analyze decisions and strategies using probability concepts. Enhanced Math II will also include added standards to circles, as well as added standards for complex numbers and how they relate to quadratic expressions. Lastly, it will include additional days of added modeling and performance task projects built into some units. The goal of the enhanced pathway is to prepare a student to bypass pre-calculus and go straight into AP Calculus.

Math III

Credits: 5 units per semester Grade Level: 10-12
 Length: 1 year
 Prerequisites:
 $\geq C$ - in Math II, $\geq 70\%$ on EOC, Teacher Appraisal (2 of 3 needed for recommendation)

Math III is the third course in the college preparatory math sequence. Instructional time will focus on four critical areas: applying methods from probability and statistics to draw inferences and conclusions from data; expanding understanding of functions to include polynomial, rational, and radical functions; expanding right triangle trigonometry to include general triangles and trigonometric functions; and consolidate functions and geometry to create models and solve contextual problems. This course is aligned with the California Common Core State Standards.

Skills and Assessment: Students will...

- Connect concepts to the real world using mathematical modeling.
- Reason quantitatively and use units to solve problems.
- Explain and justify the processes they use in solving problems.
- Communicate mathematical understanding and problem solving through the use of multiple representations such as diagrams, models, tables, graphs and symbols.
- Develop and extend strategies to transition from knowledge of concepts and skills to theoretical reasoning and application of concepts.
- Demonstrate mastery of concepts and skills through various assessments in the form of

homework, quizzes, tests, and performance tasks.

- Use appropriate technology to enhance learning and understanding.

Enhanced Math III

Credits: 5 units per semester Grade Level: 10-12
 Length: 1 year
 Prerequisites:
 $\geq 80\%$ in Enhanced Math II, $\geq 85\%$ on EOC, Teacher Appraisal (2 of 3 needed for recommendation)
 Enrollment from Math II requires a summer bridge course with $\geq B$, $\geq 85\%$ on EOC, Teacher recommendation (2 of 3 needed for recommendation)

Enhanced Math III is the second course in the rigorous accelerated sequence of high school math courses. Instructional time will focus on five critical areas: expanding understanding of functions to include polynomial, rational, and radical functions; extending their work with complex numbers; extending trigonometry to general triangles, trigonometric functions, reciprocal functions, and inverse functions; working with parametric and polar curves; and consolidating functions and geometry to create models and solve contextual problems. In addition, students will deepen and extend their understanding in each of these areas through study of advanced related topics and application to more complex problem solving situations, in order to prepare students for advanced mathematics at an accelerated pace. This course is aligned with the California Common Core State Standards.

Skills and Assessment: Students will

- Connect concepts to the real world using mathematical modeling.
- Reason quantitatively and use units to solve problems.
- Explain and justify the processes they use in solving problems.
- Communicate mathematical understanding and problem solving through the use of multiple representations such as diagrams, models, tables, graphs and symbols.
- Develop and extend strategies to transition from knowledge of concepts and skills to theoretical reasoning and application of concepts.
- Demonstrate mastery of concepts and skills through various assessments in the form of homework, quizzes, tests, and performance tasks.
- Use appropriate technology to enhance learning and understanding.

Functions, Statistics and Trigonometry (FST)

Credits: 5 units per semester Grade Level: 10-12
 Length: 1 year

Prerequisites:

≥ C- in Math III

Students will be studying functions and trigonometry with strong attention given to statistics and data analysis throughout the course. Emphasis is on the use of mathematics to model and explore real world phenomena. Students will use graphing calculators to explore relations between functions and their graphs and perform statistical analyses.

Upon completion of the course, students will be able to:

- Collect, analyze, and display data
- Identify, interpret, and graph linear models, quadratic models, and also use step functions to model situations
- Identify and graph transformations of functions and understand transformations on data
- Use exponential and logarithmic functions to solve problems and model data
- Sketch graphs of trigonometric functions and their inverses
- Solve triangles using trigonometry
- Solve probability problems
- Solve problems using series and sequences
- Construct and interpret polynomials that model real world situations
- Use binomial and normal distributions to solve problems and test hypotheses
- Prove trigonometric identities
- Demonstrate proficiency in using a graphing calculator to solve problems.

Business Math:

Credits: 5 units per semester

Grade level: 11-12

Length: 1 year

Prerequisites: Passing grade in Math II or higher-level math course.

- Business Mathematics is a two-semester course of which students learn to use mathematics effectively as a tool in their personal and business lives. Once completed, students will be able to apply mathematical concepts in various personal and business situations. This course may be used to meet the mathematics requirements for graduation.
- Student review and apply mathematical operations with whole numbers, decimals, fractions, ratios, and percent. They will understand terminology relating to personal and business mathematics applications and apply basic math skills to the solution of both personal and business applications. They will use common mathematical formulas to solve a variety of personal and business mathematics as well as apply knowledge of computer and calculator use.

Pre-Calculus

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites:

≥ B- in Math III, ≥ B in FST, or > C in Enhanced Math III

Pre-Calculus is designed for the student who plans to pursue mathematics or related fields at the college level. This course is a rigorous study of concepts including Trigonometry. The student studies circular functions, their inverses, and their corresponding trigonometric functions. Analytic methods and proofs are used in each of the topics in order to provide a firm foundation for calculus. Students will review geometric concepts and properties of the straight line. They will study sequences, series, the conic sections, matrices, determinants, logarithmic and exponential functions, graph sketching, and limits.

Upon completion of the course, students will be able to:

- Understand the definitions of sequence, series, and limits
- Sketch the graphs of polynomial, rational, and algebraic functions
- Sketch the graphs of logarithmic and exponential functions
- Demonstrate an understanding of the equations and graphs of conic sections
- Use matrices and determinants in analytical problems
- Demonstrate an understanding of limits
- Identify basic circular functions and identities
- Sketch the graphs of trigonometric functions and their inverses
- Solve equations involving circular functions
- Solve right and oblique triangles
- Demonstrate an understanding of polar coordinates and be able to translate between polar and rectangular systems
- Prove trigonometric identities
- Demonstrate proficiency in using a graphing calculator to solve problems.

CP Statistics:

Credits: 5 units per semester

Grade level: 11-12

Length: 1 year

Prerequisites:

≥ C- Math I or Math ICD.

CP Statistics is a course designed for students interested in learning how to become a better consumer, citizen, and business person. This course will focus on introductory statistical methods of analyzing data, determining when results are significant, and identifying when data is biased. Students will use technology to interpret and form justified conclusions about real data from business, science, psychology, sports, and entertainment, and other fields.

Upon completion of this course, students will be able to:

- Analyze the validity of studies and identify potential sources of bias.
- Analyze sets of data graphically and numerically.

- Analyze the relationship between two variables graphically and numerically.
- Analyze what is likely and unlikely to happen due to chance, and use this knowledge to make decisions
- Determine if study results are significant with hypothesis testing and confidence intervals.
- Create their own experiment to investigate a topic of interest, gather data using appropriate methods, and determine if they found significant evidence to make a conclusion about their topic.

AP Statistics

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites:

≥ B in Math III (both semesters, 12th grade only)

≥ C- in Enhanced Math III (both semesters)

≥ B- in FST (both semesters)

≥ C- in Pre-Calculus or Honors Pre-Calculus (both semesters)

Refer to the Criteria for Math Honors/AP Placement.

This course is equivalent to a one-semester, introductory, non- calculus based college course in statistics. Students are introduced to the major concepts and tools for collecting, analyzing and drawing conclusions from data. Topics include exploring data, planning a study, anticipating patterns, and statistical inference.

Upon completion of the course, students will be able to:

- Explore Data
- Observe patterns and departures from patterns
- Interpret graphical displays of distributions of univariate data
- Summarize distributions of univariate data. c. Compare distributions of univariate data
- Explore bivariate data
- Explore categorical data: frequency tables
- Plan a study: decide what and how to measure
- Overview data collection methods
- Plan and conduct surveys and experiments
- Anticipate patterns: produce models using probability and simulation
- Use probability as a relative frequency
- Combine independent random variables
- The normal distribution
- Use statistical inference: confirm models
- Confidence intervals
- Tests of significance
- Special cases of normally distributed data.

AP Calculus AB

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites:

≥ C in Enhanced Math III (both semesters)

≥ B- in Pre-Calculus (both semesters)

≥ C- in Honors Pre-Calculus (both semesters)

Refer to the Criteria for Math Honors/AP Placement

AP Calculus AB is a course for student who has completed Pre- Calculus or Honors Pre-Calculus successfully. The student will acquire a firmer grasp of the fundamental concepts and skills of advanced high school mathematics while they apply definitions and theorems of calculus to theoretical and practical problems.

Upon completion of the course, students will be able to:

- Use derivatives to sketch the graphs of the following types of functions: polynomials, rational, trigonometric, logarithmic, and exponential
- Understand properties of limits, derivatives, and continuous functions
- Use derivatives and antiderivatives in applications
- Apply several methods of integration to definite and indefinite integrals.

AP Calculus BC

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites:

≥ B in Enhanced Math III (both semesters)

≥ A in Pre-Calculus (both semesters) with completion of summer assignment

≥ B in Honors Pre-Calculus (both semesters)

Refer to the Criteria for Math Honors/AP Placement.

Students may not drop into Calculus AB once the semester has begun.

The BC course is a more comprehensive course than the AB course. It is for the student who is able and willing to work at a faster pace to cover about 50% more material.

Upon completion of the course, students will have completed all topics of the AB course and also be able to:

- Evaluate improper integrals
- Understand some of the fundamental results of infinite series and use them to represent functions in a new way
- Use parametric and polar equations of curves in familiar applications
- Use vectors in the applications of calculus
- Solve basic types of ordinary differential equations.

AP Computer Science JAVA (Programming)**Credits:** 5 units per semester **Grade Level:** 11-12**Length:** 1 year**Prerequisites:**

≥ B- in both semesters of Math III (both semesters),
Enhanced Math II, Pre-Calculus, or higher level math
courses

Refer to the Criteria for Math Honors/AP Placement

This course is approved as a UC “g” elective course. This course is an Introduction to programming in the language of JAVA. Topics include problem solving and data structures, procedural and data abstraction, algorithms, and Object-Oriented programming. Students will be prepared to take the Advanced Placement Computer Science exam A.

Upon completion of the course, students will be able to:

- Understand the advantages of a compiled language
- Understand basic program structure, JAVA syntax, and organization
- Use the classes and methods located in the JAVA library

- Design programs using object oriented design
- Write JAVA programs using arrays, array lists, two dimensional arrays, classes and objects
- Write programs involving recursion
- Write programs using advanced sorting and searching techniques

App Development**Credits:** 5 units per semester**Grade level:** 11-12**Length:** 1 year**Prerequisites:**

Passing grade in Math I or Math I CD (with
recommendation from current Math teacher)

Upon completion of the course, students will be able to turn an idea into app by:

- Identifying the audience and doing market research
- Creating a wireframe
- Creating an easy to use UI including your own branding.
- Writing the code in React Native to make it run.

Physical Education

Physical Education offers each student an opportunity to experience success, to demonstrate measurable progress at his own speed, to understand the function of your body systems, and learn sound health practices. We seek a balance between the development of motor skills, and the development of skills in lifetime sports activities. We recommend that students participate in physical education or athletics throughout their four years in high school. A minimum of four semesters is required for graduation.

Physical Fitness Test

All students, including students enrolled in athletics, marching band, pageantry/color guard and PE private instruction are required to take the California Physical Fitness Test and pass five out of the six fitness areas.. The test is first given in grade 9, during the spring semester. Students not passing at least 5 out of the 6 fitness areas are required to enroll in a Physical Education course as a Sophomore. The six fitness areas tested are:

Aerobic Capacity	Body Composition
Abdominal Strength and Endurance	Trunk Extensor Strength and Flexibility
Upper Body Strength and Endurance	Flexibility

Physical Education Make Up Policy

Because Physical Education necessitates participation in order to receive a grade, the following guidelines have been put in place to communicate the expectations on students should they be required to miss one or more class periods

If a student misses up to three consecutive days due to illness or injury, the days missed may be made up during office hours with the respective teacher on a one for one basis.

If a student receives a doctor's note requiring him/her to miss class for more than three consecutive days, but not more than two weeks, the days missed may be made up during three office hours in addition to a one page paper (related to Physical Education) for each day beyond three days with the respective teacher. For example, if a student misses five consecutive days, he/she will be required to make-up three days during office hours, and write two one page papers to received full credit for the absences. Sprained ankles or other injuries necessitating prolonged rest are examples of this type of doctor excused situation.

Any student required to miss class for more than two consecutive weeks and provides a doctor's note may work with the teacher/counselor on the following options: Broken bones or serious muscle strains are examples of this type of doctor excused situation.

Physical Education Course Offering

Course Title	Length Year Semester	Prerequisites	Grade Low	Grade High
COED Physical Education	S	Grade 9 status	9	9
Physical Fitness	S	None	10	12
Basketball	S	None	10	12
Racquet Sports	S	None	10	12
Weight Training	S	None	10	12
Yoga	S	None	10	12
Power Walking	S	None	10	12
Dance Technique 1	Y	None	9	12
Dance Technique 2	Y	Dance Tech 1/Audition	9	12
Dance Production (Information on pg. 64)	Y	Audition	9	12

***Other courses to satisfy P.E. credit requirement include: Marching Band, Color Guard and Athletic Sports**

Coed Physical Education**Credits:** 5 units per semester**Length:** 1 semester to 1 year
none**Grade Level:** 9**Prerequisites:**

The class is designed to follow the California State framework for Physical Education.

Emphasis will be in three specific areas:

- Movement skills and movement knowledge which includes motor learning and physical fitness
- Self-image, Self Esteem and Self Realization which encompasses human growth and development in nutrition, cardiovascular conditioning and heart rate monitoring
- Social Development and Social Interaction based on co- operative learning strategies in the area of physical fitness.

Physical Fitness**Credits:** 5 units per semester**Length:** 1 semester to 1 year**Grade Level:** 10-12**Prerequisites:** none

The course will emphasize physical fitness, exercise, and activities to enhance the self-image of young people. Students will develop an understanding of how their bodies function and respond to ongoing exercise. Activities will include stretching, aerobic exercise, and warm down. In addition, students will be exposed to other aspects of personal fitness and stress management.

Upon completion of this course, students will be able to:

- Show how to demonstrate an increase in flexibility, strength, and coordination in all body parts
- Demonstrate an increased level of fitness and endurance in aerobic activity as measured at the beginning and end of the quarter
- Show an increased understanding and knowledge of personal fitness and hygiene by discussion of specific topics and a written exam
- Be able to maintain optimum aerobic heart rate for 20-30 minutes by the end of the semester
- Be familiar with proper techniques of basic strength training

Basketball**Credits:** 5 units per semester**Length:** 1 semester to 1 year
none**Grade Level:** 10-12**Prerequisites:**

This course will emphasize fundamental skills in the game of basketball. Students will be instructed in the fundamentals of dribbling, passing, shooting and skill play. Emphasis will be placed on increasing the knowledge of how to play in situations presented during the play of a game. These will include co- operative learning situations in 1 on 1, 2 on 2, and 3 on 3, 4 on 4, and 5 on 5 games. Students will be taught to improve their skills.

Racquet Sports**Credits:** 5 units per semester**Length:** 1 semester to 1 year**Grade Level:** 10-12**Prerequisites:** none

This class is for the beginning through advanced student. Emphasis will be on stroke development, ground strokes, volleys, lobs, and overheads. Both singles and doubles play will be experienced, as well as numerous drill/game situations. Students will be encouraged to progress at their own rate.

Upon completion of the course, students will be able to:

- Demonstrate stroke production from grip to proper execution (all strokes)
- Demonstrate both singles and doubles play strategy, theory, scoring, and etiquette
- Demonstrate numerous drills/games as they pertain to specific tennis strokes and situations.

Weight Training**Credits:** 5 units per semester**Length:** 1 semester to 1 year**Grade Level:** 10-12**Prerequisites:** none

Students will be shown how to properly use free weights. Weight training programs will be set up to help the student improve their strength and muscle endurance. The lifting program will take place Monday, Wednesday, and Friday (at times this schedule will be modified due to holidays, assemblies, and minimum days). Cardiovascular conditioning will also be included in this program. On Tuesday and Thursday the students will run, jog, walk, swim, jump rope, or play a team sport. Stretching and warming down will be utilized.

Upon completion of the course, students will be able to:

- Have a working knowledge of all muscle groups as they pertain to weight lifting workouts
- Set up a workout program including: flexibility, strength development and cardiovascular improvement.

Power Walking**Credits:** 5 units per semester**Length:** 1 semester to 1 year**Grade Level:** 10-12**Prerequisites:** none

A course designed to give students an understanding of and a proficiency in fitness walking. The power of walking introduces students to the performance of fitness walking as a lifelong activity that maintains and enhances physical health and psychological well-being. This course provides the information that the student needs to understand, organize, plan, and implement a physical fitness program that features walking as a primary activity.

The centerpiece of this course is a series of small group and individual walks of varying lengths that are conducted over various terrains. This class will walk on the track and also go on off campus walks. Also incorporated into this class will be walking with low weight dumbbells to further enhance your cardio and physical well-being. This class will help train students for the state physical fitness test at the end of the year. If you struggle with running and are looking for a class

that can help you pass the state test than this is the class for you.

Yoga

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 semester to 1 year

Prerequisites: none

The emphasis of the class will be on asanas (poses) and vinyasa (flow) for increased flexibility, improved health, relaxation, and reduced stress in daily living. Class participants will also be exposed to the language and concepts of Yoga. There will also be a cardio aspect to this class. A typical class will include breathing techniques and asana practice, which focus on balancing and inverted poses.

Dance Technique I

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: none

Dance Tech I is the beginning study of dance as a theatrical art form. Students will study the history, basic dance techniques and vocabulary used in choreography, jazz, ballet, world dance, and modern dance. Basic choreography theory will be taught through the use of sculpture – space, internal motivation – energy, and time – tempo. Students will study improvisation and choreography theory by developing dance projects. Students will be involved in critical thinking and problem solving when utilizing choreography elements to create a dance. Students will develop fundamental artistic and aesthetic understanding when writing critiques on live dance concerts, and dance video. They will analyze the use of costumes, lighting and choreography. Students will use communication skills in a recital, which will include choreography, costuming and music in a public performance.

Upon completion of the course, students will be able to:

- Execute proper elementary warm up exercises for jazz, ballet, and modern dance
- Demonstrate simple dance combinations, center work and across the floor using techniques in jazz, ballet, and modern dance
- Develop use of basic dance vocabulary and terminology
- Choreograph dances solving problems involving parameters within counts, ideas and patterns
- Show aesthetic valuing when analyzing both live and taped dance concerts
- Experience performing ballet, modern and/or jazz in a theatrical performance
- Demonstrate Dance vocabulary knowledge through written and oral assessment: written and oral evaluation of projects by the teacher, written reports on specific choreographers and written critique of an

amateur or professional dance performance.

Dance Technique II

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Dance Tech 1 or audition.

Dance Tech II is the continued study of dance as an art form. Students will study dance techniques and vocabulary used in jazz, ballet, world dance, modern dance and choreography. This will include learning about choreographers and styles of dance such as: Duncan, Graham, Dunham, Duato, McKayle, Ailey, Kylian, Lewitsky, Balanchine, and Petipa. Students will understand, appreciate and demonstrate dance as a way to create and communicate meaning and emotion. Students will identify and demonstrate movement elements and skills, and the understanding of choreographic principles, processes, and structures. The theory of choreography will be taught through the use of theme and variation, unity and rhythmic organization. The elements of choreography using critical thinking and problem solving will be used in group projects and improvisation. Students will develop fundamental artistic and aesthetic understanding by writing critiques of live dance concerts and dance videos. Students will use communication and interpretation skills in a recital, which will include choreography, costuming and music in a public performance.

Upon completion of the course, students will be able to:

- Execute proper warm up exercises for jazz, ballet, and modern dance
- Demonstrate complete dance combinations, center work and across the floor, using techniques in jazz, ballet and modern dance
- Critique self, peer and professional performances
- Choreograph dances solving problems involving set parameters within set parameters in rhythmic organization, unity and space
- Show aesthetic valuing with written critiques on live and taped dance concerts
- Demonstrate knowledge performing ballet, modern, jazz dance and world dance in a theatrical setting
- Write a paper on the history of dance including world cultures, historical periods and its relationship to other arts
- Demonstrate Dance vocabulary knowledge through written and oral assessment Techniques: written and oral analysis of student dances by the teacher, based on choreography technique, written tests on dance terminology and history, written and oral critiques, by students of professional and amateur dance concerts.

Science

Science—and therefore science education—is central to the lives of all Americans. A high-quality science education means that students will develop an in-depth understanding of content and develop key skills—communication, collaboration, inquiry, problem solving, and flexibility—that will serve them throughout their educational and professional lives.

The curriculum, therefore, is designed around multiple course offerings for students throughout a range of interests and abilities. We seek a balance among the traditional science disciplines, the personal use, the application of science and science as a means of solving current problems and shaping the future

Criteria for Honors/AP science courses

The student:

- Is recommended for an Honors or AP science course by his/her previous science teacher
- Understands that the Honors/AP course is graded predominantly on exams, lab activities, and problem sets.
- Is organized and manages time well, completing assignments and preparing for assessments without having to sacrifice work for other classes.
- Takes pride in his/her work and has an attention to detail, both on written assignments and laboratory explorations.
- Has demonstrated excellence in writing in previous science courses and is able to synthesize complex processes.
- Is capable of writing detailed lab reports, analyzing data and formulating conclusions.
- Is able to read complex text for understanding
- Is able to work both independently and in groups, contributing as an active team member.
- Is an active learner and demonstrates enthusiasm for reading, writing and discussions related to the course work.
- Enjoys exploring science concepts and discoveries beyond the classroom and textbook.
- Is intrinsically motivated to be in an advanced science course.

Science Course Offerings

All Science Courses require recommendation from current science teacher in addition to meeting the prerequisite. Enrollment in Honors and Advanced Placement requires the commitment noted in the Academic Program of this catalog. Students are limited to enrolling in no more than two courses per year.

Course Title	UC a-g	Bonus Pt ‡	Length Year Semester	Prerequisites	Grade Low	Grade High
Next Gen Biology	d		Y	None	9	9
Honors Next Gen Biology	d		Y	≥ 90% in previous Science course, ≥ 85% on EOC, Teacher appraisal (2 of 3 required) <i>Refer to criteria for Honors/AP courses</i>	9	12

Science High School Requirements

Starting with the class of 2022 students will be required to take a third year of science as either a pre-requisite or co-requisite to other science elective courses. The required course will be designed to complete the 3 year sequence of physical and earth science standards as outlined in the Next Generation Science Standards (NGSS). This class, currently under development, will meet the needs and preferences of students at UHS and will prepare them to learn the processes of science in a way that will ensure they are well prepared for a lifetime of scientific literacy.

Two years of science is required for high school graduation. All courses are one year in length and should be entered in the fall of the year, except for Marine Science **and Anatomy and Physiology**, which can be entered at the semester. **Students entering Anatomy at the semester will be required to review first unit topics.** All science course enrollments for returning students require teacher permission for enrollment.

Students enrolled in AP Biology, AP Chemistry, AP Environmental Science, AP Physics or Chemistry may transfer to Anatomy and Physiology, Marine Science or Physics through the end of the fifth full week of school. Grades earned in class will transfer to the new class and students may be required to review/self-study topics from the first five weeks of school.

All Science Courses require recommendation from current science teacher in addition to meeting the prerequisites

NGSS Biology

Credits: 5 units per semester

Grade Level: 9

Length: 1 year

Honors NGSS Biology

Credits: 5 units per semester Grade Level: 9
Length: 1 year
Prerequisites:
≥ 90% in previous Science course, ≥ 85% on EOC, Teacher appraisal (2 of 3 required)
Refer to criteria for Honors/AP courses

NGSS Biology Sheltered

Credits: 5 units per semester Grade Level: 9
Length: 1 year

Chemistry

Credits: 5 units per semester Grade Level: 10-12
Length: 1 year
Prerequisites:
Completion of Biology or Honors Biology with ≥ C
Concurrent enrollment in Math II

Chemistry deals with the structure of matter and the changes matter undergoes. Laboratory experiments are performed by students to reinforce their understanding of basic concepts. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Upon completion of the course, the student will be able to

- Understand the role of chemistry in our daily lives
- Use an electronic balance, graduated cylinder, buret, and meter stick to make various measurements
- Arrive at conclusions through independent

The course covers similar content, but at a faster pace and more in depth than Chemistry, thus allowing more topics to be discussed. This rigorous course is intended for students who have a strong aptitude in science. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Marine Science

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year. Students may enter at the semester.
Prerequisites:
Pass an introductory Life Science & Physical Science course

Marine Science is designed to provide an in-depth study of physical and biological properties of the world's oceans. The first semester focuses on physical oceanography and includes a study of plate tectonics, seawater chemistry, currents, tides, beach processes, waves, sediments, and marine pollution. The second semester focuses on marine biology and includes a study of marine habitats, classification of life, marine ecology, and various marine

investigations Understand common scientific vocabulary used in chemistry

- Use laboratory equipment properly and safely
- Identify and use basic principles involving:
 - Dalton's Atomic Theory
 - Chemical reactions
 - Chemical bonding
 - Kinetic Theory of Gases
 - Acids and bases
 - Nuclear chemistry
 - Equilibrium
 - Oxidation reduction
 - Energy changes in chemical reactions
 - Stoichiometry
 - Chemical nomenclature
 - Mole concept
 - Periodic Table
 - Reaction Rates

Honors Chemistry

Credits: 5 units per semester Grade Level: 10-12
Length: 1 year
Prerequisites:
Completion of Biology or Honors Biology with ≥ B+
Concurrent enrollment in Enhanced Math II or higher
Refer to criteria for Honors/AP courses

Honors Chemistry is an in-depth study of matter and the changes matter undergoes. Laboratory experiments are performed by students to reinforce their understanding of basic concepts.

organisms and includes animal dissections. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Upon completion of the course, students will be able to:

- Explain how the physical features of the ocean are formed through geologic and biological processes.
- Describe the chemical composition of seawater and the formation of both large and small scale ocean circulation patterns.
- Describe selected marine habitats and their characteristic organisms
- Identify major threats to the marine environment and potential solutions to these problems.

Anatomy and Physiology

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year
Prerequisites:
Pass an introductory Life Science and Physical Science course (Completion of semester one with a passing grade is required to continue in semester two)

This course in human anatomy and physiology is designed to give the student an understanding of the structure and functions of the human body. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society. All students must participate in cat and various organ dissections.

Upon completion of this course, students will be able to:

- Describe the interrelationships of the various body systems
- List the primary functions of each of the body systems
- Define major pathological conditions of the human body
- Understand the roles of various professions in human medicine
- Identify various organs and systems from student dissected specimens.

Students entering at the semester will be required to self-study first unit topics.

Physics

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year

Prerequisites: $\geq$ B in Math II, and concurrent enrollment in or already completed Math III, FST, Pre-Calculus or higher level math

Physics is a survey course of the systematic principles that govern the physical world. Emphasis will be placed upon a conceptual and mathematical understanding of physical phenomenon. The concepts presented are: mechanics, heat and thermodynamics, electricity, magnetism, and electromagnetism, light and optics, sound relativity, and science and human affairs. This course is designed to meet the needs of all college bound students. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Upon completion of the course, students will be able to:

- Relate concepts in the abstract to actual experience
- Conduct laboratories and communicate the observations through written and graphical presentations
- Identify vectors and use vector diagrams to graphically solve problems
- Show the interrelationships between the basic properties of matter
- Demonstrate the importance of an understanding of physics to the technological, social, and economic problems
- Express concepts mathematically.

AP Biology

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year

Prerequisites: $\geq$ B avg in 9th & 10th Grade Honors Science courses, or $\geq$ B+ avg in 9th & 10th Grade CP Science courses
Refer to the criteria for science Honors/AP Placement

The Advanced Placement Biology course is designed to be the equivalent of a college introductory biology course usually taken by biology majors during their first year. It will include those topics regularly contained in a high-quality college program in introductory biology. The aim of the course is to provide students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Upon completion of the course, students will be able to:

- Describe how organic polymers are formed by repetitive combinations of simple subunits and that their chemical properties can be predicted from their structure
- Examine how metabolic pathways are regulated and explain the relationship between enzyme structure and enzyme specificity and function.
- Differentiate between prokaryotic cells, eukaryotic cells, and viruses in regard to their complexity, general structure and function
- Discuss how the central dogma of molecular biology outlines the flow of information from transcription of ribonucleic acid (RNA) in the nucleus to translation of proteins
- Explain the genetic basis for Mendelian genetics and predict the probable outcome of phenotypes in a genetic cross
- Know that specialization of cells in multicellular organisms is usually due to differential gene expression and signals in and between cells
- Examine how genetic engineering is used to produce novel biomedical and agricultural products and be able to manipulate DNA technology materials (restriction digestion by endonucleases, gel electrophoresis, transformation, and protein purification)
- Examine how natural selection determines the differential survival of groups of organisms and how a great diversity of species increases the chance that at least some organisms survive major changes in the environment
- Outline the major phylogenetic branches of the animal kingdom based on grades of organization
- Compare and Contrast the complementary activity of major body systems and explain how this provides animals with the ability to maintain homeostasis.

AP Environmental Science

Credits: 5 credits per semester Grade level: 11 – 12
Length: 1 year

Prerequisites: $\geq$ C in 10th grade science course (spring) and concurrent enrollment in, or already completed Math II or higher level math.

Refer to criteria for Honors/AP courses

This course is designed to be the equivalent of an Environmental Science course taken during the first year of college. AP Environmental Science is a full year college level laboratory course. Students will examine environmental issues from an economic, scientific, sociological and historical point of view. The goal of this course is to provide students with the scientific principles, concepts and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving and/or preventing them.

Upon completion of this course students will be able to:

- Use the scientific method to solve problems
- Design and conduct research through scientific and laboratory investigations using qualitative and quantitative measurements
- Exhibit, organize and present the results and conclusions of experiments and research
- Demonstrate proficiency in the use of laboratory equipment
- Identify objective scientific evidence and evaluate the advantages and disadvantages of different solutions to a problem
- Explain how energy conversions underlie all ecological processes
- Describe how the Earth is one interconnected system
- Identify and explain how humans alter natural systems
- Understand that environmental problems have a cultural and social context.
- Investigate human survival based on the development of practices that will achieve sustainable systems.

AP Chemistry

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year

Prerequisites: $\geq$ B in Honors Chemistry, or A grade in Chemistry (both semesters). Refer to the criteria for science Honors/AP Placement

Advanced Placement Chemistry is designed to be the equivalent of the general chemistry course usually taken during the first college year. For some students, this course enables them to undertake, as freshmen, second-year work in the chemistry sequence at their institutions or to register in courses in other fields where general chemistry is a prerequisite. For other students, Advanced Placement Chemistry fulfills the laboratory science requirement and frees time for other courses. Advanced Placement

Chemistry is designed to be taken only after the successful completion of a first course in high school chemistry. The advanced work in chemistry should not displace any other part of the student's science curriculum. It is highly desirable that a student have a course in secondary school physics and a four-year college preparatory program in mathematics. The physics course can well precede the college-level chemistry. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Upon completion of the course, students will be able to:

- Solve complex stoichiometric problems
- Predict products of chemical reactions
- Solve solution equilibrium problems
- Describe phenomena predicted by quantum theory
- Describe the electronic structure of atoms
- Describe molecular bonding
- Understand and apply the Kinetic Molecular Theory
- Calculate energy and entropy changes in chemical systems
- Relate free energy and equilibrium
- Relate nuclear stability with nuclear decay.

AP Physics 1 and 2

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year

Prerequisites: $\geq$ B in Math III or concurrently enrolled in Pre-Calculus or higher level math. See the criteria for Honors/AP science courses.

Advanced Placement Physics 1/AP Physics 2 is a first year trigonometry based program that prepares students to take **both** the Advanced Placement Physics 1 & 2 exams in May. This course is designed to parallel the AP 1 and AP 2 physics curriculum but will occur over one year instead of two. The concepts presented in the Physics 1 portion of the course are: Kinematics; Newton's Laws of Motion; Torque, Rotational Motion and Angular Momentum; Gravitation and Circular Motion; Linear Momentum; Work, Energy, and Power; Conservation Laws in Classical Mechanics; Simple Harmonic Motion, Waves and Sound; and Electrostatics and an Introduction to Electric Circuits. The concepts presented in the Physics 2 portion of the course are: Fluid Mechanics; Thermodynamics and Gas Laws; Electricity and DC Circuits; Magnetism; Lenses, Mirrors and Optics; Modern Physics; and an Intro to Special Relativity. A strong mathematics background is recommended, as well as the ability to simplify complex word problems into component parts. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Upon completion of the course, the student will be able to:

1. Through critical thinking process, apply the laws of physics to real life physical situations.
2. Read, understand, and interpret physical information, verbal, mathematical, and graphical data.
3. Describe and explain the sequence of steps in the analysis of a particular physical phenomenon or problem.
4. Communicate their experiences in a lab situation through well written responses.
5. Apply instrument based data collection for various applications and show the mathematical relationships that underlie the physical world.

ELD Science

Credits: 5 units

Grade Level: 9-12

Length: 1 semester

Prerequisites: CELDT test placement

Students enrolled in ELD Science will learn that scientific study is critical to understanding our world and our place in the universe. Focus will be on the fact that the earth consists of many separate, but interacting parts and a change in any one part can produce changes in any or all of the other parts. ELD Science emphasizes the acquisition of English vocabulary and language patterns and basic science concepts through the "doing" of science. It develops both background knowledge of science concepts and experimenting skills to allow successful mainstreaming for the targeted population. The course content uses the themes of measurement, cycles, patterns, changes, classifying, and interdependence to explore the earth sciences. Critical thinking and problem solving skills are a major component of all science classes. By developing an understanding of the role science plays in our daily lives, students will begin to develop a sense of the interrelationship of science, mathematics, technology and society.

Social Science

A major goal of the Social Science Department is to prepare students to be humane, rational, understanding, and participating citizens in a diverse society and an increasingly interdependent world. The curriculum should reflect a balance of personal, local, national, and international issues.

Criteria for Honors and AP Social Science courses:

The student:

- Is recommended for an Honors or AP social science course by his/her previous social science teacher
- Reads, independently, beyond assigned reading, for pleasure.
- Appreciates and applies constructive criticism to improve his or her writing.
- Demonstrates enthusiasm for reading, writing, discussion and other classroom activities.
- Demonstrates advanced writing skills in at least 5 timed, in-class essays, including: control of English syntax, diction, grammar as well as perceptive analytical skills.
- Understands that the Honors/AP course is graded predominantly on essays and exams.
- Is interested in following current events, reading newspapers, and expressing carefully considered opinions.

Social Science Course Offerings

All Social Science Courses require recommendation from current social science teacher in addition to meeting the prerequisite Enrollment in Honors and Advanced Placement requires the commitment noted in the Academic Program of this catalog

Course Title	UC a-g	Bonus Pt ‡	Length Year Semester	Prerequisites	Grade Low	Grade High

Social Science - Suggested Course Sequences

- Electives may be taken concurrently with some required courses. Refer to course descriptions.
- Refer to prerequisites for each course in the sequence. Honors and College Prep Course are available to all students meeting the course prerequisites.

College Preparatory 9 Global Perspectives 10 United States History 11 Social Science elective (optional) 12 Economics and Political Science	Social Science Electives 11-12 The American Experience 11-12 Psychology 11-12 World Religions 11-12 AP Psychology 11-12 World History 11-12 AP World History 11-12 AP Human Geography
College Preparatory, Most Rigorous Course of Study 9 Honors Global Perspectives 10 AP United States History 11 AP Social Science Elective (optional) 12 AP Economics and AP Political Science	

All Social Science Courses require recommendation from current social science teacher in addition to meeting the prerequisites.

Global Perspectives

Credits: 5 units per semester

Grade Level: 9

Length: 1 year

Prerequisites: none

In this course, students will examine major turning points that shaped the modern world. Students will focus on events which occurred in Western Europe, examining the political, social, and economic changes that occurred and how those changes affected the Modern Age. The spring semester research assignment will allow students to work independently in order to improve skills in research.

Upon completion of the course, students will be able to:

- Identify major physical and political features of Europe, Latin America, Asia, and the Middle East
- Explain the variety of ways in which geography influences a culture and its development
- Identify examples of Absolute Monarchy and how they contributed to the rise of nation-states
- Analyze the effects of the Glorious Revolution in England
- Identify the important philosophers and their ideas and evaluate the effect their philosophies had on the Enlightenment and the French Revolution
- Evaluate the effects of the Industrial Revolution on modern society
- Explain how nationalism, militarism, and Imperialism led to World War I and the system of alliances
- Understand how the weapons of the Industrial Revolution changed how wars were fought
- Evaluate the Versailles Treaty and the rise of

Totalitarianism as factors contributing to World War II

- Understand the causes and consequences of World War II
- Analyze the international developments in the Cold War era
- Understand and use terms which help to analyze the economic conditions of a country.

Honors Global Perspectives

Credits: 5 units per semester

Grade Level: 9

Length: 1 year

Prerequisites: Placement based on performance in 8th grade humanities / history course.

Refer to the criteria for Honors/AP social science courses

In this course, students will examine major turning points that shaped the modern world. While the content for this class is similar to the College Prep course, it varies in the quantity and quality of work required. Students are expected to read and write analytically, to have good organization and study habits, and to be self-directed. Students will focus on events which occurred in Western Europe, examining the political, social, and economic changes that occurred and how those changes affected the Modern Age. Analytical analysis and writing using valid resources will be key components of the course. Modern problems will be discussed. The spring semester research assignment will allow students to work independently in order to improve skills in research.

Global Perspectives (Sheltered)

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: CELDT test placement

This course is comparable to the college-preparatory Global Perspectives program in content, yet it addresses the particular needs of the ELD student. The spring semester research assignment will allow students to work independently and collaboratively in order to improve skills in research, presentation, and problem solving. Upon completion of the course, the student will be able to master the same content and skills developed in the non-sheltered course.

ELD Social Science

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 semester

Prerequisites: CELDT test placement

The class is presented to accommodate different levels of English mastery as well as provide the subject areas required by the Social Science Department. The student will read appropriate materials, complete written assignments, use technology, develop note taking skills and take tests on the material covered.

The basic areas of text instruction are the following:

1. Geography skills and concepts
2. American Government: organization and function of national, state, and local levels of government
3. Individual rights and responsibilities in a democratic society.

U.S. History

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: none

This course is a survey of 20th century America. The first quarter is a general review of United States history from its colonial inception to approximately the Civil War. It will focus on the origin and development of democratic institutions in America. The second quarter begins a more in-depth study of America in the 20th century and will focus on the Progressive Movement, American involvement in imperialism, World War I, and the 1920s. The second semester covers the period from the 1930s to the current time period, with particular emphasis upon the Great Depression, World War II, the Cold War, Civil Rights, the Vietnam War, the rise of the Conservative political movement in the 1980s, and the new technological advancements into the 21st century. A research paper is required in the second semester.

Upon completion of the course, students will be able to:

- Understand the impact of geography on the development of the United States
- Achieve a general comprehension of the foundation of American society that was established during the 18th and 19th centuries.

- Trace the major changes in economic development in the United States during the 20th Century
- Identify the transition in the status of African-Americans, women, Mexican-Americans, and other ethnic/minority groups in the 20th Century
- Identify the major social trends and reform movements in 20th Century America
- Trace the ongoing struggle between Congress and the executive branch for political supremacy in America
- Trace the changes in American foreign policy from isolationism to the present, particularly in the post-World War II era
- Understand the current foreign policy of the United States within the world today.

AP U.S. History

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: ≥ B+ (86%) in Global Perspectives, H or CP (Fall), and maintaining a high level of achievement. Take and pass a Document Based Question Essay exam. Refer to the criteria for Honors/AP social science courses

This course is an accelerated and intensive study of United States history from pre-colonial to contemporary times. Basic historical, economic, geographical, social, and political knowledge and concepts, as well as reasoning and research skills will be emphasized. Analytical writing is a core skill in this course and students can expect extensive writing assignments. This course will prepare students to take the Advanced Placement Exam in U.S. History.

Upon completion of this course, students will be able to:

- Identify the major geographical features of the United States
- Identify characteristics and the chronological sequence of major eras in American history
- Define the basic economic terms, concepts, and developments in U.S. economic history
- Identify the characteristics and major contributions of significant American presidents
- Trace the development of the American political party system
- Identify major Supreme Court decisions
- Identify the goals and accomplishments of major social reform movements
- Identify the major demographic trends in America
- Identify significant American writers, poets, artists, and architects
- Trace the development of American foreign policy
- Apply the skills and techniques of research to produce a position paper
- Identify the influence that frame of reference, bias and prejudice have on historical interpretation
- Write an interpretative essay based on primary documents.

U.S. History (Sheltered)

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: CELDT test placement

This course is comparable to the college-preparatory US History program in content, yet it addresses the particular needs of the ELD student. Upon completion of the course, the student will be able to master the same content and skills developed in the non-sheltered course.

Political Science

Credits: 5 units per semester

Grade Level: 12

Length: 1 semester

Prerequisites: none

The emphasis of study is the United States government. The student will learn about his/her own civic responsibilities in the political and economic aspects of his/her life.

Upon completion of the course, students will be able to:

- Define Political Science and discuss why a government is necessary
- Describe the three functions of government: legislative, executive and judicial
- Identify and describe the following political terms, concepts, and systems: autocracy, aristocracy, democracy, dictatorship, plutocracy, theocracy, authoritarian, despotic, totalitarian, coalition, federation, confederation, monarchy, parliamentary, republic, and anarchy
- Explain how each of the following political terms and concepts helps describe the United States government: democratic, republic, presidential, bicameral, constitutional, federal, sovereign, separation of powers, check and balances
- Explain the historical background/setting for the American political system
- Identify the parts of the American Constitution and their relationship to our system of government
- Explain the importance and influence of political parties, interest groups, political action committees (PAC's) and the media
- Describe what is foreign policy and its application to the world
- Identify state, county and city governments

AP Political Science

Credits: 5 units per semester

Grade Level: 12

Length: 1 semester

Prerequisites: >B in AP US History, or A- in CP U.S. History (spring). Refer to the criteria for Honors/AP social science courses.

This course is concerned with the nature of the American political system, its development over the past two hundred years, and how it works today. The goal of the course is to increase understanding of the American political system — of its traditions, values, and framework — as well as to understand how its components work

together smoothly for the most part, but at times with substantial friction.

Upon completion of the course, students will be able to:

- Define Political Science and discuss why a government is necessary
- Describe the three functions of any government: legislative, executive, judicial
- Identify and describe the following general types of government: autocracy, aristocracy, democracy, plutocracy, theocracy, authoritarian, despotic, dictatorship, totalitarian, coalition, federation, confederation, monarchy, parliamentary, republic, anarchy
- Explain how each of the following political terms help describe the United States government: democratic, republic, presidential, bicameral, constitutional, federal, sovereign, separation of powers, checks and balances
- Describe the cultural and ideological environment of the American experience
- Identify the parts of the American Constitution, apply this identification to the American political system, and analyze the document in relationship to the American federal system
- Generalize and hypothesize about the American political process and its effects on public opinion, the political process, political parties and elections
- Explain the general workings of the three branches of the American Government, plus the bureaucracy
- Explain the importance of the media, interest groups and political action committees (PAC's)
- Identify American civil liberties and civil rights and be able to analyze current and past issues related to these liberties and rights
- Identify state, county and city government structures and functions and apply these to the federal system.

Economics

Credits: 5 units per semester

Grade Level: 12

Length: 1 semester

Prerequisites: none

This course is designed to introduce students to the basic economic concepts and terms necessary for the understanding of economics. The course focuses on economic and political issues, such as scarcity, economic systems, supply and demand, gross domestic product, unemployment, inflation monetary policy and fiscal policy. Students will learn to use economic and political models and theories to analyze, predict, and develop solutions to problems. Students will be required to read excerpts from books, magazines, journals, and newspapers in addition to the textbook.

Upon completion of the course, the student will:

- Understand important micro and macro-economic terms and concepts essential for evaluating national/international issues
- Understand the factors that influence economic growth and development

- Analyze and evaluate how economics influences political choices for national and international events
- Identify and compare the important ideas of Adam Smith, Karl Marx, and Keynes and how they have influenced current economic thought
- Understand how a nation's fiscal, monetary, and trade policies are influenced by a global economy.

AP Macro Economics

Credits: 5 units per semester

Grade Level: 12

Length: 1 semester

Prerequisite: >B in AP US History, or A- in CP U.S. History (spring). Refer to the criteria for Honors/AP social science courses.

The purpose of AP Macro Economics is to give students an understanding of the principles of economics that apply to the functions of individual decision-makers, both consumers and producers, within the larger economic system. The course examines the nature and functions of product markets and factor markets and the role of government in promoting greater efficiency, equity and stability in the economy. The course places emphasis on the study of national income and price determination and also develops students' familiarity with economic performance measures, economic growth, and international economics.

Upon completion of the course, students will understand:

- Basic economic concepts: scarcity, nature of economic systems, opportunity costs, production possibilities, specialization and comparative advantage, and the functions of economics systems
- The nature and functions of supply and demand
- Measurement of economic performance: gross national product, gross domestic product, national income concepts, inflation, price indices and unemployment
- Macroeconomic models to analyze: Aggregate Supply, Aggregate Demand, Fiscal & Monetary Policy, the money market, land market and the loanable fund market. Finally, the trade-offs between inflation and unemployment to establish long-run equilibrium.
- The role of trade, including exports, imports, specialization; balance of payments, and exchange rates. The role of trade to encourage competition and innovation.
- The important elements to encourage economic growth in the long run.

The American Experience

Credits: 5 units per semester

Grade Level: 11-12

Length: Semester

Prerequisites: none

This course will examine the issues of gender, ethnicity and race throughout American history. It will be divided into five units; Beginnings, A Century of Intolerance, Hope, Revolution and Tomorrow. This course is specifically designed to be an interactive experience.

Upon completion of the course, the student will:

- Understand the perspective(s) of various individuals and groups as they relate to the American experience
- Demonstrate the ability to make relevant connections between various historical events
- Understand the relevance of historical events in relation to their individual daily life
- Demonstrate their knowledge of course material through the use of exhibitions and individual and group projects.

Psychology

Credits: 5 units per semester

Grade Level: 11 -12

Length: Semester

Prerequisites: none

This course is designed for students to explore who they are and how they relate to others. This course includes the study of sensation and perception, motivation and emotion, intelligence and creativity, memory, child development, adolescence, states of consciousness, conflict, stress and coping, socio-cultural influences, gender differences, theories of learning and personality, communication, mental disorders, treatment and therapy, and substance abuse.

Upon completion of the course, students will be able to:

- Identify and explain psychological theories and perspectives of personality as applied to individuals, groups and various social settings
- Understand the issues surrounding gender including masculinity, femininity, transgender and non-binary gender identities
- Analyze the psychology behind a variety of social issues including dating violence, victim blaming, mob mentality and bullying
- Analyze interpersonal communication process
- Describe the nature of mental disorders and examine types of therapy and treatment favored by the major approaches in psychology such as behavioral and cognitive
- Discuss the latest research on theories Positive Psychology and its impact on personal well-being

World Religions

Credits: 5 units per semester

Grade Level: 11-12

Length: Semester

Prerequisite: none

In this course students consider the principal religions of the world that are active today, influencing the lives of millions and impressing their image on the contemporary world. Students will deal with basic questions: What does humankind believe and what does it worship? In what ways? With what understandings of the ethical life? And with what influence on contemporary times and cultures? Rites and rituals, histories and events, orthodox and modern movements will all be examined while looking at each of the sacred texts and the religion's respective scholars. The following religious themes will be studied: Judaism: ethical monotheism, covenant, relationship with God, the Torah; Christianity: Jesus of Nazareth, Messiah, relationship to Judaism, crucifixion and resurrection, sin, eternal life, the New Testament; Islam: Mohammad, relationship to Judaism and Christianity, The Five Pillars, The Koran; Buddhism: Buddha, path of enlightenment, suffering, transmigration of the soul, Karma and Nirvana; Hinduism: monism, Brahma, impermanence, reincarnation, Karma, Hindu ethics, Upanishads and Baghavaghita.

World History

Credit: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: none

In this course, students examine major turning points in World History. During first semester, students study the shaping of the ancient world by examining the Egyptians, Mesopotamians, Greeks, Romans, and medieval civilizations, plus the beginnings of the modern western world with Nation-State building, Renaissance, and the Enlightenment. In the second semester, students examine the English and French Revolutions, Industrialization, Imperialism, World War I, Totalitarianism, World War II and the Cold War. A major group presentation, based on library research, will be required each semester, as will an outside reading assignment.

Upon completion of the course, students will be able to:

- Locate on a map the major topographical and political features of the world
- The establishment of early civilizations through the development of agriculture
- The moral and ethical principles in ancient Greek and Roman philosophy, Judaism, and in Christianity to the development of western political thought
- The French Revolution and its enduring impact on the political expectations for self-government and individual liberty
- The effects of the Industrial Revolution in England, continental Europe and the impact on the developing world
- The patterns of global change in the era of Imperialism
- The causes and effects of the First World War
- The causes and effects of the Russian Revolution and

the subsequent spread of Communism to developing nations

- The rise of totalitarian governments after World War I
- The causes and consequences of World War II
- The international developments in the post-World War II world

AP World History

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: ≥ B in AP U.S. History or A- in CP U.S. History (spring) and teacher permission. Refer to the criteria for Honors/AP social science courses.

The AP World History course is designed to comprehensively cover World History from approximately 8000 B.C.E. to the present. The course highlights the changes in the international framework, their causes and consequences, as well as comparisons among major societies. The course emphasizes relevant factual knowledge used in conjunction with interpretive issues, types of historical evidence, and appropriate analytical skills. The course builds on an understanding of cultural, institutional, and technological patterns that, along with geography, set the human stage.

Upon completion of the course, students will be able to:

- Use historical data to support an argument or position
- Interpret and apply data from original documents, including images as well as text
- Effectively use analytical skills of evaluation, cause and effect, compare and contrast
- Demonstrate knowledge of the impact of the early beginnings: Mesopotamian, Egyptian, Hebrew and Greek, Indian, and Chinese
- Compare and contrast the development of early political structures: Greek, Persian, Roman
- Identify the significance and the impact of the Italian Renaissance on Europe, art, and political thought
- Explain the development and the impact of Christianity on the Roman Empire, on the Middle Ages; demonstrate knowledge of the worldwide impact of the Protestant Reformation and the Counter-Reformation
- Explain the development and importance of each of the following major regions with regard to world history: India, China, Africa
- Develop an understanding of the worldwide impact of the French and Industrial Revolutions
- Demonstrate knowledge of Industrialization and Imperialism
- Compare the development of modern political structures: absolutism, monarchy, constitutional monarchy, dictatorships, totalitarianism, and republicanism
- Explain the significance of major historical personalities
- Identify and explain the significance of major historical

events

- Develop well-structured essays on given world topics.

AP Psychology

Credits: 10 units

Grade Level: 11-12

Length: 1 year

Prerequisites: >B in AP US History, or A- in CP U.S. History (spring). Refer to the criteria for Honors/AP social science courses.

The AP Psychology course will be designed to cover a wide array of topics including theories, personalities, and applications related to psychology.

Upon completion of the course, the student will be able to discuss, define, analyze and explain the following topics:

- Introduction and History of Psychology
- Research Methods
- Biological Bases of Behavior
- Sensation and Perception
- States of Consciousness
- Learning and Cognition
- Motivation and Emotion
- Developmental Psychology including childhood, adolescence, and adulthood
- Personality
- Individual Differences and Testing
- Psychological Disorders and their treatment
- Social Psychology

AP Human Geography

Credits: 10 units

Grade Level: 11-12

Length: 1 year

Prerequisites: >B in AP US History, or A- in CP U.S. History. Refer to the criteria for Honors/AP social science courses.

The purpose of the course is to introduce students to the systematic study of patterns and processes that have shaped human understanding, use and alteration of the Earth's surface. Students employ spatial concepts and landscape analysis to analyze human social organization and its environmental consequences. They also learn about the methods and tools geographers use in their science and practice. Students will be expected to complete extensive reading assignments and independent study, in addition to the regular classroom work. Special attention will be given to the writing process and the formulation of arguments through the use of supporting details obtained from content presented through the program of study. Students will need to anticipate the challenge of a rigorous curriculum. In this college level course, students will study major topics of human geography, including: basic concepts of geography; population and migration; cultural patterns and processes; political organization of space; agriculture and rural land use; industrialization and development; and cities and urban land use. This course qualifies for the honors level extra grade point credit.

Skills and Assessment: Students will be able to...

- Use and interpretation of maps and spatial data sets.
- Interpret and analyze the implications of associations among phenomena in places.
- Identify and interpret at different scales the relationships among patterns and processes.
- Define regions and evaluate the regionalization process.
- Characterize and analyze changing interconnections among places.
- Demonstrate critical thinking skills applied to writing through free response questions.

Visual and Performing Arts

The Visual and Performing Arts provide opportunities for aesthetic, cultural and affective expression. The Visual and Performing Arts Curriculum is designed to teach skills and pursue excellence among the widest possible form and type of activities. We believe all students can participate for enjoyment and with success. At all levels the performing arts emphasis is on individual personal development. Visual & Performing Arts courses meet graduation requirements in fine arts. All college preparatory courses meet the California State University and the University of California entrance requirements in fine arts.

Requirements for Participation in all Visual and Performing Arts performances:

Students participating in any school sponsored activity which requires extensive time outside of the regular school day shall comply with eligibility requirements. Refer to the extracurricular eligibility requirements in the academic program section.

Eligibility requirements are:

- Previous Quarter GPA 2.0
- Pass 4 classes Previous Quarter (20 credits)
- Enrollment in at least 4 classes

Participants who do not meet the above requirements are placed on academic probation for the subsequent quarter. Students on academic probation will work with school staff to monitor progress and provide guidance and support. Failure to meet the requirements for participation following a probationary period will result in ineligibility for the quarter. Ineligible status will continue until eligibility requirements are met. During the four high school years, no student will be placed on academic probation more than once. Students not passing 4 classes are not eligible for academic probation and are ineligible from participation.

Visual Arts Program

Studio Art

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisite: none

This is an introductory art course devoted to the understanding and application of artistic elements and principles of design. Students will use a variety of media as they learn fundamental art and design techniques. The work of historical and contemporary artists will be used as a backdrop for developing the student's own creative work.

Upon completion of the course students will be able to identify and demonstrate:

- The visual elements (line, shape, color, value, texture and space)
- The principles of design (unity/variety, balance, emphasis, contrast, rhythm, repetition, proportion/scale, figure/ground relationships)
- Composition (placement and arrangements of visual elements)
- Drawing skills using a variety of media
- Expressive composition, communicating an idea, theme, or emotion
- The proper use and care of art tools and materials
- Visual and design elements in contemporary and historical art works through written and oral critique
- Project planning and time management.

Advanced Studio Art

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year (this course may be repeated)

Prerequisite: Art Studio or teacher permission.

This course is designed for the self-motivated student who wishes to continue developing his/her art skills beyond the fundamental Art Studio course. Independent projects are designed for the student's appropriate level, and include weekly sketchbook drawing assignments and investigation of historical works of art. Students will explore different periods of art history in conjunction with class projects through slides, texts, and written material.

Upon completion of the course, students will be able to demonstrate:

- Complex problem solving skills applied to the use of visual elements, principles of design and composition to communicate one's individual voice through art
- In their own works of art a personal style and an advanced proficiency in communicating an idea, theme, or emotion
- Increased perceptual awareness and speed through weekly sketch book drawing assignments
- Creation of individual works of art of increasing complexity and skill in a variety of media that reflect the student's feelings and points of view
- Knowledge of universal concepts expressed in works

of art from diverse cultures and periods of history

- Apply various art-related theoretical perspectives to their own works of art and the work of others in classroom critiques.

AP Studio Art - Drawing

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: ≥ B in Advanced Studio Art and teacher permission. AP Art History Recommended.

This is a college-level course designed for the highly motivated student that is willing to spend extra time outside of the course period to complete work and perform research. The student will submit a portfolio for evaluation during the month of May in one of three categories, Drawing, 2-D Design, or 3-D Design. The portfolio will consist of 24 pieces of original work that reflect quality, concentration, and breadth. Works should reflect areas in research and development of in depth ideas; demonstrate principles of visual organization; and the ability to work in color and black and white, and a variety of mediums.

Upon completion of the course, students will be able to:

- Analyze the techniques, design elements and emotional impact of other artists' work.
- Demonstrate ability in problem solving and critical thinking by working on a personal interest in depth
- Demonstrate ability to work in several media
- Demonstrate technical ability in two and three-dimensional work.

Art of Fashion

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: none

This is a course that explores the world of fashion and teaches the student basic concepts and fashion fundamentals. It incorporates several creative art projects related to fashion. Students will be introduced to basic fashion terminology, textiles and fibers, garment styles and parts, basic fashion and business concepts, retail merchandising categories, design and production of apparel, retail business fundamentals and fashion promotion. This course includes the physical, psychological and social aspects of clothing along with how political and economic events affect fashion.

Beginning Ceramics

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: none

This class is for anyone interested in working in the medium of clay, regardless of talent or previous experience. Beginning Ceramics is an introductory course designed to give the students experience with basic hand building and potter's wheel techniques. Hand building techniques including pinch pot construction, coil construction and slab

building will be explored in a variety of projects. Basic throwing skills on the potter's wheel will be introduced. This course also includes the basics of both low and high-fire glaze application.

Students will learn the elements of design and how they relate to the ceramic form. The history of Ceramics and basic glaze chemistry will be discussed. Students will be asked to apply the elements of design, how they relate to ceramic form and how to successfully apply this language in an arts setting. In class, students will participate in individual and group critiques and will also complete one written museum, gallery, or art exhibit review. Written critiques and analysis of these experiences are required.

Intermediate Ceramics

Credits: 5 units per semester Grade Level: 10-12
Length: May be repeated up to 6 semesters
Prerequisites: Beginning Ceramics and teacher permission

Intermediate Ceramics is for the student who has shown both an interest and talent in working with clay. A variety of projects will give students the opportunity to increase their skills both on the potter's wheel and with a variety of hand building techniques. This course includes projects involving more advanced glazing techniques and wheel-thrown assignments. Students are expected to produce a significant body of work, both assigned and independent. Glaze chemistry will be discussed and, in pods, students assist in making studio glazes. Students will also learn more about the firing processes for the kilns. The role of Ceramics in various cultures will be discussed.

Upon completion of this course, students will be able to:

- Demonstrate intermediate level techniques on a variety of challenging projects
- Demonstrate advanced decorating techniques, including original mark-making, and application of underglazes, resists, and slip design
- Develop a personal body of ceramic work
- Participate in individual and group critiques
- Complete one museum or art gallery/art exhibition, including written critiques and analysis of these experiences
- Discuss glaze chemistry, the role of Ceramics in various cultures, and different types of firings and kilns.

Advanced Ceramics

Credits: 5 units per semester Grade Level: 11-12
Length: May be repeated up to 6 semesters
Prerequisites: Intermediate Ceramics or teacher permission.

Advanced Ceramics is for the student who has developed a talent in working with clay. This course is an independent study, with intermittent teacher-directed class reading, applied techniques, and individual challenges. Students will be responsible for designing their own projects and are expected to produce a significant, cohesive body of work. Glaze chemistry is further developed as students are

expected to make and test glazes for use in their own work. The role of ceramics in various cultures will be discussed.

Upon completion of this course, students will be able to

- Demonstrate advanced building techniques on a variety of projects
- Demonstrate advanced decorating techniques that are appropriate for the body of work being individually explored
- Develop a body of ceramic work that is recorded and stored in a digital file
- Participate in individual and group critiques
- Attend one museum, art gallery, or art exhibit per semester, including written critiques and analysis of these experiences
- Apply knowledge of glaze chemistry, the role of Ceramics in various cultures, and different types of firings in order to create original works of art.

AP Art History

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year
Prerequisites: >B in previously taken core Honors English or Social Science course, or A in previously taken core English or Social Science course (CP level).

This Advanced Placement course is designed to give the secondary student the same challenges and opportunities as those provided by an introductory college course in art history. Students will examine the major forms of artistic expression of the past as well as the present. This class requires a high degree of commitment to academic work. In addition to class lectures, slide presentations and test, the student will be expected to do considerable reading and writing of in-class essays.

Upon completion of the course, students will be able to:

- Express an understanding of architecture, sculpture, painting, and other art forms
- Demonstrate knowledge and understanding of these art forms within historical and cultural context
- Examine works of art critically, with intelligence and sensitivity
- Articulate what they see or experience from a work of art.

Graphic Design Studio

Credit: 5 units per semester Grade Level: 10-12
Length: 1 year Prerequisite: none

This course is an intermediate level art course designed to introduce students to the fundamentals of two dimensional design concepts and to develop artistic skills and knowledge. Student will develop an understanding of visual design, including typography and layout, logo and brand design, color theory, information design and composition. Through a series of projects and assignments students will explore the basic concepts of the Elements of Art (line,

form, texture, color, light, space) and the Principles of Design (rhythm, balance, proportion, harmony). Students will use various mediums and tools to expand their understanding of visual concepts and expand their knowledge of the design process including basic sketching, pen and ink, collage, printmaking (mono-prints, linoleum prints, screen printing), photography, and basic computer imaging. Students will learn to discuss and critique their own work as well as the work of their classmates effectively and to make changes based on those discussions. An emphasis will be placed on visually solving a variety of real-life 2D design problems. This course is designed to facilitate a real- world working studio/office environment; students will participate in collaborative brainstorming activities and complete projects on an individual, pair and group basis.

Upon completion of the course, students will be able to:

- Produce individual work using the basic elements of art and principles of design
- Synthesize traditional art work and new technologies to design an artistic product
- Critique peer and professional Design work
- Identify Design in the media arts industry and analyze the effectiveness as a communication device
- Demonstrate responsibility for the care and maintenance of the equipment, tools and studio
- Demonstrate individual and teamwork responsibility to complete projects within the given parameters
- Research and report in oral and/or written form a historical aspect of the 2D Design field, such as an artist of product
- Utilize creative problem solving through multiple solutions

Advanced Graphic Design Studio

Credit: 5 units per semester Grade Level: 11-12
Length: 1 year
Prerequisite: Graphic Design Studio and teacher recommendation

This course is designed for the self-motivated student who wishes to continue developing his/her design skills beyond the fundamental Graphic Design Studio course and who wishes to become a part of the design community at UHS. An emphasis will be placed on independent projects and school service projects as well as an investigation of historical works of art and design. Students will explore different periods of design history in conjunction with class projects through slides, texts, and other written material.

Visual Imagery (ROP)

Credits: 5 units per semester Grade Level: 10-12
Length: 1 year
Prerequisite: Students enrolled in ROP courses must meet age requirement.

Visual Imagery is an introductory course designed to give

the student experience taking digital photographs while learning the fundamentals of composition and design. Students will use Adobe Photoshop and Lightroom as an editing tool to correct and manipulate photographs. Students will gain a working knowledge of a digital camera, scanner and digital printers. The emphasis will be on teaching students how to “see photographically.”

Advanced Visual Imagery

Credit: 5 units per semester Grade Level: 11-12
Length: 1 year
Prerequisite: Visual Imagery and teacher permission.

This is an advanced photography course designed to instruct art students in software programs such as Adobe Photoshop and Illustrator. Students will apply graphic art and design principles with computer technology to visually communicate concepts and ideas.

Upon completion of the course, students will be able to:

- Visually demonstrate comprehension of the elements and principles of design
- Compile a journal of successful professional graphic designs and advertisements
- Analyze and evaluate professional designs
- Demonstrate their abilities to use “tools” with Adobe software
- Collect imagery using a digital camera
- Scan their negatives, slides, and 2-dimensional imagery into the computer
- Use Adobe Illustrator and Photoshop to produce designs visually communicating their own concepts and ideas
- Assemble a portfolio of their computer artwork
- Produce a sample resume
- Research computer graphics related career opportunities.

Video Production

Credit: 5 units per semester Grade Level: 10-12
Length: 1 year
Prerequisites: None

Video Production is a course designed to provide opportunities for students to develop introductory skills in television and video production. Content will include an overview of television and Video production techniques, history of Mass communication, with a special emphasis on film history and media literacy. Students will learn the correct use of the HD Camera, may use location and studio lighting and the use of digital editing suites. Students will edit using Adobe Premiere on Apple Computers. This course will also include planning the video project, writing for TV and movies and production of personal videos. Students will participate in individual and group critiques; Students may visit a TV studio/production company. Written critiques and analysis of these experiences will be required. Students will document and provide a written report on an

event where TV and video has had an effect on a social, political or economic event or change.

Advanced Video Production

Credit: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisite: Application and teacher permission. Must attend summer workshop and meet the ROP age requirements.

Students enrolled in this course will be creating the DVD Yearbook along with *Film Ed.

Students will work with professional equipment, such as high-end cameras, tripods, underwater casings, microphones and lighting. Students will edit using Final Cut Studio on Apple computers. Students will be responsible for producing, shooting and writing features to be included in the yearbook, as well as entering and attending film festivals, and producing the school broadcast

AP Studio Art: 2-D Design

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: Advanced Visual Imagery or advanced graphic design, and permission of instructor. AP Art History recommended.

This is a college-level course designed for the highly motivated student that is willing to spend hours of outside work and research. The student will submit a portfolio for evaluation during the month of May in one of three categories. The portfolio will consist of approximately 24 pieces of original work that reflect quality, concentration, and breadth. Works should reflect areas in research and development of in depth ideas; demonstrate principles of visual organization; and the ability to work in color and black and white both two and three dimensionally.

Upon completion of the course, students will be able to:

- Analyze works of other artists in relationship to techniques, design elements and emotional impact of the work
- Demonstrate ability in problem solving and critical thinking by working on a personal interest in depth
- Demonstrate ability to work in several media
- Demonstrate technical ability in two and three-dimensional work.

Photojournalism

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: none

Photojournalism is a class designed to give the student experience in all of the processes and techniques utilized in the production of the "ODYSSEY", the University High School annual publication. Students are selected for this class on the basis of interest, good writing skills. Art/Photography experience, not necessary, but a definite plus as these skills are very important in the production of the yearbook, and a desire to be part of the production team, that produces the "Odyssey". The course is structured to give the student an understanding of the role of print media in society. To develop the skills of composition, page layout and the use of artwork and photographs in a publication and to gain a historical awareness of print media. The student will develop the ability to search out information, organize, edit and prepare it for publication, working individually and with other members of the staff. Students will participate in individual and group critiques, may visit a production publishing business and submit a written analysis of their visit and conduct a feature interview, editing and producing a finished written article as a result of the interview.

Performing Arts Program

Dance Technique I

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: none

Dance Tech I is the beginning study of dance as a theatrical art form. Students will study the history, basic dance techniques and vocabulary used in choreography, jazz, ballet, world dance, and modern dance. Basic choreography theory will be taught through the use of sculpture – space, internal motivation – energy, and time – tempo. Students will study improvisation and choreography theory by developing dance projects. Students will be involved in critical thinking and problem solving when utilizing choreography elements to create a dance. Students will develop fundamental artistic and aesthetic understanding when writing critiques on live dance concerts, and dance video. They will analyze the use of costumes, lighting and choreography. Students will use communication skills in a recital, which will include choreography, costuming and music in a public performance.

Upon completion of the course, students will be able to:

- Execute proper elementary warm up exercises for jazz, ballet, and modern dance
- Demonstrate simple dance combinations, center work and across the floor using techniques in jazz, ballet, and modern dance
- Develop use of basic dance vocabulary and terminology
- Choreograph dances solving problems involving parameters within counts, ideas and patterns
- Show aesthetic valuing when analyzing both live and taped dance concerts
- Experience performing ballet, modern and/or jazz in a theatrical performance
- Demonstrate Dance vocabulary knowledge through written and oral assessment: written and oral evaluation of projects by the teacher, written reports on specific choreographers and written critique of an amateur or professional dance performance.

Dance Technique II

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Dance Tech 1 or audition.

Dance Tech II is the continued study of dance as an art form. Students will study dance techniques and vocabulary used in jazz, ballet, world dance, modern dance and choreography. This will include learning about choreographers and styles of dance such as: Duncan, Graham, Dunham, Duato, McKayle, Ailey, Kylian, Lewitsky, Balanchine, and Petipa. Students will understand, appreciate and demonstrate dance as a way to create and communicate meaning and emotion. Students will identify and demonstrate movement elements and skills, and the

understanding of choreographic principles, processes, and structures. The theory of choreography will be taught through the use of theme and variation, unity and rhythmic organization. The elements of choreography using critical thinking and problem solving will be used in group projects and improvisation. Students will develop fundamental artistic and aesthetic understanding by writing critiques of live dance concerts and dance videos. Students will use communication and interpretation skills in a recital, which will include choreography, costuming and music in a public performance.

Upon completion of the course, students will be able to:

- Execute proper warm up exercises for jazz, ballet, and modern dance
- Demonstrate complete dance combinations, center work and across the floor, using techniques in jazz, ballet and modern dance
- Critique self, peer and professional performances
- Choreograph dances solving problems involving set parameters within set parameters in rhythmic organization, unity and space
- Show aesthetic valuing with written critiques on live and taped dance concerts
- Demonstrate knowledge performing ballet, modern, jazz dance and world dance in a theatrical setting
- Write a paper on the history of dance including world cultures, historical periods and its relationship to other arts
- Demonstrate Dance vocabulary knowledge through written and oral assessment Techniques: written and oral analysis of student dances by the teacher, based on choreography technique, written tests on dance terminology and history, written and oral critiques, by students of professional and amateur dance concerts.

UHS Production

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year (may not enter at semester)

Prerequisites: Audition only

This class is devoted to the development of techniques and choreography for various dance performances throughout the year. The class will also be involved in rehearsals for the development of a complete dance concert, some of which will be held outside the school day. This includes developing individual and group dances, coordinating costumes, and designing special effects needed to highlight the production. This class will also provide a continuing education in the areas of dance technique and choreography theory.

Upon completion of the course, students will be able to:

- Choreograph and/or dance in a group or solo dance
- Assist in the planning of a performance consisting of dances

- Choreographed in class. This includes costume design
- Publicity, rehearsals, music choice, stage crew, organization
- Demonstrate more advanced dance technique
- Comply with attendance procedures
- Demonstrate individual and teamwork responsibility

Drama 1: Introduction to Acting

Credits: 5 units per semester Grade Level: 9-12
 Length: 1 year
 Prerequisites: None

Drama 1 will provide the student with exploration of body, voice and characterization. Activities include ensemble games, improvisation, body & sensory awareness, movement, dramatic structure, character creation, diction work, scene study, script analysis, theatre history, and theatrical critique. Emphasis is placed on the development and performance of comedic and contemporary scenes and monologues. Upon completion of the course, students will be able to:

- Develop an understanding of basic theatre techniques
- Identify basic theatrical terminology
- Perform scenes and monologues in various theatrical styles
- Discover and cultivate individual talents
- Gain self-discipline and learn self-evaluation.

Drama 2: Auditioning, Improv & Musical Theatre

Credits: 5 units per semester Grade Level: 10-12

Length: 1 year
 Prerequisites: Drama 1 or Audition

Drama 2 will provide the student with a foundational repertoire of theatrical literature. The focus is placed upon Audition Techniques, Improvisation, Musical Theatre and Playwrights. Activities include short form improvisation, basic musical theatre technique, script analysis and theatrical critique. Students involved in this course will compete in theatre festivals as well as formal performances for the community. Emphasis is placed on the development and performance of stylized material.

Upon completion of the course, students will be able to:

- Identify and research cultural, historical and symbolic clues in dramatic texts from various theatrical styles and genres for informal and formal productions.
- Develop and demonstrate an understanding of basic Audition Technique
- Create improvisations based on situations implied or alluded to, gaining greater insight into character
- Direct, sing and choreograph production numbers from musicals in various eras

- Demonstrate an understanding of “the method” acting technique
- Compete in theatrical festivals
- Perform full length formal works of theatre

Advanced Drama

Credits: 5 units per semester Grade Level: 11-12
 Length: 1 year
 Prerequisites: Appropriate skill level determined by teacher.

Advanced Drama is a course for the student serious about his work on stage. Students in this course will delve deeper into Arts, Media and Entertainment through the lens of the professional actor, director and playwright. Exercises exploring the acting theories of Stanislavski, Chekov, Meisner, Adler, Hagen and Spolin are critical to the class experience. Students will develop portfolios of their work and resumes to be used in competition, for scholarships, during college auditions and for formal performance. The course final will be to produce, direct and perform a complete work that is entirely student done in collaboration with Advanced Technical Theatre students.

Upon completion of the course students will be able to:

- Exhibit mastery of vocabulary, directorial skills and rehearsal technique
- Display soft skills crucial to success in arts, media and entertainment
- Perform at advanced skill levels relating to a variety of styles and genres of theatrical performance
- Demonstrate leadership by organizing productions and shows for class or school production

Technical Theatre: Stagecraft

Credits: 5 units per semester Grade Level: 9-12

Length: 1 year
 Prerequisites: None

Technical Theatre is an introduction to stagecraft. Students will work collaboratively as they study the basic aspects of technical theatre production with emphasis on construction techniques for theatrical stage settings. All areas of backstage crafts will be taught: sets, scenery, properties, effects, lighting, sound, costuming, hair and make-up. The class follows a 70:30 model for a hands on approach to learning. Students will study theatre configurations, theatre safety, tool usage and identification, production values, script analysis, the design process and theatrical styles. Students will be encouraged to participate as crew for the fall play and spring musical.

Upon completion of the course students will be able to:

- Develop soft skills crucial to success in arts, media and entertainment
- Analyze a script
- Identify the parts of a theater and stage
- Demonstrate a working knowledge of basic tools and safety practices used in theatrical construction
- Choreograph scene changes
- Draft a simple stage set
- Hang and focus lighting instruments
- Design costumes, hair and make-up for characters in a theatrical work

Advanced Technical Theatre: Design & Stage Management

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: Technical Theatre, Tech Boot Camp and Teacher Permission

Advanced Technical Theatre continues the technical theatre production skills necessary for careers in arts, media and entertainment. Each individual will be expected to independently seek out the knowledge necessary to further his/her understanding of theatrical design in his or her specific production value of choice working hand in hand with the theatre and technical director. These are the student designers of Uni Theatre Arts. In this course, students will design for the fall play and spring musical as well as work crew for various department events to further their experience in other forms of entertainment. Students enrolled in this course must also be enrolled in Advanced Theatre Production where their designs will be realized as they lead and mentor crews of their peers, passing on their knowledge and skills. . Students will develop portfolios of their work and resumes to be used in competition, for scholarships, during college interviews and for formal performance. The course final will be to produce, direct and perform a complete work that is entirely student done in collaboration with Advanced Drama students. Upon completion of the course students will be able to:

- Demonstrate soft skills crucial to success in arts, media and entertainment
- Exhibit mastery of vocabulary, technical skills and design techniques
- Analyze a script for artistic intent and directorial vision
- Draft, render, engineer and pitch theatrical designs
- Pitch at advanced skill levels in a variety of styles and genres of theatre
- Compete in theatre festivals
- Design for main-stage productions
- Demonstrate leadership by organizing productions and shows for class or school production

Advanced Theatre Production

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Audition Only

Advanced Theatre Production students participate in the school's theatre productions: including the fall play and/or spring musical. The class only meets during the rehearsal for production. The students will maintain and extend their training through hands on application of their skills. In order to enroll in this course, students must audition or interview for the main stage productions and be cast by the theatre director. Priority casting will be given to students who have completed training in Uni Theatre Arts classes. The students will also participate in theatre award and scholarship programs.

Upon completion of the course students will be able to:

- Demonstrate soft skills crucial to success in arts, media and entertainment
- Exhibit mastery of time management
- Bring a story to life for the community
- Compete in theatre award and scholarship programs
- Perform in main-stage productions as actors or technicians

University Choir

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: none

This is a choir for students who have had or would like to learn the basic foundations in singing and music theory. Students will study two, three, and four part music, vocal techniques, music reading, and ear training. Training will include three or more public concerts and festivals.

Upon completion of the course, students will be able to:

- Sing independently, on pitch and in rhythm, with appropriate tone quality, diction, and good posture
- Sing expressively with appropriate dynamics, phrasing, and interpretation
- Sing from memory a varied repertoire of songs representing styles from diverse cultures
- Sing music with and without accompaniment
- Demonstrate well-developed ensemble skills
- Develop musical responsiveness, involvement, and discrimination
- Develop skills necessary to become capable and intelligent performers, creators, and consumers of music.

Madrigal Singers

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Vocal music teacher permission

This course is open by audition to the advanced student demonstrating skill in part reading. Literature is taken from early madrigal period to the twentieth century. Numerous public performances, possible IUSD Honors Concert and festivals are required.

Upon completion of the course, students will be able to:

- Perform music on an advanced level
- Further develop good choral singing techniques
- Continue to develop an understanding of music theory
- Interpret music from many different styles
- Demonstrate appropriate performance skills.

Canta Bella

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Vocal music teacher permission

This course is open by audition to the advanced treble voiced (female) student demonstrating skill in part reading. Literature is taken from early madrigal period to the twentieth century. Numerous public performances are required.

Upon completion of the course, students will be able to:

- Perform music on an advanced level
- Further develop good choral singing techniques
- Continue to develop an understanding of music theory
- Interpret music from many different styles
- Demonstrate appropriate performance skills.

String Orchestra (Beginning & Intermediate)

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Must be able to read music, have played a string instrument for at least two years, and provide own instrument (UHS will provide string basses when available).

This course is intended to build basic instrumental techniques for students who play violin, viola, cello, bass, and harp at a beginner to intermediate level. Students will learn basic performance skills, a historical background of music, and music theory. Credit for this course is awarded on the basis of class participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of this course, students will be able to:

- Demonstrate playing ability of all major scales
- Demonstrate a basic to intermediate level of performance skills on their instrument
- Demonstrate a basic knowledge of music theory
- Participate successfully in festivals and in concerts.

Concert Orchestra (Intermediate & Advanced)

Credit: 5 units per semester

Grade Level: 9-

12

Length: 1 year

Prerequisites: Audition

This course is intended to build basic instrument techniques for the students who play violin, viola, cello, string bass, piano and harp at the intermediate level. Students will learn technical performance skills, a historical background of music, and basic music theory. Credit for this class is awarded on the basis of class participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Demonstrate the ability to play all major scales
- Demonstrate an intermediate to advanced level of playing ability on their major instrument
- Demonstrate knowledge of music theory at a level appropriate to intermediate musicianship
- Participate in festivals, competitions, and public performances.

Symphony Orchestra (Advanced)

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Audition. Wind players must be enrolled in a wind band to be eligible for consideration.

This course is intended for the advanced student who plays violin, viola, cello, string bass, piano, and harp. The Symphony will be augmented by wind and percussion players from the Wind Ensemble. The Symphony performs concerts as well as special music for the school and community. Students will learn advanced performance skills, a historical background of music, and theoretical concepts in music. Credit for this class is awarded on the basis of class participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance.

Upon completion of this course, students will be able to demonstrate:

- Advanced level playing ability on major instrument
- A knowledge of music theory at a level appropriate to advanced musicianship
- Ensemble performance skills
- Participation in festivals, competitions, and public performances.

Philharmonic Orchestra (Advanced)

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Audition

This course is intended to build basic instrument techniques for the students who play violin, viola, cello, string bass, piano and harp at an advanced level. Students will learn technical performance skills, a historical background of music, and basic music theory. Credit for this class is awarded on the basis of class participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Demonstrate the ability to play all major scales
- Demonstrate an intermediate to advanced level of playing ability on their major instrument
- Demonstrate knowledge of music theory at a level appropriate to intermediate musicianship
- Participate in festivals, competitions, and public performances.

Concert Band (Beginning - Intermediate)

Credit: 5 units per semester

Grade Level: 9-12 Length: 1 year

Prerequisites: Appropriate skill level determined by teacher.

Concert Band is designed for beginning to intermediate wind players and percussionists. This course is intended to build basic instrumental techniques. Students will reinforce basic performance skills through regular scale work and technical exercises. They will also learn basic musicianship skills, a historical background of music, and basic music theory. Performances will include concerts and festivals. Credit for this class is awarded on the basis of participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Demonstrate playing ability of all major scales
- Develop an intermediate level of playing ability on their major instrument
- Develop knowledge of music theory at a level appropriate to intermediate musicianship
- Participate in public performances.

***Symphonic Band (Intermediate)**

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Audition

Symphonic Band is designed for intermediate wind players and percussionists. Students will reinforce intermediate performance skills through regular scale work and technical exercises. They will also learn musicianship skills, a historical background of music, and basic music theory. Performances will include concerts and festivals. Credit for this class is awarded on the basis of participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Demonstrate playing ability of all major scales
- Develop an intermediate to advanced level of playing ability on their major instrument
- Demonstrate knowledge of music theory at a level appropriate to intermediate musicianship
- Participate in public performances.

Wind Ensemble (Intermediate - Advanced)

Credit: 5 units per semester Grade Level: 9-12 Length: 1 year

Prerequisites: Audition

Wind Ensemble is designed for the intermediate - advanced wind players and percussionists. This group will learn and perform advanced high school wind literature and perform in concerts and festivals. The Wind Ensemble performs concerts as well as special music for the school and community. Credit for this course is awarded on the basis of participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Demonstrate the ability to play all major scales and arpeggios
- Develop an advanced level of playing ability on their major instrument
- Demonstrate knowledge of music theory at a level appropriate to advanced musicianship
- Participate in festivals and concerts

Wind Symphony (Advanced)

Credit: 5 units per semester Grade Level: 9-12 Length: 1 year

Prerequisites: Audition

Wind Symphony is designed for the advanced wind players and percussionists. This group will learn and perform high-level high school wind literature and perform in concerts and festivals. The most advanced players in this ensemble will be asked by the instructor to perform with the Symphony Orchestra when appropriate. The Wind Symphony performs concerts as well as special music for the school and community. Credit for this course is awarded on the basis of participation at rehearsals, concerts, and festivals in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Demonstrate the ability to play all major scales and arpeggios
- Develop an advanced level of playing ability on their major instrument
- Demonstrate knowledge of music theory at a level appropriate to advanced musicianship
- Participate in festivals and concerts

Marching Band

Credit: 5 units per semester Grade Level: 9-12
Length: 1 year (Offered both Fall and Spring Semesters)

Units may count towards P.E. Credit; Physical Fitness Test: All students, including students enrolled in marching band, are required to take the California Physical Fitness Test and pass five out of the six fitness areas.

Prerequisites: Appropriate skill level and concurrently in Concert Band, Symphonic Band, Wind Ensemble or Wind Symphony. Student must attend summer rehearsals at UHS to participate.

All levels of ability are encouraged to participate. Students will develop the ability to play standard marches, pep songs, and field music. Students will also learn proper marching and maneuvering techniques. During the first semester, the group will work as a marching unit and perform at football games and field shows. Credit for this class is awarded on the basis of participation at rehearsals, field show performances, and parades in addition to the instructor's evaluation of each student's performance ability.

Upon completion of the course, students will be able to:

- Coordinate marching and playing skills
- Execute precision marching routines by memory
- Participate in parades, field shows, football games, and public performances
- Perform all music necessary for public performances by memory.

Color Guard

Credit: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Audition

Units may count towards P.E. Credit. All students are required pass the California Physical Fitness Test.

Students will learn intricate and skilled body maneuvers, improving personal coordination and artistry by rehearsing daily to different styles of music. Students will work with short and tall flags, as well as other equipment. In the first quarter, the Color guard will perform with the Marching Band at football games and field show competitions. For the duration of the school year, the Color guard will develop and perform a show in the Winter guard circuit. Credit for this class is awarded on the basis of participation at rehearsals and performances in addition to the instructor's evaluation of each student's performance ability.

Upon completion of this course, students will be able to:

- Spin flags and other equipment
- Demonstrate dance and movement techniques
- Perform using all the above techniques.

Jazz Ensemble 1

Credit: 5 units per semester Grade Level: 9-12 Length: 1 semester (spring semester)

Prerequisites: Audition

This course concentrates on the study and performance of jazz styles which include swing, blues, Latin, jazz, rock, and big band. The student will be introduced to the art of jazz improvisation. This class will be taught at an intermediate to advanced level. This ensemble performs concerts as well as special music for the school and community. Credit for this class is awarded on the basis of participation at rehearsals, concerts, and festivals, in addition to the instructor's evaluation of the student's performance ability.

Upon completion of the course, students will be able to:

- Perform music in swing, blues, Latin, jazz, rock, and big band at an advanced level
- Demonstrate jazz solo skills
- Learn special ensemble techniques required in the performance of jazz styles
- Demonstrate knowledge of jazz history and aural traditions through listening skills.

Jazz Ensemble 2

Credit: 5 units per semester Grade Level: 9-12 Length: 1 semester (spring semester)

Prerequisites: Audition

This course concentrates on the study and performance of jazz styles which include swing, blues, Latin, jazz, rock, and big band. The student will be introduced to the art of jazz improvisation. This class will be taught at a beginner to intermediate level. This ensemble performs concerts as well as special music for the school and community. Credit for this class is awarded on the basis of participation at rehearsals, concerts, and festivals, in addition to the

instructor's evaluation of the student's performance ability.

Upon completion of the course, students will be able to:

- Perform music in swing, blues, Latin, jazz, rock, and big band at an advanced level
- Demonstrate jazz solo skills
- Learn special ensemble techniques required in the performance of jazz styles
- Demonstrate knowledge of jazz history and aural traditions through listening skills.

AP Music Theory

Credit: 5 units per semester

Grade level: 10-12 Length: 1 year

Prerequisites: Advanced experience on Primary instrument and teacher recommendations.

This course is designed for music students with advanced music skills and a strong interest in music. This course will prepare students for the Advanced Placement Music Theory Exam. This course integrates aspects of melody, harmony, texture, rhythm, form, music history and style, and performance practices.

Upon completion of this course, students will be able to:

- Compose a 32 measure musical composition in a chosen style
- Demonstrate developing speed and fluency in working with musical notation
- Exhibit advanced skills in melodic, harmonic, and rhythmic dictation
- Perform sight-singing in 4 to 8 measure melodies in major and minor tonalities.

Music Technology

Credit: 5 units per semester

Grade level: 9-12 Length: 1 year

Prerequisites: Some ability to play piano or guitar.

This is a practical course using computer software and electronic instruments to transform an idea into a sound. Students will explore music in the media arts including TV, Film, advertisements, and games. Students will use both their musical and technological creativity to create music compositions. Using sequencer and editing software students will record audio or MIDI (Musical Instrument Digital Interface) musical compositions. Upon completion of this course, students will be able to:

- Demonstrate an understanding of industry standards for producing music technology.
- Record original work using electronic instruments.
- Use sequencing software to create music compositions for a variety of projects.
- Demonstrate an understanding of the processes of synthesizing.
- Produce master tapes and CD's; produce live sound using mixing boards and effects producers.
- Demonstrate that the parameters of music can be controlled using MIDI.
- Understand copyright laws related to the music industry.
- Create an electronic composition specific for different media (i.e. movie trailer, advertisement, school broadcast news, etc.)

World Language

Knowledge of and proficiency in foreign languages are important tools in today's world. They lead us to a better understanding of, as well as communication with, other people and nations. We offer programs in 5 languages: Chinese, French, Latin, Spanish and American Sign Language. The Chinese, Latin and Spanish programs offer five- year programs, including a fifth year of Advanced Placement. In all programs, reading, writing, speaking and listening skills are stressed as well as cultural studies. Our students use our language lab on a regular basis when appropriate. We believe that all of these components together are necessary to achieve language proficiency and understanding. All of our courses are yearlong with entry in the fall.

World Language Department Course Offerings

All World Language courses above level 1 require permission from the current world language teacher

Enrollment in Advanced Placement requires the commitment noted in the Academic Program of this catalog

Chinese Program

Chinese 1

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Must be a non-native speaker.

First year Chinese students will learn the basics of both the spoken and written language. A Romanized phonetic pronunciation system called “Pinyin” will be introduced. Listening, speaking and reading will be emphasized and students will be introduced to writing.

Upon completion of the course, students will be able to:

- Master the Pinyin system
- Build a primary vocabulary
- Comprehend basic conversational Chinese
- Construct both orally and in writing simple sentences about self, family, school and activities
- Identify different aspects of daily life and customs in Chinese culture.

Chinese 2

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: ≥ C in previous level

This course will continue developing students’ vocabulary, deepening their understanding of Chinese word formation and sentence structure and building upon listening, speaking and writing skills.

Second year students will be able to

- Speak with increased fluency
- Express themselves orally with a variety of sentence structures
- Demonstrate understanding of topics, such as school subjects, holidays and festivals, TV programs, movies, and sports
- Ask and give directions, explain health concerns at a doctor’s visit, make comparisons
- Recognize more Chinese characters
- Construct compound and complex sentences.

Chinese 3

Credits: 5 units per semester

Grade Level: 9 -12

Length: 1 year

Prerequisites: ≥ C in previous level

The third-year student will be more fluent in speaking Chinese and will learn to read Chinese characters without relying upon the phonetic system. They are encouraged to apply their knowledge to “real” communicative situations.

Upon completion of the course, students will be able to:

- Talk about Chinese food, read menus order meals and interact in a socially appropriate way
- Demonstrate knowledge of traveling in China, make travel arrangements, take public transportation, and other related issues
- Express opinions both orally and through writing
- Read selected poems and short stories

- Write guided essays or stories.

Chinese 4

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: ≥ C in previous level and teacher recommendation

Students in this advanced class will study various topics, from food to cultural differences and social issues. Chinese history and stories will also be introduced and discussed at this level. Students will be asked to express their own opinions through class discussions, presentations, and writing. It is the objective of this course to continue strengthening students’ Chinese language skills in listening, speaking, reading, and writing. They will simultaneously develop their critical thinking and problem-solving skills and make connections to the community.

Upon completion of the course, students will be able to:

- Understand Chinese at a normal speaking rate and in a wide range of situations
- Express opinions and abstract ideas orally with correct grammar and increased fluency
- Write short compositions, poems and stories
- Read letters, advertisements, newspaper articles and books intended for the young adult reader
- Understand some Chinese history and literature.

AP Chinese Language and Culture

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: ≥ C in previous level and teacher recommendation

This course is designed to develop students’ Chinese language proficiency at an advanced level and is equivalent to a college course. This class will provide students with various opportunities to immerse themselves in the language and culture. The AP Chinese class follows the five C’s (Communication, Cultures, Connections, Comparisons, and Communities) and three modes suggested by the College Board to help students acquire comprehensive language and cultural skills.

Upon completion of this course, students will be able to:

- Communicate in linguistically and culturally appropriate ways in a wide range of situations
- Comprehend and interpret written Chinese texts that pertain to daily life
- Read short stories and selected literary works
- Write with accuracy and sophistication
- Skillfully use Chinese word processing software
- Understand Chinese society and apply cultural knowledge.

French Program

French 1

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: None.

The first two semesters serve as an introduction to French language and culture. Our communication-based approach places students in situations that they might really encounter in a French speaking environment. When introducing structures and vocabulary, we move from controlled exercises to open-ended activities in which students are asked to handle a situation much as they might in the actual experience. Through this course, students increase proficiency in the following. This course will develop grammar and vocabulary skills which will enhance students' knowledge of the English language as well as their performance on standardized tests such as the SAT's.

Upon completion of the course, the students will be able to do the following in French:

- Talk about themselves, their family and friends
- Communicate in basic practical French travel, ordering food, making purchases. Discuss activities and interests
- Use appropriate language in a variety of social interactions.

French 2

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: ≥ C in previous level

As students move through the French program, they will increase their ability to understand what others say and to transmit more of their own messages in ways that avoid misunderstanding. The emphasis is not on accumulating large quantities of knowledge about French grammar and vocabulary, but rather on using what is known effectively and creatively. Through this course, students increase proficiency in the following. This course will develop grammar and vocabulary skills which will enhance students' knowledge of the English language as well as their performance on standardized tests such as the SAT's.

Upon completion of the course, the student will be able to do the following in French:

- Interact with others about daily, weekend and vacation activities, as well as family and school life
- Utilize communication options, such as the telephone and the postal system
- Talk about health concerns
- Expand cultural knowledge about France and francophone countries with their varied customs, landscapes and points of interest.

French 3

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: ≥ C in previous level

Students progress in developing skills in everyday functional French while developing analytical skills to approach language learning and activate their knowledge in real communicative situations. They develop a basis for understanding and appreciating authentic French literary texts, the media and the arts. This course will develop grammar and vocabulary skills which will enhance students' knowledge of the English language as well as their performance on standardized tests such as the SAT's.

Upon completion of the course, the student will be able to do the following in French:

- Communicate with others in French regarding travel, leisure, popular culture, health
- Understand and talk about the media and the arts in France
- Understand and write about a variety of literary texts from the French-speaking world.

French 4

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: ≥ C in previous level

Students will develop their fluency in written and spoken French by studying various genres of French and francophone literature from several centuries. Their appreciation of French cinema will be enhanced by the viewing of French films. The course will reinforce and improve the students' language skills through advanced grammar study, writing, and classroom discussion which will take place entirely in French. This course will develop grammar and vocabulary skills which will enhance students' knowledge of the English language as well as their performance on standardized tests such as the SAT's.

Upon completion of the course, the student will be able to do the following in French:

- Understand a variety of oral presentations at normal conversational speed, e.g. native speakers, films, tapes, etc.
- Express emotions, desires, opinions, and abstract ideas orally
- Understand literature and the print media (newspapers)
- Write formally and informally on a variety of topics.

Latin Program

Latin 1

Credits: 5 units per semester

Grade Level: 9-12.

Length: 1 year

Prerequisites: None.

The student will be introduced to the basic skills of reading, writing, listening to and speaking Latin. The course gradually develops these abilities through the reading of stories and plays which depict daily Roman life. The reading and discussion of true-to-life situations in Pompeii, Roman Britain and Roman Egypt provide the student an introductory background to the cultural, social, and political life and the history of the Romans. The course emphasizes the improvement of Basic English skills and vocabulary while learning Latin.

Upon completion of this course, students will be able to:

- Read short narrative passages in Latin and translate them into English
- Write simple phrases and sentences using most forms of verbs, nouns, and adjectives in Latin
- Demonstrate correct pronunciation of Latin
- Recognize and analyze basic grammatical structures of Latin and demonstrate a better understanding of English grammar
- Demonstrate an enrichment of English vocabulary through the study of Latin words, including prefixes, roots, and suffixes
- Describe major gods, heroes and stories of Roman and Greek mythology
- Discuss selected historical persons, places, and situations during the Republic and Roman Empire
- Identify various basic influences of Roman society and institutions upon the modern world.

Latin 2

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: $\geq$ C in previous level

Stories and plays depicting life throughout the Empire further develop reading comprehension of the Latin language. The materials provide the student with additional cultural, social and historical themes which lead him into a greater understanding of the Roman influence upon modern man and events. The student will practice new grammatical features which provide a natural progression toward Latin literature. The course continues to emphasize the improvement of Basic English skills and vocabulary through learning Latin. Oral and written Latin is also practiced through individual, small-group, and class activities.

Upon completion of this course, students will be able to:

- Read and comprehend connected narrative passages in Latin and translate them into English
- Write Latin phrases and sentences using all forms of

verbs, nouns and adjectives with various sentence patterns

- Demonstrate correct pronunciation of Latin;
- Demonstrate recognition of additional Latin grammatical structures and in turn demonstrate a better understanding of English grammar
- Demonstrate further enrichment of English vocabulary comprehension by identifying newly acquired Latin prefixes, roots, and suffixes
- Discuss additional aspects of Roman culture, society, and politics during the Empire and their influence upon the western world past and present
- Relate additional information regarding Roman religion and mythology
- Identify a broader range of historical characters, places, and situations with an emphasis on the city of Rome
- Discuss selected philosophical concepts popular during the Empire and their significance in the thinking of subsequent eras including the present.

Latin 3

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: $\geq$ C in previous level

Latin 3 students will complete their study of grammar. They will read, understand and interpret Latin prose and poetry. They will read additional selections from Ovid's "Amores" and "Metamorphoses" as well as Cicero, Catullus and Horace.

Upon completion of the course, students will be able to:

- Demonstrate understanding of subjunctive, indirect statement and all tenses and cases of Latin nouns
- Appreciate characteristic or noteworthy features of Latin writers, including their use of imagery, figures of speech, sounds, and metrical effects
- Discuss particular motifs or general themes suggested by particular passages
- Identify context and significance of excerpts from the passages studied
- Mark the scansion of meters studied
- Demonstrate further awareness of classical influences upon later literature, including that of modern times.

Latin 4

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: $\geq$ C in previous level

The Advanced Latin student will begin to read selections from notable Roman writers of prose and poetry. These introductory selections include love poems by Catullus and Ovid, Ovid's mythology in his "Metamorphoses," epigrams by Martial. The student will begin to explore various techniques for understanding and interpreting Latin in the original. This course amplifies the social, cultural, and historical themes already studied. The student will continue

to observe the influence of ancient Rome and its language upon American law, society, medicine, philosophy, art, literature and its language.

Upon completion of the course, the Latin student will be able to do the following:

- Read selections from Latin poetry and prose, and accurately translate them from Latin into English
- Demonstrate mastery of the grammatical structures and vocabulary which authors have used
- Appreciate literature more fully by identifying, analyzing, and interpreting basic literary techniques used by Latin writers
- Identify and scan basic meters of selected poems and analyze their influences upon the interpretation of the poem
- Discuss the political, social, and cultural background of the writers being read and their works
- Demonstrate an elementary awareness of classical influences upon later literature.

AP Latin

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: $\geq$ C in previous level

This course is designed for advanced Latin students who, at the end of the third or fourth year of Latin, opt to prepare for the Advanced Placement AP examination for Latin. The student will read Vergil and his Aeneid and Caesar and the Gallic Wars.. As in the courses beyond Latin 2, the basic objective is progress in reading, understanding, and interpreting Latin in the original.

Upon completion of the course, the Latin student will be able to do the following:

- Translate a prepared Latin passage from the Vergil accurately into idiomatic English
- Critically appreciate characteristic or noteworthy features of the poet's mode of expression including his use of imagery, figures of speech, sounds and metrical effects, as seen in specific passages
- Discuss particular motifs or general themes suggested by specific passages but relevant also to the poem as a whole or to other poems studied in the syllabus
- Critically analyze characters and situations as portrayed in specific passages
- Identify the context and significance of short excerpts from the required reading
- Explain specific words or phrases in context
- Mark the scansion of the meters specified in the syllabus
- Discuss classical influences upon later literature

Spanish Program

Spanish for Native Speakers

Students who are native speakers and who have sufficient vocabulary and fluency skills are invited to participate in Spanish 2, 3 or 4 with their peers who are also Spanish native speakers. Permission from the instructor is required.

Spanish 1

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year
Prerequisites: None.

This class serves as an introduction to Spanish language and culture. Our communication-based approach places students in situations which they will really encounter in a Spanish speaking environment. When introducing structures and vocabulary, we move from controlled exercises to open-ended activities in which students must handle a situation much as they might in real life.

Upon completion of the course, the student will be able to do the following in Spanish:

- Talk about self, family, and friends
- Discuss leisure-time activities
- Talk about daily life and activities
- Talk about Spanish speaking countries and their various attractions
- Use appropriate language in a variety of social interactions.

Spanish 2

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year
Prerequisite: $\geq$ C in previous level and teacher recommendation. Entering freshmen need a B or higher grade in Spanish 1 and teacher recommendation.

As students progress through the Spanish program they will increase their ability to understand what others say (in a variety of mediums) and will transmit more of their own messages in ways that avoid misunderstanding and are more complete and/or complex. The emphasis is on using what is known and introduced to communicate effectively and creatively.

Upon completion of the course, students will be able to:

- Describe and compare people and things
- Describe home and surrounding
- Interact with others about daily, weekend and vacation activities
- Talk about the past and the future
- Demonstrate an expanded cultural knowledge of the Spanish-speaking world.

Spanish 3

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year Prerequisites: $\geq$ C in previous level

The third year of the study of Spanish serves to continue, reinforce and strengthen the skills and objectives of Spanish 2. The students expand their knowledge of Spanish through

our communication-based approach so that they can adequately react to most situations in the target language. The students will learn about art, music and literature of the Spanish-speaking world.

Upon completion of the course, the students will be able to do the following in Spanish:

- Solve problems pertaining to travel plans
- Invite, accept or refuse an invitation
- Talk about pastimes and values
- Talk about the world in imaginary, unreal and contrary to fact situations
- Refer to outcomes that are imagined or depend on previous actions/

Spanish 4

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year Prerequisites: $\geq$ C in previous level

Students will develop their fluency and strengthen their skills in Spanish. They will study various genres of Spanish language literature. The course will reinforce and improve language skills through advanced grammar study, writing, and classroom discussions which will take place entirely in Spanish.

Upon completion of the course, the student will be able to do the following in Spanish:

- Understand the spoken language in a large range of situations
- Express emotions, desires, opinions, and abstract ideas orally
- Read and discuss short stories and plays
- Write compositions with a greater degree of sophistication

AP Spanish Language

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year
Prerequisites: $\geq$ C in previous level

This class is designed to help students speak at a level of fluency that is acceptable in the Hispanic world of today. Communication skills will be complemented by developing students' awareness of contemporary as well as historical issues and aspects of the Spanish speaking world. Writing ability will be refined through a review of the formal structures of the Spanish language and training in the organization and writing of compositions.

Upon completion of this course, students will be able to:

- Understand the spoken language in a wide range of situations, i.e., native speakers, films, tapes
- Understand the contemporary written language, e.g., short stories, essays
- Express self orally with fluency
- Write a well-organized and coherent composition of substantial length and sophistication
- Speak or write on contemporary as well as historical issues/topics concerning the Hispanic world.

AP Spanish Literature

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 year

Prerequisites: $\geq$ C in previous level and A in Spanish 3

In AP Spanish Literature students will explore a comprehensive history of both Peninsular and Latin American literature. The course uses a thematic approach to introduce students to representative texts (short stories, novels, poetry, and essays). Literature is examined within the context of its time and place, as students reflect on the many voices and cultures present in the required readings. The course also includes a strong focus on cultural connections and comparisons, including exploration of various media (e.g., art, film, articles, literary criticism). They will read, discuss and analyze canonical pieces from all literary epochs which include Medieval, Golden Age, Enlightenment, 19th century and 20th century for Spain and Colonial, 19th century and 20th century for Latin America. Students will participate in class discussions and then write analytical essays from a socio-historic, sociopolitical and sociocultural point of view. The class will be conducted in Spanish. It may be taken at the same time as or after the completion of AP Spanish Language.

American Sign Language (ASL)

American Sign Language (ASL) I

Credits: 5 units per semester

Grade Level: 9-12

Length 1 year

Prerequisite: None.

This introductory course is designed to develop

the fundamentals of communicative competence in conversational ASL. Finger spelling, sign vocabulary development, receptive and expressive skills development and basic sentence patterns of ASL, will be explored. The history of the Deaf in the United States and their culture will also be examined and discussed.

Upon completion of this course, students will be able to:

- Understand and perform a vocabulary of 1,000+ signs
- Demonstrate expressive finger spelling with correct placement and rhythm
- Demonstrate receptive comprehension of finger spelled words
- Demonstrate expressive and receptive signing skills for numbers and expressions of time
- Describe and demonstrate basic linguistic and grammatical structures of American Sign Language
- Describe the history of and current trends in Deaf culture and education
- Provide and receive basic information in ASL at a slow to moderate rate
- Explain the differences between ASL and other English

based signing systems.

American Sign Language (ASL) II

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisite: ≥C in previous level

This course reviews and expands the fundamental skills and concepts taught in ASL I. There will be a focus on the acquisition of additional sign vocabulary and complex grammatical structures. The improvement of basic receptive and expressive skills, and finger spelling will also be emphasized. The course will continue to explore and discuss the history of the Deaf and their culture.

Upon completion of this course, students will be able to:

- Demonstrate knowledge of intermediate concepts and grammatical structures of ASL
- Have the ability to identify and accurately produce approximately 1200 signs
- Demonstrate the ability to use intermediate receptive and expressive sign language skills in conversations, short stories, and dramatizations
- Exhibit a knowledge of all handshapes and classifiers
- Perform effective class discussions and conversations in ASL, demonstrating the ability to initiate conversations, pose questions, and sign spontaneously when given a topic
- Provide and receive information in ASL at a moderate rate.

Specialized Programs

English Language Learners

The English Language Developmental Program consists of two major areas of classes: English Language Development (ELD) curriculum classes and Sheltered classes. These classes are designed to meet the needs of the non-native English speaker who has limited English proficiency.

The goals of this program are to teach students English and academic skills while supporting their adjustment to a new country and culture. Students are placed into courses within the program which fit his or her language proficiency level as determined by standardized test results and the recommendation of a prior IUSD instructor. Courses designated as ELD have as their primary goal the advancement of the student's proficiency in English to such a degree that he or she can access the high school curriculum in content-based classes. Courses designated as Sheltered are college-preparatory classes and require the student's proficiency in English to be at such a level that he or she can continue to develop English proficiency while focusing upon content area standards.

Students learning English move from ELD to Sheltered to non-sheltered courses based on both the State of California's test of English Language proficiency and teacher recommendation. Students in the ELD program may also take courses in Mathematics, Visual and Performing Arts, Physical Education, and Athletics.

ELD

ELD 1
ELD 2

English

ELD 1 English
ELD 2 English
English 1 Sheltered
English 2 Sheltered

Science

ELD Science

Special Education

Directed Courses

Directed courses are designed to meet the needs of students who have an Individualized Education Program (IEP). Classes are offered in core academic subjects. Students learn the major concepts and acquire the skills of core curriculum to meet state standards commensurate with their abilities.

Functional Academic Instruction

This program is designed to meet the needs of the developmentally disabled student. Students enrolled in this program are identified and referred by the district program specialist. Placement in the program is determined at an Individualized Education Plan (IEP) meeting. Functional courses are specifically designed to meet the needs of the individual students. The Program emphasis includes career preparation, workplace learning, independent living skills, functional academics and community based instruction.

Deaf and Hard of Hearing Program

The Orange County Deaf and Hard of Hearing Program (DHH) focuses on the educational competencies established by the State of California and the Irvine Unified School District. The DHH program provides intensive, specialized services to students whose primary educational needs are related to an educationally significant hearing loss. This program offers courses which parallel, as much as possible, those offered in the mainstream setting. The curriculum is based on the California Content Standards and the national Common Core Standards and includes a full-range of standards-based academic curriculum, appropriate prevocational and vocational preparation opportunities, and extracurricular activities.

Deaf and hard of hearing students either meet the graduation requirements established by the Irvine Unified School District and are awarded a diploma from University High School, or receive a Certificate of Completion, if they are unable to meet district and state diploma requirements.

The primary goal of the instructional program is to prepare each student to function successfully and independently in society upon graduation. In promoting student success, the individual student's rate of learning, levels of academic performance, and social interaction are weighed carefully prior to preparation of IEP objectives and classroom placement.

Instructional experiences are designed to develop student proficiency in all six of the ESLRS: Critical Thinking and Problem Solving, Communication and Interpretation, Artistic Expression and Aesthetics, National and International Awareness, Personal and Social Development, and Interrelationship of Science, Mathematics, Technology, and Society.

The DHH Program uses a Total Communication approach in the education of students. Total Communication includes the utilization of American Sign Language, amplified residual hearing, speech and speech reading.

DHH Lab

Credits: 5 units per semester

Grade Level: 9-12

Length: 1-4 years

Prerequisites: none

This course is designed to provide resource and academic support services for the student in the DHH Program. Students work independently or in groups on projects and homework. Staff members provide one-on-one or group instruction to help students complete their work and improve their skills in the areas of math, reading, and English. Students explore areas of personal and career interests.

Upon completion of this course, students will be able to:

- Complete assignments through reinforcement of concepts taught in the classroom
- Improve skill levels through instruction and/or remediation
- Develop appropriate study skills and test-taking skills to foster independence
- Explore areas of personal and career interests
- Learn to work independently and in groups.

DHH Directed English 1

Credits: 5 elective units per semester

Grade Level: 9-12

Length: 1-4 years

Prerequisites: none

This course is a beginning language program for the student entering a secondary Deaf and Hard of Hearing program at the pre-reading level. Emphasis will be placed on an introduction to the English language and basic parts of

speech.

Upon completion of this course, students will be able to:

- Recognize and write the following: alphabet, numbers, name, address, telephone number, days of the week, months and seasons of the year, and Dolch Basic Sight words
- Identify nouns and verbs by categorizing people, places, things, and action words
- Identify sentence patterns to include noun-verb and noun-verb-adjective
- Write three sentences to correspond to a given picture sequence or prompt
- Develop paragraph skills to include: punctuation, capitalization, indentation, margins and correct spelling
- Use Sign Language to formulate statements and answer simple questions
- Develop problem solving strategies in cooperative groups
- Employ technology and/or artistic media to complete creative projects.

DHH Directed English 2

Credits: 5 units per semester

Grade Level: 9-12

Length: 1-4 years

Prerequisites: DHH Directed English I, equivalent skills, or Teacher Recommendation

This course is a beginning language class designed to focus upon skill areas in written communication, vocabulary development, mechanics, syntax and grammar.

Upon completion of this course, students will be able to:

- Define the eight parts of speech to include nouns, verbs, adjectives, adverbs, pronouns, prepositions, conjunctions and interjections
- Demonstrate correct usage of regular and irregular verbs in the past, present and future tenses
- Develop paragraphs using a variety of sentence structures and vocabulary
- Interpret and respond to writing prompts that ask the writer to answer a question or explore a topic
- Write short Persuasive, Descriptive, Narrative and Expository essays that include paragraphs with a topic sentence, at least three supporting sentences, and a concluding sentence
- Write friendly letters, thank-you notes, get-well messages, and notes of condolence
- Use Sign Language to answer and ask questions during discussions and lectures
- Develop problem solving strategies in cooperative groups
- Employ technology and/or artistic media to complete creative projects
- Discuss ethical issues as they impact society
- Expand vocabulary through a variety of vocabulary building exercises.

DHH Directed English 3

Credits: 5 units per semester Grade Level: 9-12

Length: 1-4 years

Prerequisites: DHH Directed English 2, equivalent skills, or Teacher Recommendation

This course is a comprehensive English class that aims to improve the student's writing skills through the completion of essay assignments.

Upon completion of this course, students will be able to:

- Use a variety of multiple-meaning words in various contexts
- Use the correct part of speech for a given word in compositions
- Interpret and respond to writing prompts that ask the writer to persuade or convince
- Write a three-part thesis statement that states an opinion or addresses a question
- Write Persuasive, Narrative and Expository essays with an emphasis on argumentative/analytical writing
- Write a five paragraph essay to include a thesis statement, at least three supporting paragraphs and a conclusion with close attention being given to transition words and phrases
- Incorporate the three elements of essay writing into all written assignments: focus, organization, and support
- Plan a research paper, outlining the topic, writing, and editing the report
- Converse fluently using Sign Language
- Develop problem solving strategies in cooperative

groups

- Employ technology and/or artistic media to complete creative projects
- Discuss ethical issues as they impact society
- Expand vocabulary through a variety of vocabulary building exercises, emphasizing Latin roots, prefixes, suffixes, and vocabulary in various kinds of usages.

DHH Directed Reading 1

Credits: Elective

Grade Level: 9-12

Length: 1-4 years

Prerequisites: none

This course is a beginning reading program designed for the emerging reader. Emphasis will be placed on reading readiness, basic comprehension, survival and functional sight vocabulary, following directions, and reasoning skills.

Upon completion of this course, students will be able to:

- Recognize survival and functional vocabulary used out in the community
- Define words in context, with an emphasis on Dolch words and simple multiple meaning words
- Answer short questions about a simple paragraph
- Read and follow directions in a variety of real-life areas: recipes, transportation schedules, and laundering
- Answer basic who, what, when and where questions
- Follow directions on a simple worksheet or test
- Use technology to complete various assignments
- Work in cooperative groups.

DHH Directed Reading 2

Credits: 5 units per semester

Grade Level: 9-12

Length: 1-4 years

Prerequisites: DHH Directed Reading 1, equivalent skills, or Teacher Recommendation

This course is designed to build on the student's emerging literacy by increasing student reading comprehension, expanding vocabulary, and introducing literature and literary terms. Emphasis is on critical thinking and basic reasoning skills.

Upon completion of this course, students will be able to:

- Improve comprehension skills by recalling basic information, using deductive reasoning, and employing inferential thinking
- Develop critical reading skills in the areas of cause/effect, fact/opinion, predicting outcomes, making judgments, and citing evidence to support conclusions
- Improve and expand knowledge of vocabulary in the area of context clues, idioms, multiple meanings, synonyms and antonyms through a variety of reading exercises
- Define and cite examples of literary terms to include plot, setting, character and characterization,

- protagonist, antagonist, point of view, tone and mood
- Explore problem solving techniques through the completion of logic exercises
- Use technology to complete assignments
- Work in cooperative groups.

DHH Directed Reading 3

Credits: 5 units per semester Grade Level: 9-12
 Length: 1-4 years
 Prerequisites: DHH Directed Reading 2, equivalent skills, or Teacher Recommendation

This course is designed to develop the student's awareness and comprehension of various forms of literature and acquire the skills to analyze and critique major literary pieces. Emphasis will be on figurative language, in-depth vocabulary expansion, and inferential thinking.

Upon completion of this course, students will be able to:

- Increase reading comprehension through exposure to short stories and novels
- Identify and cite examples of literary terms to include plot, setting, character and characterization, protagonist, antagonist, theme, mood, tone, symbolism, point of view, irony, author's purpose, and the elements of style
- Increase critical thinking skills in the areas of fact/opinion, cause/effect, making inferences, drawing and supporting conclusions, and predicting outcomes.

DHH Directed Global Perspectives

Credits: 5 units per semester Grade Level: 9-10
 Length: 1 year
 Prerequisites: Enrolled in DHH Program, and teacher recommendation

This course is a study of the globe from several perspectives. The student will develop basic map skills through the study of regions of the U.S. and the world. The student will identify the regions of the U.S., the continents, and major oceans. The student will investigate the various physical and cultural characteristics of several countries and complete a research project. Current events are an integral part of this class. The students will also be introduced to major events in World History.

Upon completion of this course, students will be able to:

- Define functional vocabulary related to maps such as globe, earth, continent, country, region, state, ocean, mountain, etc
- Develop basic map reading skills to include directions, scales, legends, time zones, latitude, and longitude
- Read different types of maps including physical, political, climate, and transit maps
- List and discuss the states, capitals, climates, populations, resources, and points of interest for each

region studied

- Identify and locate the seven continents, four major oceans, and major countries in the world
- List and discuss the various characteristics such as government, language, climate, resources, customs, traditions, foods and history of a country, and complete a research report
- Discuss current events as they apply to weekly lessons
- Employ current technology and/or various artistic media to complete creative projects.

DHH Directed U.S. History

Credits: 5 units per semester Grade Level: 10-12
 Length: 1 year
 Prerequisites: Enrolled in DHH Program, and teacher recommendation

This course is a survey of American events from pre-colonial times to the present. Different aspects of American social, political, military, economic, and intellectual history will be examined. The major accomplishments of great political leaders, inventors, scientists, reformers, and humanitarians will be discussed. Current events will be covered as they apply to weekly lessons. An appreciation of American heritage will be developed.

Upon completion of this course, students will be able to:

- Identify and describe the chronology of major events, their causes and effects, from pre-colonial times to the present
- Identify and explain the causes, events, and results of the wars and treaties in which the U.S. has engaged
- Recognize the major accomplishments of great political leaders, inventors, scientists, reformers, and humanitarians
- Compare and contrast historical events to current social, economic, and political trends
- Develop an appreciation of American heritage through a study of major movements in American history such as slavery, immigration, labor, civil rights, etc
- Think critically by resolving problems in cooperative groups
- Expand knowledge and skills to include the development of artistic judgment.

DHH Directed Economics

Credits: 5 units per semester

Grade Level: 11-12

Length: 1 semester

Prerequisites: Enrolled in DHH Program, and teacher recommendation

This is a course that examines the U.S. economy in detail. Emphasis is on the laws of supply and demand, competition, and the role of government in a free market economy.

- Identify different economic systems including capitalism, socialism and communism
- -Define the laws of supply and demand and how those laws are influenced and impacted
- Define the circular flow of income, the profit incentive, and various types of businesses
- -Think critically about the stock market as a reflection of economic trends and events
- -Think critically about how competition informs and defines the U.S. economic system
- -Explore the role of workers, wages, and labor unions in a capitalist system
- -Explore the role of the consumer and the banking system in the U.S. economy
- -Explore the impact of inflation, unemployment, and poverty on the U.S. economy

DHH Directed Political Science

Credits: 5 units semester

Grade Level: 11-12

Length: 1 semester

Prerequisites: Enrolled in DHH Program, and teacher recommendation

This course is a basic study of American government at the national, state, and local levels. The student will focus on the foundations of American government, the Constitution of the U.S., and the function and purpose of the three branches of government. The rights and responsibilities of citizenship will be introduced and applied to daily life. Current events are an integral part of this study. Specific objectives will vary based on individual student ability.

Upon completion of this course, students will be able to:

- Define political science and discuss why government and laws are necessary
- Examine and discuss the Constitution including the Preamble, Bill of Rights, Articles, and Amendments
- Identify the three branches of government and explain the function and purpose of each branch
- Describe and sequence the process by which a bill becomes a law
- Describe the election process to include basic voting procedures
- Identify current government officials and describe their responsibilities
- Discuss the inter-relationships of the national, state,

and local government

- Discuss the rights and responsibilities of being a citizen and apply them in simulated situations
- Discuss current events as they apply to weekly lessons
- Discuss ethical issues as they impact society
- Think critically by resolving problems in cooperative groups
- Explain the role and purpose of political parties in the democratic process.

DHH CBI Social Science/Social Studies

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: none

A standards based special education course in social studies and science. Alternating monthly between social studies and science themes, the following topics will be explored:

Science:

The science part of the class is to provide the student will the knowledge of the world around them, including:

- Scientific Inquiry - Scientific Method provides the problem solving skills that are the basis of all aspects of scientific investigation, and will be used in all aspects of scientific inquiry. Students will improve their critical thinking skills that will assist them in all of their academic courses, and in everyday problem solving.
- Earth and Space Science (Environmental Science) Steps to take care of the earth to ensure its resources and inhabitability for years to come. The earth consists of several but interacting parts. Change in one part affects the Earth as a whole.
- Life Science (Biology) Living organisms, their structure and functions. The interactions between living organisms and their environment.
- Physical Science (Physics and Chemistry) Understanding electrical circuits, Newton's laws, magnetism and gravity.

Social Studies:

- American History - A general survey of America's history from its inception to present day..
- American Government - A general review of the how our American Government functions, and student's civic responsibilities.
- Geography (World Geography) - Students will learn world geography, identification of continents and countries.
- Economics (Economics and Financial Literacy) - The course is designed to teach basic personal

financial concepts, and how national economics relates to employment, personal finances and housing costs.

DHH Directed Earth System Science

Credits: 5 units per semester Grade Level: 9-10
Length: 1 year
Prerequisites: Enrolled in DHH Program and teacher recommendation

This course is designed to cover basic science principles in the areas of Life Science, Earth Science, and Physical Science. The students will learn content through Project Based Learning (PBL). Students will use critical thinking, communication, and collaboration to solve science based problems and become both teachers and learners. Specific objectives will be based upon individual student ability.

DHH Directed Biology

Credits: 5 units per semester Grade level: 10 - 12
Length: 1 year
Prerequisites: Enrolled in DHH Program and teacher recommendation

This course is designed to cover basic science principles in the areas of Life Science, Earth Science, and Physical Science. The students will learn content through Project Based Learning (PBL). Students will use critical thinking, communication, and collaboration to solve science based problems and become both teachers and learners. Specific objectives will be based upon individual student ability.

DHH Directed Math

Credits: 5 units per semester Grade Level: 9-12
Length: 1-4 years
Prerequisites: Enrolled in DHH Program, and teacher recommendation

This course is designed to meet the needs of the deaf and hard of hearing student. It is divided into 3 levels which include:

Level 1:

To give the student basic survival mathematical skills. Whole number operations and real life application are emphasized.

Level 2:

Designed to expand the student's computation skills including operations with whole numbers, fractions, decimals, and basic measurement and geometry. Practical application is emphasized.

Level 3

Further expands a student's computation and application skills of mathematical operations with negative and positive integers, fractions, decimals, ratios, and percent.

DHH Directed Math 1 – HS Credit Algebra Course

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year
Prerequisites: Teacher recommendation

This course reinforces the mastering of Algebra. Through individual pacing and group instruction, the class focuses on algebraic expression, real number properties, linear equations, and basic statistics. Activities will include manipulatives and graphing calculators. Students will develop skills and strategies to prepare for future mathematical courses, as well as standardized tests. The focus is placed on the problem solving strategies that can be applied to real world mathematics. This course places a focus on the key concepts and application as outlined in the California Common Core Standards.

Skills and Assessment: Students will be able to:

- Understand patterns, relations, and functions
- Represent and analyze mathematical situations and structures using algebraic symbols
- Use mathematical models to represent and understand quantitative relationships and analyze change in various contexts
- Investigate linear, quadratic, and exponential functional relationships
- Understand various representations of a line
- Addition, subtraction, and multiplication of polynomials
- Solve equations and inequalities
- Radical expressions and exponents, quadratic equations
- Systems of equations and inequalities
- Students will be introduced to basic calculator functions to assist their efforts

DHH CBI Math

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year
Prerequisites: Teacher recommendation

Community Based Instruction (CBI) math is a course designed to provide students "real life experiences" in naturally occurring community environments. The goal is to provide a variety of hands on learning opportunities at individualized levels to help students acquire the skills needed to live in the world today. Students learn skills such as; money handling, counting change, how to pay for goods and services, banking, budgeting, time concepts, time management, measurement, planning and scheduling.

DHH Applied Mathematics

Credits: 5 units per semester Grade Level: 11-12
Length: 1 year
Prerequisites: Enrolled in DHH Program, and teacher recommendation

This course is designed to assist the student in his use of mathematics as a tool in his personal life. The student will strengthen basic math skills and gain the knowledge and confidence to solve a wide variety of issues including budgeting, banking, and planning for the future.

Upon completion of the course, students will be able to:

- Prepare a budget for essential living expenses
- Discuss salary issues and calculate gross and net income
- Apply mathematics in checking, savings, and money management
- Discuss housing options and calculate costs
- Calculate charge and cash sales transactions
- Calculate costs related to insurance, automobiles, home ownership and other investments
- Demonstrate bank transaction skills such as opening and maintaining an account, and reconciling a bank statement

DHH Pre-Math I

Credits: 5 units per semester Grade Level: 9-12

Length: 1 year

Prerequisites: Completion of Level 7 with a B or better and recommendation of the teacher

The Pre-Algebra course is an introduction to basic algebra concepts and a review of arithmetic algorithms. The course is designed to give students the fundamental skills necessary to be successful in Algebra I. The course helps students to develop good mathematical study skills and learning strategies as an integral part of this course. Pre-Algebra A/B begins with an overview of the number system and operations with whole numbers, fractions, decimals, and positive and negative numbers.

Upon completion of this course, students will be able to:

- Perform the four basic operations of addition, subtraction, multiplication and division on whole numbers, fractions, mixed numbers, and decimal numbers
- Find the multiples, divisibility, and factors of composite numbers; find the least common multiple and greatest common factor of two or more numbers
- Find the ratio of two quantities in fraction notation, write rates as a ratio of two different measures, solve proportions, and solve application problems
- Rewrite percent in fractional or decimal form; rewrite fractions and decimals as percent; solve percent equations
- Find the perimeter and surface area of rectangles, squares, parallelograms, triangles, circles, and composite figures
- Find the volume of solids and composite geometric solids
- Apply the Properties of math and order of operations to solve equations

- Add, subtract, multiply and divide signed numbers (integers)
- Solve basic algebraic equations
- Solve real life word problems using various strategies involving real numbers
- Identify the parts of a coordinate graph and plot ordered pairs
- Add and subtract monomials and binomials
- Solve problems with integer exponents and radicals
- Understand and apply the concepts of congruence, similarity, and the concepts of the Pythagorean Theorem
- Define, evaluate, and compare functions

DHH Math I A/B

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Completion of Pre-Algebra with a C or better and recommendation of the teacher

Algebra 1 A/B is a UC “b” approved course. It is the first year of a two-year sequence and satisfies the requirements of the California State Standards. Graphing, equations, ratios, symbol manipulation and problem solving threads are woven throughout the course. The first semester of the Algebra 1 course will be covered over the two semester Algebra 1 A/B course.

Upon completion of the course the student should be successful at all skills discussed in Algebra 1A as well as the following:

- Apply the Properties of math and order of operations to solve equations
- Add, subtract, multiply and divide signed numbers
- Solve multistep equations and inequalities
- Compare linear, quadratic, and exponential models
- Use formulas to solve word problems
- Solve and graph inequalities
- Solve and graph functions
- Use the slope of linear equations to graph lines, and find parallel and perpendicular lines to given lines
- Solve systems of linear equations by graphing, substitution and elimination methods
- Calculate simple probabilities
- Solve arithmetic operations on polynomials

DHH Math I C/D

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: Completion of Algebra A/B with a C or better and recommendation of the teacher

Algebra 1 C/D is a UC “B” approved course. It is the second year of a two-year sequence and satisfies the requirements of the California State Standards. Graphing, equations, ratios, symbol manipulation and problem solving threads

are woven throughout the course. The second semester of the Algebra 1 course will be covered over the two semester Algebra 1 C/D course.

Upon completion of the course the student should be successful at all skills discussed in Algebra 1B as well as the following:

- Apply basic factoring techniques to second and simple third-degree polynomials using common terms, special products and trinomials
- Add, subtract, multiply and divide monomials and polynomials
- Simplify fractions with polynomials in the numerator and denominator
- Add, subtract, multiply and divide rational numbers
- Add, subtract, multiply and divide radical expressions
- Solve radical equations
- Solve problems based on tables and graphs
- Write and solve linear, quadratic, and absolute value equations and inequalities
- Identify functions and function notation
- Use the Pythagorean Theorem as a tool to solve problems.

DHH Math I

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year

Prerequisites: "C" grade or better in Pre-Algebra and recommendation of the teacher

DHH Algebra is a one year, 2 semester, college preparatory course which satisfies the requirements of the California State Common Core Standards. Basic skills are integrated with conceptual understanding and problem solving skills. Graphing, equations, ratios, symbol manipulation and problem solving threads are woven throughout the course. The study of real numbers and their properties, with concepts and skills developed are presented in a direct, logically ordered sequence. Topics include the fundamental operations on real numbers, solving equations and inequalities, factoring polynomials, fractions, relations, rational and irrational numbers, systems of open sentences, and quadratic equations and functions. The emphasis in this course is on teaching elementary algebra as an aid to problem solving and as a foundation for subsequent mathematics courses.

Upon completion of DHH Algebra students will be able to:

- Solve complex, multistep equations with integers and real numbers
- Calculate probabilities
- Perform operations with polynomials
- Factor common terms, special products, trinomials and polynomials
- Solve and graph equations and inequalities
- Graph linear and quadratic functions using concepts of slopes and intercepts
- Identify properties of real numbers with an emphasis

on the Distributive Property

- Solve systems of linear equations by graphing, substitution, and elimination methods
- Add, subtract, multiply, divide and simplify rational expressions
- Add, subtract, multiply, divide and simplify radicals with index 2
- Solve basic quadratic equations
- Identify functions and function notation.

DHH Math II

Credits: 5 units per semester Grade Level: 9-12
Length: 1 year

Prerequisites: $\geq C$ in Math I or Math I CD, $\geq 70\%$ on EOC, Teacher Appraisal (2 of 3 needed for recommendation) 9th grade enrollment also requires recommendation from Middle School teacher

The focus of Mathematics II is on quadratic expressions, equations, and functions; comparing their characteristics and behavior to those of linear and exponential relationships from Mathematics I as organized into 9 units of study surrounding the critical focus areas defined by the California Mathematics Content Standards. The need for extending the set of rational numbers arises and real and complex numbers are introduced so that all quadratic equations can be solved. The link between probability and data is explored through conditional probability and counting methods, including their use in making and evaluating decisions. The study of similarity leads to an understanding of right triangle trigonometry and connects to quadratics through Pythagorean relationships. Circles, with their quadratic algebraic representations, round out the course. The Mathematical Practice Standards apply throughout each course and, together with the content standards, prescribe that students experience mathematics as a coherent, useful, and logical subject that makes use of their ability to make sense of problem situations.

Skills and Assessment: Students will be able to:

- Connect concepts to the real world using mathematical modeling.
- Reason quantitatively and use units to solve problems.
- Explain and justify the processes they use in solving problems.
- Communicate mathematical understanding and problem solving through the use of multiple representations such as diagrams, models, tables, graphs and symbols.

- Develop and extend strategies to transition from knowledge of concepts and skills to theoretical reasoning and application of concepts.
- Demonstrate mastery of concepts and skills through various assessments in the form of homework, quizzes, tests, and performance tasks.
- Use appropriate technology to enhance learning and understanding.

DHH Math III

Credits: 5 units per semester

Grade Level: 10-12

Length: 1 year

Prerequisites: Grade 10-12: $\geq C$ in Math II, $\geq 70\%$ on EOC, Teacher Appraisal (2 of 3 needed for recommendation)

Math III is the third course in the college preparatory math sequence. Instructional time will focus on four critical areas: applying methods from probability and statistics to draw inferences and conclusions from data; expanding understanding of functions to include polynomial, rational, and radical functions; expanding right triangle trigonometry to include general triangles and trigonometric functions; and consolidate functions and geometry to create models and solve contextual problems. This course is aligned with the California Common Core State Standards.

Skills and Assessment: Students will be able to:

- Connect concepts to the real world using mathematical modeling.
- Reason quantitatively and use units to solve problems.
- Explain and justify the processes they use in solving problems.
- Communicate mathematical understanding and problem solving through the use of multiple representations such as diagrams, models, tables, graphs and symbols.
- Develop and extend strategies to transition from

knowledge of concepts and skills to theoretical reasoning and application of concepts.

- Demonstrate mastery of concepts and skills through various assessments in the form of homework, quizzes, tests, and performance tasks.
- Use appropriate technology to enhance learning and understanding.

DHH Exploring Computer Science

Credits: 5 units per semester

Grade Level: 9-12

Length: 1 year

Prerequisites: None

Exploring Computer Science is designed to introduce students to the breadth of the field of computer science through an exploration of engaging and accessible topics. Students will be introduced to topics such as problem solving by providing student opportunities to become "computational thinkers", programming, web design, computing and data analysis and robotics. The class is hands on robotics, circuit board assembly and comprehension of sensors, displays, motors and power. 3D Printing to create objects that are used for prototyping creative innovations to solve problems. HTML5 and CSS is used to plan, design and implement Web Page Design.

Upon completion of this course, student will be able to:

- Develop the ability to problem solve using structured tinkering, creating multiple solutions through testing and group collaboration.
- Engage in simulations and role playing activities to show evidence of computational thinking.
- Analyze a need or a problem, determine the best plan for action, and delegate and collaborate for multiple solutions and best results.
- Effectively use hardware (3D Printer, Robotics, Computers...) and know how to maintain it, and problem solve issues that may surface.
- Explore career opportunities using the skills learned in the Computer Science Field

Non Departmental Elective Courses

Course Title	Length Year Semester Quarter	Prerequisites	Grade Low	Grade High
Study Skills	S	None.	9	12
Community Experience	Qtr	Meet ≥ 16 age requirement, have a job, and administrator approval.	11	12
Leadership - Associated Student Body	Y	Appointment to ASB or elected to ASB. 2.0 GPA minimum.	9	12
College Class	S	Counselor approval.	10	12
Student Assistant	Qtr	Permission from instructor and counselor.	9	12
Peer Tutor	Qtr	Counselor and teacher approval.	10	12
PE Private Instruction		National Ranking of approved sport or team.	9	12

Study Skills

Credits: 5 units per semester
Length: semester

Grade Level: 9-12
Prerequisites: none

This course is designed to help students develop organizational and study skills to help them succeed in their academic courses. Students create weekly Smart Goals and have time to work on course material from other classes. Students also develop and enforce literacy and communication skills during the semester.

Community Experience

Credits: Variable: 1 unit per 40 hours of work experience per quarter, up to 2.5 credits per quarter. Pass/Fail grade.
Maximum credits toward graduation: 40
Grade Level: 11-12 Length: 1 quarter (may be repeated)
Prerequisites: > 16 years old, have a job (plus work permit if under 18 years old), administrator approval

Work Experience is a program that develops skills, habits and attitudes conducive to job success, personal growth, and career preparation. This course will grant credit to students for paid employment. The part time job held by the student need not be related to the occupational goal of the student. Instructional time will focus on reflection and skill building that will serve to foster job skills and career focus.

Work Permits:

Students with work permits must adhere to the following restrictions:

- The maximum allowable work hours are 28 hours per week and no more than four (4) hours per day on school nights.
- Students cannot work after 10:00 p.m. on school nights or after 12:30 p.m. on other nights.
- Students may not work seven (7) consecutive days.
- Students may not work more than eight (8) hours/day.

Leadership-Associated Student Body (ASB)

Credits: 5 units per semester
Length: 1 year

Grade Level: 9-12

Prerequisites: Appointment to ASB or elected to ASB; 2.0 GPA.

The Leadership course focuses on developing within students an understanding of how government functions. Students will become familiar with the techniques and principles of leadership, and they will learn how to plan and implement complex projects. During leadership meetings, they will learn and apply the tenets of parliamentary procedure, and eventually conduct effective and efficient board meetings. They will engage in conflict mediation and resolution, and they will learn a variety of different communication skills. Finally, students will set, reflect on, and ultimately achieve complex personal and academic goals.

Students will utilize their talents and skills to provide school wide activities that enhance the student body's experiences by establishing a safe, positive atmosphere that promotes spirit and unity. This course will be divided between leadership instruction (by both the teachers and students) and the operation of the activities program. It will be run akin to a science classroom in that there will be days devoted to direct instruction in which we will study leadership, and days in which the students will participate in labs (the operation of the activities program.) Students will apply the knowledge they gain from direct instruction to their experiences and eventually, through trial and error, discover the principles of effective leadership.

College Class

Credits: 1.0 - 5.0 units per semester
Length: 1 semester

Grade Level 10-12

Prerequisite: Counselor approval

Students may enroll in college classes at any of the local community colleges or 4 year colleges with counselor permission, and completed permission form.

The student must complete a request form provided specific to the college and prior to enrollment in a course. The California Education Code provisions limit the number of eligible students that can be approved by the high school (CA.Ed.Code 48800). Recommendation for summer session requires the students to meet all of the following:

- Demonstrate adequate preparation in the discipline to be studied
- Exhaust all opportunities to enroll in an equivalent course at the high school
- For any particular grade level, recommendation is limited to 5% of the total number of students who completed that grade immediately prior to the time of recommendation

Student Assistant

Credits: 2.5 units per quarter Grade Level: 10-12

Length: 1 quarter

Prerequisites: Permission from counselor and teacher

A maximum of 10 credits may be earned toward graduation for any combination of teacher/office aides. This course may be repeated for credit, and the student will be graded on a pass/fail basis.

Peer Tutor

Credits: 2.5 units per quarter Grade Level: 10-12

Length: 1 quarter

Prerequisites: Permission from counselor and teacher

A maximum of 10 credits may be earned toward graduation for any combination of teacher/office aides. This course may be repeated for credit, and the student will be graded on a pass/fail basis. Student must have superior math skills and be willing and able to tutor students in lower level math courses.

PE Private Instruction

Credits: 2.5 units per quarter Grade Level: 9-12

Length: 1 quarter (may be repeated)

Prerequisites: National Ranking of approved sport. Administrator approval.

A maximum of 20 credits may be earned and a Pass grade will be issued.

This course is for elite athletes in a sport pre-approved by the Irvine Unified Board of Education for private instruction credit. The athletic sport and team requires approval from the school district or designee. Please refer to the requirements for each individual sport at iusd.org → parent resources → PE/ Athletics → PE Via Private Instruction. Students will be enrolled in at 5 period day (or 6 with a qualifying 0 period) with the sixth period being Private

Instruction. To apply for this course, visit the IUSD website for forms.

Board Policies

Nondiscrimination/Harassment – Students

Board Policy 5145.5

The Irvine Unified School District is committed to equal opportunity for all individuals in education. District programs and activities including membership in student clubs shall be free from discrimination based on race, color, ancestry, nationality, ethnic group identification, age, religion, actual or potential parental, family, or marital status, or the exclusion of any person because of pregnancy or related conditions, physical or mental disability, sex, sexual orientation, gender, gender identity or expression, or genetic information; the perception of one or more of such characteristics; or association with a person or group with one or more of these actual or perceived characteristics.

The District does not discriminate in enrollment in or access to any of the activities and programs available. Admission to these programs is based on age appropriateness, class space, interest, aptitude, and prerequisite coursework where applicable. The lack of English skills shall not be a barrier to admission to or participation in the District's activities and programs. The Irvine Unified School District also does not discriminate in its hiring or employment practices.

This notice is provided as required by Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title IX of the Education Amendments of 1972, the Age Discrimination Act of 1975, Title II of the Americans with Disabilities Act of 1990, and the California Code of Regulations Title 5, Chapter 5.3 Nondiscrimination. Questions, complaints, or requests for additional information regarding these laws may be forwarded to the District's designated compliance coordinators.

Equity/Title IX Compliance Officer: Keith Tuominen, 5050 Barranca Pkwy, Irvine, CA 92604. Phone: (949)936-5047

IUSD does not discriminate against pregnancy, family or marital status as stated IUSD Nondiscrimination Statement and BD Policy 5145.5 posted on the district website and in the above paragraphs, and posted in the school reception and high school counseling reception areas. All students have access to all programs.

The district does not exclude or deny any student from any educational program or activity solely on the basis of pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery therefrom.

Pregnant students and parenting male or female students are not excluded from participation in their regular school programs or required to participate in pregnant-student programs or alternative educational programs.

Pregnant/parenting students who voluntarily participate in alternative programs are given educational programs, activities, and courses equal to the regular program.

The LEA treats pregnancy, childbirth, false pregnancy, termination of pregnancy, and recovery therefrom in the same manner and under the same policies as any other temporary disability.

Sexual Harassment – Students

Board Policy 5145.7

The Board of Education is committed to maintaining a learning environment free from harassment, intimidation or insult, student-to-student or adult-to-student, on the basis of an individual's actual or perceived sex, sexual orientation, gender, gender identity or expression. Positive action will be taken when necessary to eliminate such practices or remedy their effects. Sexual harassment, as defined and otherwise prohibited by state and federal statutes, constitutes an unlawful form of sex discrimination in violation of Title IX of the Education Amendments Act of 1972 and Title VII of the Civil Rights Act of 1964. In addition, sexual harassment constitutes violation of the California Education Code, regulations of the State Board of Education, and District Policy. As such, sexual harassment may constitute just cause for discipline pursuant to applicable Education Code Sections.

Definition

Sexual harassment consists of unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature. It includes, but is not limited to, circumstances in which:

1. submission to such conduct is made either explicitly or implicitly a part of the academic environment;
2. submission to or rejection of such conduct by a student is used as the basis for grading, evaluation, or supervision

- decisions affecting a student; or
3. such conduct has the purpose or effect of unreasonable interference with a student's academic performance or creates an intimidating, hostile or offensive learning environment.

Forms of sexual harassment include, but are not limited to, the following:

1. verbal harassment: derogatory comments, jokes, or slurs;
2. physical harassment: unnecessary or offensive touching or impeding or blocking movement;
3. visual harassment: derogatory or offensive posters, cards, cartoons, graffiti, drawings or gestures; and
4. sexual favors: unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature.

Activities such as:

- comments repeatedly emphasizing the sexuality identity of an individual;
 - persistent requests for social-sexual encounters and favors;
 - physical contact of a lewd type;
 - indecent exposure;
 - realized sexual encounters constitute sexual harassment when they are accompanied by one or more of the following terms or conditions:
1. explicit or implicit promises of rewards for cooperation via misuse of institutional authority -- e.g., to affect a student's academic advancement, grades, graduation, etc.
 2. explicit or implicit threats of punishment for non-cooperation via misuse of institutional authority -- e.g., to effect a student's academic advancement, grades, graduation, etc.
 3. intimidation which creates a hostile or offensive academic environment; interferes with a student's scholastic performance; prevents a student's full enjoyment of education opportunities; or induces conformance, stress, anxiety, fear, or sickness on the part of the harassed student.

Implicit in the legal definition of sexual harassment is the assumption that sexual harassment prevents the realization of the victim's full potential as a student. A person sexually harassing a student is thus robbing the victim of the freedom to learn. Sexual harassment, then, is considered unethical and unsatisfactory, as well as illegal behavior.

Resolution Process

I. Informal Process:

To accommodate the unique nature of sexual harassment complaints, an informal process is provided for the primary purpose of resolution of a complaint at the earliest possible date. Elements of this process are:

1. The principal, an assistant principal, or a counselor may receive sexual harassment complaints from students and/or parents/guardians. The individual receiving the complaint will:
 - a. counsel the student, outline the options available and, when parents/guardians have not been involved, inform them of the complaint and the procedures to be followed;
 - b. obtain a factual written statement of the complaint and forward such to the Superintendent;
 - c. assist in the follow-up investigation, as appropriate;
 - d. make recommendations regarding the disposition of the complaint to the Superintendent or designee.
2. The Superintendent or designee will review the factual information collected to determine whether the alleged conduct constitutes sexual harassment, giving consideration to the record as a whole and the totality of circumstances, and will take and/or authorize appropriate action in accordance with student disciplinary procedures or due process requirements.
3. An effort will be made to protect the privacy of the parties involved in a complaint. Files which pertain to complaints handled under the informal process shall be kept confidential and will not be made available to the public.

II. Formal Process:

If the complaint is not resolved to the satisfaction of the student or his/her parents in the informal process, the following formal procedure is available:

1. The complaint shall be reduced to writing by the complainant and sent to the Superintendent within 10 working days of the completion of the informal process.
2. The Superintendent shall investigate the complaint and respond within 10 working days after receipt of the complaint.
